TENDER DOCUMENTS

The City of Brandon Standard Construction Specifications which includes the General Conditions of the Contract (Revision 2014-04-14) and the specific Sections referred to in the Contract Documents under; Division 1 General Requirements and Division 2 Site Work form part of the Tender Documents and are applicable to the Work.

These documents are available in electronic form from the City of Brandon Procurement Services, Purchasing & Tenders internet site at <https://purchasing.brandon.ca/>.

It is the sole responsibility of the Bidder to ensure they are in the possession of complete and current sets of Tender Documents including all Addenda shall be used in the preparation of the Tender. The City assumes no responsibility for errors or misinterpretations resulting from the use of incomplete or outdated Tender Documents.

INSTRUCTIONS TO BIDDERS

IB1. DEFINITIONS

- IB1.1 All terms used in the Tender Documents shall have the meanings ascribed to them in GC1

IB2. INVESTIGATION

- IB2.1 The Bidder is responsible for:
- .1 examining the Tender Documents and all documents included or referenced herein;
 - .2 investigating the nature of the Work to be done;
 - .3 investigating all conditions, whether at the Site or elsewhere, that might affect their Tender or their performance of the Work.

- IB2.2 A site visit will be held on Wednesday, September 23, 2026 at 10:00 a.m. at Riverbank Discovery Centre, 545 Conservation Drive, Brandon Manitoba. Sign in will commence at 9:45 a.m. Attendance at the Site Visit is not mandatory, but Bidders are encouraged to attend.

The following PPE is mandatory: high visibility safety vests and steel toed boots.

- IB2.3 The Bidder shall not be entitled to rely on any information or interpretation provided by the City at the Site investigation unless that information or interpretation is provided by the Procurement Specialist in writing.

IB3. ENQUIRIES

- IB3.1 If the Bidder finds errors, discrepancies or omissions in the Tender Documents, or is unsure of the meaning or intent of any provision therein, the Bidder shall promptly notify the Procurement Specialist.

- IB3.2 Enquiries shall be received in writing at least seven (7) calendar days prior to the Submission Deadline. Enquiries received after this date may not be responded to.

- IB3.2.1 The deadline for enquires will remain at seven (7) calendar days prior to **Thursday, October 01, 2026** regardless of whether an extension of the

Submission Deadline occurs. An extension of the Submission Deadline will not result in an extension in the timeline for enquiries.

IB3.3 Any enquiries shall be directed to:

The City of Brandon
Procurement Specialist
Procurement Services
Main Floor - City Hall
410-9th Street
Brandon, Manitoba
R7A 6A2

E-mail address: purchasing@brandon.ca

IB3.4 Responses to enquiries that, in the judgment of the Procurement Specialist, require a correction to or a clarification of the Tender Documents will be provided by issuing an addendum in accordance with IB5.

IB3.5 Responses to enquiries that, in the judgment of the Procurement Specialist, do not require a correction to or a clarification of the Tender Documents will be provided by the Procurement Specialist or designate only to the Bidder who made the enquiry.

IB3.6 The Bidder shall not be entitled to rely on any response or interpretation received unless that response or interpretation is provided by the Procurement Specialist or designate in writing.

IB4. **SUBSTITUTES**

IB4.1 Where in the Tender Documents a Product is specified by trade name, manufacturer's name or catalogue reference, the Bidder shall be prepared to supply and install only such item unless a substitute is approved by an addendum in accordance with IB5.

IB4.2 Requests for approval of a substitute will not be considered unless received in writing by the Procurement Specialist in accordance with IB3.3 at least seven (7) calendar days prior to the Submission Deadline.

IB4.2.1 The deadline for the receipt of requests for approvals will remain at seven (7) calendar days prior to **Thursday, October 01, 2026** regardless of whether an extension of the Submission Deadline occurs. An extension of the

Submission Deadline will not result in an extension in the timeline for receipt of requests for approval of substitute.

IB4.3 A request for approval of a substitute must:

- .1 include two (2) sets of complete descriptive literature and performance data (complete with drawings, manufacturer's data, specifications, and other relevant information relating to the construction and performance of the item);
- .2 include information on construction projects where the proposed substitute has been used (complete with contact information for the owner and engineer of record for the project);
- .3 identify any and all changes required in the applicable Work, and all changes to any other Work, which would become necessary to accommodate the substitute;
- .4 identify any anticipated cost or time savings that may be associated with the substitute;
- .5 certify that, in the case of a request for approval as an approved equal, septdesign, be of equal or superior substance to that specified, is suited to the same use and capable of performing the same function as that specified and can be incorporated into the Work, strictly in accordance with the proposed work schedule;
- .6 certify that, in the case of a request for approval as an approved alternative, the substitute will adequately perform the functions called for by the general design, be similar in substance to that specified, is suited to the same use and capable of performing the same function as that specified and can be incorporated into the Work, strictly in accordance with the proposed work schedule.

IB4.4 No later claim by the Contractor for an addition to the Contract Price because of any changes in the Work necessitated by the use of an approved substitute will be considered.

IB4.5 The Procurement Specialist or designate, after assessing the request for approval of a substitute, may in their sole discretion grant approval for the use of a substitute as an "approved equal" or as an "approved alternative," or may refuse to grant approval of the substitute.

IB4.6 If the Procurement Specialist or designate approves a substitute as an “approved equal,” the approved equal may be used in place of the specified item.

IB4.7 If the Procurement Specialist or designate approves a substitute as an “approved alternative,” any Bidder bidding that approved alternative shall submit a base bid based upon the use of the specified item but may also indicate an alternative price based upon the approved alternative. Such alternative bids will be subject to any conditions or evaluations stipulated in the approval.

IB5. **ADDENDA**

IB5.1 The Procurement Specialist may, at any time before the Submission Deadline, issue addenda correcting errors, discrepancies or omissions in the Tender Documents, or clarifying the meaning or intent of any provision therein.

IB5.2 The Procurement Specialist may, at any time before the Submission Deadline, issue an addendum cancelling the invitation to Tender.

IB5.3 The Procurement Specialist may, at any time before the Submission Deadline originally specified on the Tender Documents cover page or amended by a prior addendum, issue an addendum extending the Submission Deadline.

IB5.4 Addenda will be issued in the form of written Addenda.

IB5.4.1 The City will make reasonable efforts to forward addenda to all registered recipients of the Tender Documents however the Bidder is responsible for ensuring that they have received and reviewed all addenda.

IB5.4.2 Addenda will be available on the City of Brandon Procurement Services internet site at <https://purchasing.brandon.ca/>. The Bidder is responsible for monitoring the City website ensuring that they have received and reviewed all addenda.

IB5.5 The Bidder shall acknowledge receipt of addenda on the Tender Form. Failure to acknowledge receipt of an addendum may render a Tender non-compliant.

IB6. TENDER SUBMISSION

IB6.1 The Tender Submission shall include the following:

- .1 Tender Form;
- .2 Bid Bond;
- .3 Consent of Surety or Agreement to Bond.

Tender Form

IB6.2 The Bidder shall submit their Tender on the original or unaltered copies of the Tender Form provided herein.

IB6.3 The Bidder shall complete the Tender Form, making all required entries.

IB6.3.1 All entries shall be made clearly by typing or printing legibly in ink in the spaces provided.

IB6.3.2 The Bidder shall initial and date each and every correction, change, erasure, adjustment or alteration they make on the Tender Form.

IB6.4 The Tender Form shall be completed in accordance with the following requirements:

- .1 if the Bidder is a sole proprietor carrying on business in their own name, their name shall be inserted;
- .2 if the Bidder is carrying on business under a name other than their own, the business name and the name of the owner of such business name shall be inserted;
- .3 if the Bidder is a partnership, the full name of the partnership shall be inserted;
- .4 if the Bidder is a corporation, the full name of the corporation shall be inserted.

IB6.4.1 If a Tender is submitted jointly by two or more persons, each and all such persons shall identify themselves in accordance with IB6.4 above.

IB6.5 The Tender Form shall be signed in accordance with the following requirements:

- .1 if the Bidder is a sole proprietor carrying on business in their own name, it shall be signed by the Bidder;

- .2 if the Bidder is carrying on business under a name other than their own, it shall be signed by the registered owner of the business name;
- .3 if the Bidder is a partnership, it shall be signed by the partner or partners who have authority to sign for the partnership;
- .4 if the Bidder is a corporation, it shall be signed by its duly authorized officer or officers and the corporate seal, if the corporation has one, shall be affixed.

IB6.5.1 The name and official capacity of each individual signing the Tender Form shall be printed below their signature.

IB6.6 The Bidder shall state a price for each item of the Work identified on the Tender Form.

IB6.6.1 Prices on the Tender Form shall be in Canadian currency. The Bidder must clearly identify any proposed alternative currency in their Tender Submission.

IB6.6.2 Prices on the Tender Form shall be in Canadian funds and shall be the total cost to the City of Brandon, including all duty, freight and cartage, Federal and Provincial taxes (Goods and Services Tax (GST) and Retail Sales Tax (RST) shall be shown as a separate amount where applicable) and all charges governmental or otherwise paid, and profit and all compensation which shall be due to the Contractor for the Work and all details necessarily connected with the completion of the Work and all risks and contingencies connected therewith.

IB6.7 The quantities listed on the Tender Form are to be considered approximate only. The City will use the quantities for the purpose of comparing Tenders.

IB6.8 The quantities for which payment will be made to the Contractor are to be determined by the Work successfully performed and completed by them, to be measured as specified in the applicable Specifications.

Bid Bond and Consent of Surety/Agreement to Bond

IB6.9 The Bidder shall provide:

- .1 a Bid Bond written on Canadian Construction Documents Committee Form CCDC 220 or similar form acceptable to the City in the amount of

ten percent (10%) of the Total Tender Amount and endorsed in the name of the City of Brandon as obligee.

- .2 a Consent of Surety or Agreement to Bond in a form acceptable to the City, stating that, if the Bidder is awarded the Contract, the Surety will provide a Performance Bond in the amount of fifty percent (50%) of the Contract Price and a Labour and Material Payment Bond in the amount of fifty percent (50%) of the Contract Price.

IB6.10 The Bid Bond and the Consent of Surety or Agreement to Bond shall be submitted in a digital format meeting the following criteria:

- .1 The version submitted by the Bidder must have valid digital signatures and seals.
- .2 The version submitted by the Bidder must be verifiable by the City with respect to the totality and wholeness of the bond form, including: the content; all digital signatures; all digital seals; with the surety company, or an approved verification service provider of the surety company.
- .3 The version submitted must be viewable, printable and storable in standard electronic file formats acceptable to the City, and in a single file. Allowable formats include pdf.
- .4 The verification may be conducted by the City immediately or at any time during the life of the bond and at the discretion of the City with no requirement for passwords or fees.
- .5 The results of the verification must provide a clear, immediate and printable indication of pass or fail regarding IB6.10.1.

IB6.11 Bonds failing the verification process will not be considered to be valid and the Tender Submission shall be determined to be non-responsive in accordance with IB13.1.1.

IB6.12 Bonds passing the verification process will be treated as original and authentic.

IB6.13 Further information regarding e-bonding can be referenced on the Surety Association of Canada website at the following link:
<https://suretycanada.com/SAC/Surety-Bonds/E-Bonding.aspx>.

IB6.14 The Bid Bond and the Consent of Surety or Agreement to Bond shall be issued by the same surety or bonding company licensed to conduct the

business of a surety in the Province of Manitoba. Each document shall incorporate by reference the Contract and be signed by both the Contractor and the Surety, and the Surety shall affix its corporate seal on each document.

- IB6.15 The Bid Bond and the Consent of Surety or Agreement to Bond of all Bidders will be released when a Contract for the Work has been duly executed by the successful Bidder and the performance security furnished as provided herein.

IB7. SUBMISSION OF TENDERS

Submission Deadline

- IB7.1 The Bidder shall submit their Tender Submission before the Submission Deadline specified on the Tender Documents cover page, or subsequently specified by addendum.
- IB7.2 Tenders determined by the City to have been received after the Submission Deadline will not be accepted.
- IB7.3 The Bidder shall submit their Tender Submission by online bidding platform delivery (e-submission).

Online Bidding Platform Delivery (E-submission)

- IB7.4 The Bidder shall submit their Tender Submission via the City's online bidding platform by the "Submit Online Bid" link for the Tender opportunity on the City's Purchasing & Tenders website: <https://purchasing.brandon.ca>.
- IB7.5 The procedure for submitting an electronic Tender Submission can be viewed on the City's Purchasing & Tenders website or by clicking [here](#). Failure to follow the procedure as indicated may result in a Tender Submission not being received. Any failure or delay in the transmission or storage of an electronic Tender Submission is the sole responsibility of the Bidder and not of the City.
- IB7.6 The City will ONLY accept electronic Tender Submissions uploaded to the City's online bidding platform as a bona fide Tender. Electronic Tender Submissions sent via e-mail will **not** be accepted. If a Bidder encounters issues uploading an electronic Tender Submission, contact the City's Procurement Services Department at 204-729-2251.

- IB7.7 A Tender Submission will only be considered to have been submitted once it has been received by the City in the online bidding platform. The time the electronic Tender Submission is received by the City, will be determined by the City's server time, which is linked to National Institute of Standards & Technology time. Bidders are advised the time the electronic Bid Submission is received is based on when the Bid Submission is received by the City's server.
- IB7.8 A confirmation webpage will display advising the Tender Submission was submitted successfully and a confirmation email will be sent. Bidders should not consider their Tender Submission to have been submitted if the confirmation webpage does not display and a confirmation email is not received.
- IB7.9 Bid Submissions received via the online bidding platform are held securely and are inaccessible by Procurement Services staff until after the stipulated closing date and time.
- IB7.10 The Tender Submission must be received by the City before the stipulated closing time. Late Tender Submissions will be automatically rejected by the online bidding platform.
- IB7.11 The Bidder must submit a Bid Bond and Consent of Surety in digital format in accordance with IB6.10.

IB8. CHANGES TO A TENDER

- IB8.1 The City will not accept revisions to, amendments to, or requests to change or correct a submitted Tender. A Bidder who wants to make an adjustment to their Tender prior to the Submission Deadline shall supersede their previous Tender with another complete Tender including a Bid Bond and a Consent of Surety or Agreement to Bond.
- IB8.2 If the Bidder delivers more than one Tender, each Tender delivered in accordance with these Instructions to Bidders and received by the City prior to the Submission Deadline shall be deemed to have been submitted in the chronological order received, and each such Tender delivered by the same Bidder shall be considered to supersede and replace, in its entirety, any and all previous Tenders submitted by the same Bidder.

IB9. WITHDRAWAL OF A TENDER

- IB9.1 A Bidder may withdraw their Tender without penalty by giving notice to the Procurement Specialist in accordance with IB3.3 at any time before the Submission Deadline.
- IB9.2 The time and date of receipt of any notice withdrawing a Tender shall be the time and date of receipt as determined by the City.
- IB9.3 A written notice withdrawing a Tender shall be signed by the person(s) whose signature(s) appear on the Tender Form of the Tender Submission.
- IB9.4 The City shall retain the Tender until after the Submission Deadline and open the Tender to verify that the name and signature of the person requesting the Tender be withdrawn is the same as the name and signature of any of those appearing on the Tender. If the name and signature are the same, the City will declare the Tender withdrawn.
- IB9.5 Requests made orally in person or by telephone to withdraw a Tender will not be considered.

IB10. IRREVOCABLE OFFER

- IB10.1 The Tender(s) submitted by the Bidder shall be irrevocable for the time period specified on the Tender Form.
- IB10.2 If a Tender is submitted jointly by two or more persons, the word "Bidder" shall mean each and all such persons, and the undertakings, covenants and obligations of such joint Bidders in the Tender and the Contract, when awarded, shall be both joint and several.
- IB10.3 The acceptance by the City of any Tender shall not release the Tenders of the other Bidders and these Bidders shall be bound by their offers on such Work for the time period specified in on the Tender Form.
- IB10.4 A Bidder who withdraws their Tender after the Submission Deadline but before their offer has been released or has lapsed shall be liable for such damages as are imposed upon the Bidder by law and subject to such sanctions as the City considers appropriate in the circumstances. The City, in such if, shall be entitled to all rights and remedies available to it at law.

IB11. OPENING OF TENDERS

- IB11.1 Tenders will be opened and read publicly in the City of Brandon, Council Chambers, City Hall, 410 – 9th Street, Brandon, Manitoba at 2:30 p.m. local Brandon time on the day of the Submission Deadline.
- IB11.2 The amount read aloud in connection with each Tender as the Total Tender Amount is unverified and shall not constitute the Total Tender Amount, but is subject to review, verification and adjustment, by the City in accordance with the Tender Documents.

IB12. INTERVIEWS, CLARIFICATIONS AND ADDITIONAL INFORMATION

- IB12.1 The City shall have the right to interview any Bidder and/or request clarifications and additional information from any Bidder.
- IB12.2 The Bidder shall submit, upon request by the Procurement Specialist or designate, proof satisfactory to the City that the Bidder and/or any proposed Subcontractor (for the portion of the Work proposed to be subcontracted to them):
- .1 are in good standing under The Corporations Act, C.C.S.M. c. C225, or properly registered under The Business Names Registration Act, C.C.S.M. c. B110, or otherwise properly registered, licensed or permitted by law to carry on business in Manitoba, or if the Bidder does not carry on business in Manitoba, in the jurisdiction where the Bidder does carry on business; and
 - .2 are financially capable of carrying out the terms of the Contract; and
 - .3 have successfully carried out work similar in nature, scope and value to the Work; and
 - .4 are fully capable of performing the Work required to be in strict accordance with the terms of the Contract.
- IB12.3 The Bidder shall submit, upon request by the Procurement Specialist or designate, proof satisfactory to the City that any proposed Goods meet the requirements of the Specifications.
- IB12.4 The Bidder shall provide, on the request of the Procurement Specialist or designate, access to the Bidder's equipment and facilities to confirm to the

City's satisfaction that the Bidder's equipment and facilities are adequate to perform the Work.

IB13. EVALUATION OF TENDERS

- IB13.1 The award of this Contract shall be based on:
- .1 compliance by the Bidder with the requirements of the Tender (pass/fail);
 - .2 Total Tender Amount
- IB13.2 The City shall have the right to determine whether or not any or all parts of any Tender is substantially compliant with the requirements of the Tender Documents.
- IB13.3 The City may, at its sole discretion, determine that all or any part of any Tender is not substantially compliant with the requirements of the Tender Documents if the Tender Submission is incomplete, obscure, conditional, or contains material alterations or other irregularities, or if the Tender contains material deficiencies.
- IB13.4 The City may, at its sole discretion, waive technical deficiencies and minor non-compliances in any Tender it determines to be substantially compliant with the requirements of the Tender Documents.
- IB13.5 The City shall have the right to reject any or all parts of any Tender that it has determined is not substantially compliant with the requirements of the Tender Documents.

IB14. AWARD OF CONTRACT

- IB14.1 The City will give notice of the award of the Contract or will give notice that no award will be made.
- IB14.2 The City shall have no obligation to award a Contract to a Bidder, even though one or all of the Bidders are determined to be responsible and qualified, and their Tenders are determined to be compliant.
- IB14.2.1 Without limiting the generality of IB14.2, the City shall have no obligation to award a Contract if:
- .1 the prices exceed the available funds for the Work;

- .2 the prices are materially in excess of the prices received for similar work in the past;
- .3 the prices are materially in excess of the City's cost to perform the Work, or a significant portion thereof, with its own forces;
- .4 only one Tender is received; or
- .5 in the judgment of the City, the interests of the City would best be served by not awarding a Contract.

IB14.3 If an award of Contract is made by the City, the award will be made to the responsible and qualified Bidder submitting the lowest compliant Tender as determined in accordance with IB13.

IB15. CONTRACT DOCUMENTS

IB15.1 The City will prepare and issue Contract Documents to the successful Bidder.

IB15.2 The successful Bidder shall execute and return the Contract Documents in the manner and within the time stipulated by the City.

IB15.3 If the successful Bidder does not execute and return the Contract Documents as instructed, the Bidder may be deemed by the City to be in default of their obligations under the Tender Documents, whereupon the acceptance of the Tender by the City shall be null and void, and the City shall be entitled to all rights and remedies available at law.

IB16. CONFLICT OF INTEREST

IB16.1 By responding to this Tender, Bidders declare that no Conflict of Interest exists, or is reasonably expected to exist in the future.

IB16.2 Conflict of Interest means any situation or circumstance where a Bidder or employee of the Bidder proposed for the Work has:

- .1 other commitments;
- .2 relationships;
- .3 financial interests; or
- .4 involvement in ongoing litigation;

that could or would be seen to:

- (i) exercise an improper influence over the objective, unbiased and impartial exercise of the independent judgment of the City with respect to the evaluation of Tenders or award of the Contract; or
 - (ii) compromise, impair or be incompatible with the effective performance of a Bidder's obligations under the Contract;
- .5 contractual or other obligations to the City that could or would be seen to have been compromised or impaired as a result of its participation in the Tender process or the Work; or
- .6 knowledge of confidential information (other than confidential information disclosed by the City in the normal course of the Tender process) of strategic and/or material relevance to the Tender process or to the Work that is not available to other Bidders and that could or would be seen to give that Bidder an unfair competitive advantage.

IB16.3 For the purposes of this Tender, Conflict of Interest also includes, but is not limited to, any situation or circumstance where:

- IB16.3.1 in relation to the Tender Submission, the Bidder has an unfair advantage or engages in conduct, directly or indirectly, that may give it an unfair advantage, including but not limited to:
- .1 having, or having access to, confidential information of the City in the preparation of its Tender Submission that is not available to other Bidders;
 - .2 communicating with any person with a view to influencing preferred treatment in the Tender process, including but not limited to the lobbying of decision makers involved in the Tender process; or
 - .3 engaging in conduct that compromises, or could be seen to compromise, the integrity of the open and competitive Tender process or render that process non-competitive or unfair; or
- IB16.3.2 In relation to the performance of its contractual obligations under a Contract for the Work, the Bidder's other commitments, relationships or financial interests
- .1 could, or could be seen to, exercise an improper influence over the objective, unbiased and impartial exercise of its independent judgement; or

- .2 could, or could be seen to, compromise, impair or be incompatible with the effective performance of its contractual obligations.

IB16.4 In connection with its Tender Submission, the Bidder or employee of the Bidder shall:

- .1 avoid any perceived, potential or actual Conflict of Interest in relation to the tendering period and Work if awarded;
- .2 upon discovering any perceived, potential or actual Conflict of Interest at any time during the tendering period, promptly disclose a detailed description of the Conflict of Interest to the City in a written statement to the Procurement Specialist;
- .3 provide the City with the proposed means to avoid or mitigate, to the greatest extent practicable, any perceived, potential, or actual Conflict of Interest and shall submit any additional information to the City that the City considers necessary to properly assess the perceived, potential or actual Conflict of Interest; and
- .4 comply with any requirements prescribed by the City to resolve any Conflict of Interest during the tendering period, or following the project award.

IB16.5 The City may, at its sole discretion, waive any and all perceived, potential or actual Conflicts of Interest. The City's waiver may be based upon compliance to the City's requirements to resolve said Conflict of Interest.

IB16.6 The City may disqualify a Bidder where any conduct, circumstance, situation, relationship or association is determined by the City, in its sole discretion, to constitute a perceived, potential or actual Conflict of Interest and:

- .1 the Bidder has failed to disclose the Conflict of Interest;
- .2 the Bidder or its employees or subcontractors fails to comply with any requirements prescribed by the City to resolve a Conflict of Interest; or
- .3 the City determines, in its sole discretion, that the Conflict of Interest cannot be resolved.

IB16.7 The final determination of whether a perceived, potential or actual Conflict of Interest exists shall be made by the City, in its sole discretion.

THE CITY OF BRANDON
ENGINEERING DEPARTMENT

TENDER FORM

Contract Title: **Sawatzky Sculpture Park Spur Paths**

To: The Procurement Specialist, City of Brandon

I/We _____
(name of Bidder)

the undersigned, hereby offer to furnish, execute and complete in a satisfactory and skillful manner, in accordance with the Tender Documents, all the Work required for the above Contract for the consideration of the Unit Prices set forth in the Unit Price Schedule, attached hereto.

I/We understand that the description of the Work in this Tender Form is in short form and the Work included in each item is as described in the Tender Documents which shall be deemed, in their entirety, to form a part of this Tender notwithstanding that not all parts thereof are necessarily attached to or accompany this Tender Form.

I/We further agree that, if awarded the Contract, we will commence the Work as specified and achieve Final Completion of the Work on or before **November 30, 2026**.

I/We further agree our Tender as provided herein shall remain binding and irrevocable for a period of sixty (60) calendar days following the Submission Deadline.

I/We further agree to enter into a written Agreement, of the form and content attached hereto, for the execution of the Work, if required to do so within a period of sixty (60) calendar days following the Submission Deadline.

Accompanying this Tender are a Bid Bond, payable to the City of Brandon in the amount of ten percent (10%) of the Total Tender Amount, and a Consent of Surety or Agreement to Bond.

I/We further agree that if I/We fail or decline to enter into a written Agreement in accordance with the terms of the Tender Documents, the City shall be entitled to all rights and remedies available to it at law, including the right to retain our Bid Bond as liquidated damages and not as a penalty.

I/We further agree that the City has the right to reject any or all Tenders, to waive any and all informalities, or to accept any Tender that it considers is in the best interest of the City.

UNIT PRICE SCHEDULE

This is a Unit Price Tender and, if there is any discrepancy between the Unit Prices and the extended amounts, the Unit Prices shall be considered as representing the intention of the Bidder. Separate prices shall be submitted for each item set forth on the Unit Price Schedule. The quantities shown in the Unit Price Schedule are estimates only and have been listed for the purpose of comparing Tenders on a uniform basis. The final quantities may be considerably greater or considerably less than these quantities. No variation in the quantities actually executed shall give rise to any claim against the City.

Alternate Prices

The amount is to be added to or deducted from the Base Bid price (as entered on the Tender Form) and is entered for each Alternate requested. All Alternate Prices shall exclude both Retail Sales Tax and Goods and Services Tax (if applicable) but shall include all other applicable taxes, costs, overhead and profit.

The Bidder acknowledges and agrees that:

1. The City may accept any of the Alternates and corresponding Alternate prices in any order or combination, including all or none;
2. Alternate prices will be considered in determining the lowest bid;
3. Alternates and Alternate prices are open for acceptance by the City for the same period of time as the Base Bid price;
4. The Work of the Contract and the Contract Price will reflect the Alternates and Alternate prices, if any, accepted by the City at the time of the contract award; and
5. Acceptance of any Alternates will not affect the project completion time, unless the City has specifically indicated an increase or decrease in time, in number of days, on account of a particular Alternate.

Alternate for Boulder Retaining Wall

Substitute Proposed Granite Blast Rock Boulders for Alternate Natural Stone for Retaining Wall

Class of Labour, Plant and Material	Unit of Measurement	Estimated Quantity	Unit Price \$0.00	Extension \$0.00
Product Alternate:				
Material: _____	lin.m	120	_____	_____
Source: _____				

Provide an Alternate Price to substitute another proposed natural stone for the specified granite blast-rock boulders in the Boulder Retaining Wall. Alternate Product and Source, if selected, will supersede Item #7 in the Unit Prices.

The proposed alternate stone shall:

1. Be hard, durable and suitable for permanent exterior retaining-wall construction;
2. Be free from cracks, seams, excessive weathering and other defects that could affect durability or stability;
3. Be sized to satisfy the dimensions and maximum boulder size shown on the Drawings;
4. Permit stable placement and reasonably tight fitting between adjacent stones;
5. Provide a generally consistent and visually suitable finished appearance;
6. Satisfy the retaining-wall grades, elevations and configuration shown on the Drawings; and
7. Be subject to the Engineer's review and acceptance before delivery to the Site.

I/We hereby acknowledge receipt of the following Addenda to the Tender Documents:

CONTRACT DOCUMENTS

AGREEMENT

THIS AGREEMENT, which is made in duplicate,

this _____ day of _____, 2026 a.d. by and between:

(hereinafter called the Contractor)

and

THE CITY OF BRANDON

(hereinafter called the City)

WITNESSETH THAT; whereas the Contractor has represented to the City that they are skilled in the performance of the Work described in the Contract Documents, and will be able to perform the same in accordance therewith;

NOW THEREFORE; The Contractor and the City undertake and agree that;

THE WORK

The Contractor will;

- a) provide all the materials, unless otherwise indicated, perform all of the Work, finish in a good and skillful manner and fulfil all the obligations called for by the Contract Documents for the following Work:

Sawatzky Sculpture Park Spur Paths

which have been executed in duplicate by both parties and which were prepared by the City Engineer of the City of Brandon acting as and referred to as the Engineer;

- b) perform such additional Work, under the terms of this Contract, which may be ordered by the Engineer;

- c) achieve Final Completion of the Work of this Contract as certified by the Engineer by **November 30, 2026**;
- d) pay to the City as liquidated damages and not as penalty, the sum of \$1,000.00 (One Thousand Dollars) for each calendar day past the above stated date of Final Completion of the Work that Final Completion of the Work has not been achieved;
- e) maintain the Work against any and all defects or deficiencies that may arise during the warranty period.

CONTRACT PRICE

The Contract Price is \$ _____ GST inclusive in Canadian funds, which price shall be subject to adjustments as may be determined in accordance with the Contract.

PAYMENT

Subject to holdbacks in accordance with the Contract, the City will:

- a) pay the Contractor in lawful tender of Canada, for the specified materials and services, the amount that is stipulated above subject to such additions and deductions provided for in the Contract Documents.
- b) make payments on the basis of the Engineer's Certificates, in accordance with the Contract.
- c) upon Substantial Performance of the Work, as certified by the Engineer, pay to the Contractor any unpaid balance of hold back monies then due.
- d) when all the Work under the Contract has been performed and Final Completion of the Work has been certified by the Engineer, pay to the Contractor any unpaid balance of the Contract Price then due.

CONTRACT DOCUMENTS

The following documents for

Sawatzky Sculpture Park Spur Paths

together with this Agreement, constitute the Contract and include:

Unit Price Schedule;
General Conditions;
Supplemental Conditions;
Specifications;
Addenda;

GENERAL CONDITIONS

GC1. DEFINITIONS

- GC1.1 Where used in these *General Conditions* and in the other documents forming part of the Tender Documents and the Contract Documents:
- .1 “Agreement” means the portion of the Contract Documents by that name.
 - .2 “Bidder” means any person submitting a Tender for the Work.
 - .3 “Instructions to Bidders” means the portion of the Tender Documents by that name which sets out the terms and conditions governing the tendering process.
 - .4 “Business Day” means any day, other than a Saturday, Sunday, or a statutory or civic holiday as observed by the City.
 - .5 “Change in Work” means an addition, deletion or modification to the Contract as awarded and includes modifications to the quantity or nature of Work, the manner of performance of any part of the Work, price, time or schedule.
 - .6 “Change Order” means a written order issued by the City that sets out a Change in Work.
 - .7 “City” means the City of Brandon of the Province of Manitoba as continued under The Brandon Charter, SM 1989-90, c. 71, and any subsequent amendments thereto.
 - .8 “City Manager” means the City Manager of the City of Brandon as appointed by the Council of the City of Brandon, or their designate.
 - .9 “Contract” means the obligations and rights of the City and the Contractor as set forth in the Contract Documents.
 - .10 “Contract Documents” means the combined documents consisting of the executed Agreement between the City and the Contractor, these General Conditions of the Contract, the Supplemental Conditions, the Specifications, the Drawings, all Addenda, the Performance Bond, the Labour and Material Payment Bond, The City of Brandon Construction Vehicles & Equipment Rentals Firm Price Listing, and any other document referred to in, or connected with such formal Agreement as may be authorized by the City. It shall also include all modifications and

amendments thereto incorporated in the Contract Documents before the execution of the Agreement, and subsequent amendments thereto made pursuant to the provisions of the Contract and agreed upon between the parties, and all the Contractor's Specifications and Contractor's Drawings, if approved and signed by the Engineer.

- .11 "Contract Price" means the total of the products of the Contract Unit Prices and their respective quantities plus any lump sum items included in the Agreement.
- .12 "Contract Time" means the time stipulated in the Contract Documents for the performance of the Work from commencement to Final Completion.
- .13 "Contract Unit Price" means any amount set forth in the Unit Price Schedule in the Agreement, and as described in the Specifications for the performance of an item of Work.
- .14 "Contractor" means the person who has undertaken the performance of the Work under the terms of the Contract.
- .15 "Contractor's Specifications and Contractor's Drawings" means all drawings, diagrams, illustrations, schedules, performance charts, brochures and other data that are prepared or provided by the Contractor, Subcontractor, or Supplier and that illustrate some portion of the Work.
- .16 "Drawings" means the portion of the Contract Documents by that name which illustrates the physical or functional characteristics of the Work, or any part thereof.
- .17 "Engineer" means the City Engineer of the City of Brandon and includes any person duly authorized to perform on their behalf any of these functions under the Contract.
- .18 "Final Completion of the Work" means that the entire Work, except those items arising from the provisions of GC20 Warranty, have been performed in accordance with the Contract.
- .19 "Goods" means any tangible personal property to be supplied as a deliverable under the Contract whether by purchase, hire, hire-purchase or otherwise, but does not include the Contractor's tools and equipment, or incidental materials or supplies expended in the course of the Work.

- .20 "Materials" means any information, data, research, documents, photographic images, computer programs (and related object and source codes and electronic files) and any other intellectual property whether disclosed to the Contractor by the City or otherwise produced or developed by the Contractor specifically for the Work.
- .21 "Other Contractor" means any person employed by or having a contract directly or indirectly with the City otherwise than through the Contractor, or is employed by or having a contract with a third party having the City's permission to do work on City owned property.
- .22 "Plant" means all material and/or equipment and/or items brought to or constructed upon the Site by the Contractor for the performance of the Work, but does not include material, equipment or other items that are to form part of the permanent Work.
- .23 "Prime Contractor" means the prime contractor as defined in The Workplace Safety and Health Act, C.C.S.M. c. W210.
- .24 "Procurement Specialist" means the Procurement Specialist of the City of Brandon Procurement Services and includes any person duly authorized by them to perform on their behalf any of their functions under the Contract.
- .25 "Products" means any tangible or intangible personal property to be supplied by the Contractor as a deliverable under the Contract whether by purchase, hire, hire-purchase, licence or otherwise.
- .26 "Site" means lands, buildings or other places owned, occupied or used by the City and designated by the City for the delivery and/or installation of Products, or the provision of Services.
- .27 "Specifications" means the portion of the Contract Documents by that name which sets out the written description of the physical or functional characteristics of the Work, or any part thereof.
- .28 "Street" means any public highway as defined in The Municipal Act, C.C.S.M. c. M225.
- .29 "Subcontractor" means a person having a contract with the Contractor or another Subcontractor of the Contractor for the execution of a part or parts of the Work or who furnishes material called for in the Contract Documents.

- .30 "Submission Deadline" means the time and date set out in the Tender Documents for final receipt of Tenders.
- .31 "Substantial Performance of the Work" shall have the meaning attributed to it in The Builders' Liens Act, C.C.S.M. c. B91, or if the Act is not applicable, shall mean when the Work is substantially complete and ready for use, or is being used for the purpose intended.
- .32 "Supplemental Conditions" means the portion of the Contract Documents by that name which sets out terms and conditions specific to the Contract, and supplements or modifies the General Conditions.
- .33 "Tender" means the offer contained in the Tender Submission.
- .34 "Tender Documents" means the Instructions to Bidders, the Tender Form, the Contract Documents and all addenda.
- .35 "Tender Form" means the portion of the Tender Documents by that name.
- .36 "Tender Submission" means that portion of the Tender Documents and other items that must be completed or provided by the Bidder and delivered to the City by the Submission Deadline to constitute a compliant Tender.
- .37 "The City of Brandon Construction Vehicles & Equipment Rentals Firm Price Listing" means the document of that name which is available for viewing at the City of Brandon Finance Department, Main Floor 410-9th Street, Brandon, MB.
- .38 "Work" means the carrying out and the doing of all things, whether of a temporary or permanent nature, that are to be done by the Contractor pursuant to the Contract and includes the furnishing of all labour, superintendence, services, transportation, materials, Plant, equipment and articles necessary or incidental to the proper performance of the Contract.
- .39 "Working Day" means any calendar day, (one midnight to the following midnight), other than a Sunday or a Statutory or Civic Holiday, on which, in the opinion of the Engineer, atmospheric and/or Site conditions are such that the Contractor is able to work at least four (4) hours during the period between 7:00 a.m. Brandon time or the time the Contractor's operations normally commence, whichever is the earlier, and 7:00 p.m. Brandon time. A Sunday or Statutory Holiday will be considered a

Working Day if the Contractor elects to perform any Work that, in the opinion of the Engineer, requires the attendance of the Engineer.

GC1.2 Where used in these General Conditions and in the other documents forming part of the Tender Documents and the Contract Documents:

- .1 “person” includes a natural person, or an artificial person including a partnership, corporation, joint venture, consortium, association, or any combination thereof,
- .2 “shall” and “must” are imperative and “may” is permissive and empowering;
- .3 the commonly understood name of a country, place, person, entity or thing has the same meaning as any formal or extended designation;
- .4 words in the singular include the plural, and words in the plural include the singular;
- .5 gender-specific terms include all genders and the neuter;
- .6 a reference to a statute, by-law or regulation is a reference to the statute, by-law or regulation as amended;
- .7 a reference to a statute, by-law or regulation that has been repealed and replaced is, with respect to a later transaction, matter or thing, a reference to the provisions of the new statute, by-law or regulation that relate to the same subject-matter as the former statute, by-law or regulation.

GC2. INTERPRETATION

GC2.1 The Contract has been entered into in the Province of Manitoba and shall be governed by and construed and enforced in accordance with the laws of the Province of Manitoba.

GC2.2 If any of the provisions of the Contract are found by a court of competent jurisdiction to be null or void, the remainder of the Contract shall continue in full force and effect provided that the substantive intent of the Contract is not thereby compromised.

GC2.3 The City and the Contractor acknowledge and agree that the Contractor is an independent contractor and neither the Contractor, nor any officer, servant or

agent of the Contractor shall be deemed to be an employee, agent, representative or servant of the City.

GC2.4 If the Contractor as defined herein consists of more than one person, their liability to perform the covenants herein contained to be performed by the Contractor shall be joint and several.

GC2.5 No acceptance of Work, payment of money, or failure on the part of the City to enforce compliance by the Contractor with any term of this Contract, nor any act or omission of the City or of any officer or employee of the City, shall be taken as a waiver of any of the provisions of this Contract, it being understood that any provision hereof may only be waived by express waiver in writing authorized by the proper officers of the City. No express waiver of any provision of this Contract shall impliedly waive any other provision of this Contract.

GC2.6 It is intended in all matters herein that both the City and the Contractor shall act promptly.

GC3. SUCCESSORS AND ASSIGNS

GC3.1 The Contract shall enure to the benefit of and be binding on the respective heirs, executors, administrators, and successors and permitted assigns of the City and the Contractor.

GC3.2 The Contractor shall not assign the Contract, either in whole or in part, without the written consent of the City. The Contractor shall not assign any monies due to him hereunder, except to a bank or financial institution acceptable to the City.

GC3.3 The Contractor shall not be relieved of any liabilities or obligations relating to the Contract because of the consent of the City to any assignment. The Contractor shall have the same responsibilities as though no assignment had been made.

GC4. NOTICES

GC4.1 All notices, requests, orders, decisions, consents, approvals, statements, authorizations, documents or other communications required or permitted to

be given under the Contract shall be in writing and shall be delivered by hand, by mail or by facsimile transmission (fax).

- GC4.1.1 In the event of a postal dispute or threat of a postal dispute, all notices required to be given hereunder shall be personally delivered or forwarded by facsimile.
- GC4.2 All notices, requests, orders, decisions, consents, approvals, statements, authorizations, documents or other communications to the City, except as expressly otherwise required elsewhere in the Contract Documents, shall be delivered or sent to the attention of the Engineer at the address or facsimile number identified in the Agreement.
- GC4.3 All notices, requests, orders, decisions, consents, approvals, statements, authorizations, documents or other communications to the Contractor, except as expressly otherwise required elsewhere in the Contract Documents, shall be delivered or sent to the address or facsimile number identified in the Agreement or delivered by hand to the Contractor's superintendent at the Site.
- GC4.4 Either party may, by giving notice, designate another address or addresses at which it will accept delivery of notices, requests, orders, decisions, consents, approvals, statements, authorizations, documents or other communications.
- GC4.5 Any notices, requests, orders, decisions, consents, approvals, statements, authorizations, documents or other communications given as provided herein shall:
- .1 if delivered by hand, be deemed to have been received on the day of receipt;
 - .2 if forwarded by mail, be deemed to have been received on the earlier of the day it was received or the second Business Day on which mail is delivered by Canada Post following the date of mailing;
 - .3 if forwarded by facsimile transmission, be deemed to have been received on the day of transmission, if a Business Day, or if not a Business Day, on the first Business Day following the day of transmission.

GC5. CONTRACTOR DECLARATION

- GC5.1 The Contractor declares that in bidding for the Work and in entering into the Contract, they have investigated for themselves the Site, the character of the Work to be done and all conditions including the location of any utility that can be determined from the records or other information available at the offices of any public authority or person, including a municipal corporation and any board or commission thereof, having jurisdiction or control over the utility, that might affect their Tender or their performance of the Work, or that, not having so investigated, they willingly assume all risk for conditions now existing or arising in the course of the Work that could have been determined through such investigation.
- GC5.2 The Contractor declares that in bidding for the Work and in entering into the Contract, they did not and do not rely upon information furnished by the City or any of its servants or agents respecting the character or nature of the surface and subsurface conditions at the Site, or the location, character, quality or quantity of the materials to be removed, or to be employed in the construction of the Work, or the character of the Plant needed to perform the Work or the general and local conditions and shall verify all matters concerning access to the Site, power supplied, location of existing services, utilities, materials necessary for the completion of the Work and all other matters that could in any way affect the performance of the Work under the Contract other than information furnished in writing for or in connection with the Tender or the Contract by the Procurement Specialist or by the Engineer.
- GC5.3 The Contractor declares that in bidding for the Work and in entering into the Contract, they do so in good faith and:
- .1 that to the best of their knowledge, there are no potential conflicts of interest pursuant to:
 - .1 The Municipal Act, C.C.S.M. c. M225;
 - .2 The Municipal Council Conflict of Interest Act, C.C.S.M. c. M255; or
 - .3 the City of Brandon City Council Code of Conduct;
 - .2 that to the best of their knowledge, no officer or employee of the City has any direct or indirect pecuniary interest in the Contract that has not been disclosed to and approved by the authority having jurisdiction;
 - .3 they have not participated in any collusive scheme or combine;

and shall forfeit all claims under the Contract as well as refund to the City any monies paid to them, beyond their actual proven expenses for Work done, if GC5.3.1 or GC5.3.2 are shown to be false.

- GC5.4 The Contractor declares that, in submitting a Tender for the Work and in entering into the Contract, they have been given an opportunity to obtain independent legal and other professional advice in connection with the Tender and the Contract.

GC6. CONTRACT DOCUMENTS

- GC6.1 The Contract Documents shall constitute the entire agreement between the City and the Contractor. There are no representations, warranties, covenants or agreements other than those contained in the Contract Documents.
- GC6.2 The Contract Documents are complementary and what is called for by any one shall be binding as if called for by all.
- GC6.3 Headings and titles in the Contract Documents are inserted for convenience only and shall not be considered in any construction or interpretation of the Contract.
- GC6.4 The City will provide the Contractor, without charge, sufficient copies of the Contract Documents to perform the Work, to a maximum of five (5) copies unless otherwise stated in the document.
- GC6.5 The Contract Documents are the property of the City, and shall not be copied, reproduced or revised in any manner, or used in any other work without the written authorization of the City. Any copies of the Contract Documents and any information media furnished by the City shall not be reused and, with the exception of the one set of executed Contract Documents, shall be returned to the City upon Final Completion of the Work.

GC7. INCONSISTENCIES

- GC7.1 The City shall have the right at any time to correct errors or omissions in the Contract Documents or to issue additional Drawings and Specifications at any time to further detail or explain the Work, all without in any way affecting or vitiating the Contract.
- GC7.2 If there is a conflict within the Contract Documents:

- .1 the order of priority of documents, from highest to lowest, shall be:
 - .1 the Agreement between the City and the Contractor;
 - .2 the Supplemental Conditions;
 - .3 the General Conditions;
 - .4 Division 01 of the Specifications;
 - .5 the remainder of the Specifications;
 - .6 the Drawings.
 - .2 Drawings of larger scale shall govern over those of smaller scale of the same date.
 - .3 dimensions shown on Drawings shall govern over dimensions scaled from Drawings.
 - .4 later dated documents shall govern over earlier documents of the same type.
- GC7.3 In the case of an obvious clerical error, the interpretation most consistent with the Contract as a whole will be accepted.
- GC7.4 The Contractor shall not be responsible for verifying that the Contract Documents are in compliance with the applicable laws, ordinances, rules, regulations, codes and orders relating to the Work. If the Contractor has knowledge that the Contract Documents are at variance therewith, or if the Contract Documents or any part thereof appear indefinite, not clear, contradictory, contain errors or omissions the Contractor shall, prior to proceeding with the Work, promptly refer such part or parts to the Engineer for interpretation and/or clarification.

GC8. SITE

Site Conditions

- GC8.1 Although the Drawings may indicate the location of existing surface and underground works and services, the City does not warrant the completeness or accuracy of the information or assume responsibility for discrepancies between the Drawings and the actual locations of the works and services.
- GC8.2 The Contractor shall promptly refer any substantial difference in the character or nature of the surface or subsurface conditions at the Site, or the location, character, quality or quantity of the materials to be removed than the conditions set out in the Contract Documents or other information furnished in

writing for or in connection with the Contract by the Engineer for resolution in the manner prescribed in GC16 Change in Work.

Use of the Site

- GC8.3 The Contractor shall not be entitled to exclusive possession of the Site. The City shall have the right, for itself, its agents, representatives and Other Contractors, to occupy any portion of the Site or the Work, at any time and for so long a time as the Engineer may by notice to the Contractor require, provided such entry, occupation and use does not prevent or otherwise interfere with the Contractor's performance of the Work. Such entry, occupation and use shall not be considered to be an acceptance of the Work by the City nor shall it relieve the Contractor of their duty to complete the Work.

GC9. INDEMNIFICATION

- GC9.1 The Contractor shall indemnify and save harmless the City, its officers, agents, servants and employees, from and against all costs, damages, losses or expenses arising from actions, suits, claims, demands and proceedings, by whomsoever brought, made or taken as a result of an act or omission of the Contractor, their Subcontractor(s), and their employees or agents in the performance or purported performance of the Work, and more particularly from:
- .1 accidental injury to or death of any person whether retained by or in the employ of the Contractor or not, arising directly or indirectly by reason of the performance of the Work, or by reason of any trespass on or damage to property;
 - .2 damage to any property owned in whole or in part by the City, or that the City by duty or custom is obliged, directly or indirectly, in any way or to any degree, to construct, repair or maintain;
 - .3 damage to, or trespass or encroachment upon, property owned by persons other than the City;
 - .4 failure to promptly secure a discharge of a claim for lien served upon the City pursuant to The Builders' Liens Act;
 - .5 failure to pay a Workers Compensation assessment, or federal or provincial taxes;

- .6 unauthorized use of any design, device, material or process covered by letters patent, copyright, trademark or trade name in connection with the Work;
 - .7 inaccuracies in any information provided to the City by the Contractor.
- GC9.2 The Contractor shall be responsible for all such claims except such claims in which the injury or damage are solely a result of an act or omission of the City.
- GC9.3 If the City or the Contractor is served with a claim or notice, the party so served shall immediately inform the other party with notice in the manner provided herein.
- GC9.4 The City shall have the right, acting reasonably and upon notice to the Contractor, to settle any such action, proceeding, claim or demand and charge the Contractor with the amount so paid or to be paid in effecting a settlement.
- GC9.5 The Contractor shall pay to the City the value of all legal fees and disbursements required to settle any such claim or to defend the City against any such claim, action, proceeding, claim or demand.
- GC9.6 If the Contractor fails to make any payment required to be made to the City pursuant to GC9.4 and GC9.5, the City shall be entitled to deduct the amount of such payment from any payment required to be made by the City to the Contractor under the Contract or take whatever other remedies against the Contractor that the City may have at law.

GC10. BONDING

- GC10.1 Prior to the execution of the Contract, the Contractor shall, at their own expense, provide and deliver to the City:
- GC10.1.1 A Performance Bond written on Canadian Construction Documents Committee Form CCDC 221 or similar form acceptable to the City, conditioned on the faithful performance of the terms of the Contract, including corrections after final payment provided for in GC20 hereof, and the payment of all obligations arising under the Contract, in the amount of fifty percent (50%) of the Contract Price. The Performance Bond shall

remain in full force and effect for at least twelve (12) months after the date of the Certificate of Final Completion of the Work.

GC10.1.2 A Labour and Material Payment Bond on Canadian Construction Documents Committee Form CCDC 222 or similar form acceptable to the City, covering payment for all labour and materials used or reasonably required in the performance of the Contract, conditioned on the faithful performance of the terms of the Contract for the amount of fifty percent (50%) of the Contract Price.

GC10.2 All bonds shall be issued by the same surety or bonding company licensed to conduct the business of a surety in the Province of Manitoba. Each bond shall incorporate by reference the Contract and be signed by both the Contractor and the Surety, and the signature of the authorized agent of the Surety shall be notarized.

GC11. INSURANCE

GC11.1 Without in any way limiting the liability of the Contractor under the Contract, the Contractor shall provide, maintain and pay the premiums for any insurance it is required by law to provide, and the minimum insurance coverages listed in the Supplemental Conditions.

GC11.2 Unless specified otherwise, the duration of each policy shall be from the date of commencement of the Work until ten (10) calendar days following the date of the Certificate of Final Completion of the Work.

GC11.3 If the Contractor returns to the Site of the Work for the purpose of GC20 Warranty, they shall provide and maintain insurance policies in such amounts as the Engineer may require.

GC11.4 All insurance policies shall be issued by an insurance company authorized to transact a business of insurance underwriting in the Province of Manitoba.

GC11.5 All deductibles shall be borne by the Contractor and shall be in amounts acceptable to the City.

GC11.6 The Contractor shall provide to the City at least thirty (30) calendar days written notice of any non renewal, cancellation, material change or amendment restricting coverage of any of the insurance policies.

GC11.7 The Contractor shall provide the City with a certified certificate of insurance for each insurance policy no later than the date of the execution of the Contract. If requested by the Engineer, the Contractor shall provide the originals or certified true copies of all contracts of insurance maintained by the Contractor.

GC11.8 If the Contractor fails to provide or maintain insurance as required by the Contract Documents, then the City shall have the right to provide and maintain such insurance. The Contractor shall pay the cost thereof to the City on demand or the City may deduct the cost from any amount which is due or may become due to the Contractor.

GC12. THE CONTRACTOR

Contractor's Responsibilities

GC12.1 The Contractor shall execute, maintain, and complete the Work, make good all damage thereto and imperfections therein and deliver the completed Work to the City in strict accordance with the provisions of the Contract Documents. The Contractor shall be responsible for any Work not explicitly set out in the Contract Documents but that may be reasonably implied as necessary for the proper completion of the Work. Except as otherwise provided for in the Contract Documents the Contractor shall be solely responsible for construction means, methods, techniques, sequences and procedures and shall coordinate, direct and supervise the Work so as to ensure conformance with the Contract Documents.

GC12.2 Until the issue of the Certificate of Final Completion of the Work, the Work shall be under the charge and care of the Contractor and they shall, at their own expense, do whatever is necessary to ensure that:

- .1 no person, property, livestock, right, easement or privilege is injured, damaged or infringed by reason of the Contractor's or any Subcontractor's activities in performing the Work;
- .2 pedestrian and other traffic on any public or private road or waterway is not unduly impeded, interrupted or endangered by the performance or existence of the Work or Plant. If any of the Contractor's Work causes interference with any existing public road, the Contractor shall provide and maintain the necessary detour roads and shall post such signs,

warnings and protection as may be required for public convenience and safety;

- .3 fire hazards in or about the Work or the Site are eliminated;
- .4 the health and safety of all personnel employed in the performance of the Work or otherwise is not endangered by the method or means of its performance, and the Work is in compliance with all laws, rules, regulations and practices required by the applicable construction and safety legislation;
- .5 adequate medical services are available to all personnel employed on the Work or its Site at all times during the performance of the Work;
- .6 adequate sanitation measures are taken and facilities provided with respect to the Work and the Site;
- .7 all survey posts, monuments or bars are protected and are not removed, defaced, altered or destroyed;
- .8 all stakes, buoys and marks placed on the Work or its Site by or under the authority of the Engineer are protected and are not removed, defaced, altered or destroyed;
- .9 good order and discipline is maintained at the Site at all times;
- .10 the Site, any existing facility thereon and the Work already performed are all secure and protected from the action of the elements. The Contractor shall provide and maintain all necessary guards, barriers, detour routes, fences, warnings flares or lights;
- .11 City owned Plant, material or equipment is not removed from the Site without the prior written consent of the Engineer.

GC12.3 The Contractor shall provide and pay for competent, suitably qualified personnel to execute the Work and unless stated otherwise in the Supplemental Conditions, the Contractor shall provide and pay for all Plant, labour, payroll, overhead, materials, supplies, equipment, machinery, transportation, tools, appliances, fuel, power, light, heat, telephone, water and all other facilities and incidentals necessary for the execution, testing, operation, completion and maintenance of the Work.

GC12.4 Unless stated otherwise in the Supplemental Conditions, all materials, products and equipment to be incorporated in the Work shall be new,

undamaged, fit for the purpose intended and shall meet or exceed the kind, quality and quantity of same specified in the Contract Documents. If required, the Contractor shall provide, at their own expense, evidence satisfactory to the Engineer that the foregoing requirement has been met.

- GC12.5 If the Contractor fails to notify the Engineer in writing to obtain direction and performs any Work knowing it contains errors or omissions, is contrary to any laws, ordinances, rules, regulations, codes and orders of any authority having jurisdiction, the Contractor shall be responsible for and shall correct any variation thereof and shall bear all costs, expenses and damages attributable to his failure to comply with the provisions of such laws, ordinances, rules, regulations, codes and orders.

Prime Contractor

- GC12.6 Unless expressly specified otherwise in the Supplemental Conditions, the Contractor shall be the Prime Contractor and shall serve as, and have the duties of the Prime Contractor in accordance with The Workplace Safety and Health Act, C.C.S.M. c. W210.

Superintendence

- GC12.7 The Contractor shall employ a competent and responsible superintendent well skilled in the type of Work being undertaken, who shall direct and supervise the Work and be in attendance on the Site at all times while Work is being performed. The superintendent shall be the executive representative of the Contractor in their absence and directions on matters given to them verbally or in writing shall be deemed to be given to the Contractor. The presence of a superintendent on the Site shall not relieve the Contractor from their duty to personally supervise the Work. The Contractor shall inform the Engineer in writing of the name, address and telephone number of such superintendent prior to the commencement of the Work.
- GC12.8 If at any time the Engineer requires such superintendent to be replaced then the Contractor shall arrange for them to vacate their position and be removed from the Site within forty-eight (48) hours after receiving notice in writing from the Engineer to replace the superintendent with another superintendent. Any person so removed shall not be re-employed on the Work by the Contractor or by any Subcontractor. The Contractor shall not replace the superintendent without the prior written consent of the Engineer unless the superintendent

proves to be unsatisfactory to the Contractor and ceases to be in their employ.

Subcontractor

- GC12.9 The Contractor shall notify the Engineer in writing of their intention to subcontract. Such notification shall identify the part of the Work, and the name and location of the place of business of each Subcontractor with whom it is intended to subcontract. The Contractor shall not employ any Subcontractor to whom the City may reasonably object, such objection being made by the Engineer notifying the Contractor in writing within six (6) calendar days of receipt by the Engineer of the above notification. The Contractor shall not, without the written consent of the Engineer, change a Subcontractor who has been engaged by them. The City reserves the right to order the Contractor to dispense with the services of a Subcontractor if such services are not satisfactory to the Engineer.
- GC12.10 The Contractor with respect to Work to be performed under subcontract, shall:
- .1 enter into contracts or written agreements with their Subcontractors to bind and require them to incorporate the terms and conditions of the Contract Documents into all agreements and to perform their work in complete conformance with and subject to the terms and conditions of the Contract Documents; and
 - .2 be as fully responsible to the City for acts and omissions of their Subcontractors and of persons directly or indirectly employed by them, as for the acts and omissions of persons directly employed by them; and
 - .3 be responsible for conveying the interpretation or clarification of the Contract Documents, as given by the Engineer, to their Subcontractors.
- GC12.11 Nothing contained in the Contract Documents shall create any contractual relation between any Subcontractor and the City. Neither the subcontracting nor shall the Engineer's consent to a subcontracting by the Contractor shall be construed to relieve the Contractor from any obligation under the Contract or to impose any liability upon the City.
- GC12.12 The organization of the Specifications and Drawings into sections according to the type of work shall not control the Contractor in dividing the work among

Subcontractors. The Contractor shall be solely responsible for determining the division of the Work amongst their Subcontractors.

Other Contractors

GC12.13 The City reserves the right to allow other contracts in connection with the Work. The Contractor shall arrange and carry on their Work so as not to conflict with the work being carried on or to be carried on for the City by Other Contractors or by the City's employees. The Contractor shall allow them access to the Site and cooperate with them in the carrying out of their duties and obligation in the best manner possible. If any part of the Work depends for its proper execution or result upon the work of Other Contractors, the Contractor shall connect properly and co-ordinate their work with that of such Other Contractors.

GC12.14 The Contractor shall, in writing, notify the Engineer of any defects in the work of such Other Contractors that may interfere with the proper execution of the Work. If the Contractor fails to so inspect the work and report any such defects they shall have no claim against the City by reason of the defective or unfinished work of Other Contractors except for latent defects not reasonably noticeable at the time of commencement of the Work.

GC12.15 If the sending onto the Work or its Site of Other Contractors could not have been reasonably foreseen or anticipated by the Contractor when entering into the Contract and the Contractor incurs additional expense or delay in completing the Work they shall notify the Engineer who will deal with the matter as stated in GC18 Time.

Permits and Fees

GC12.16 The Contractor shall, at their own expense, procure and maintain all permits, licences, and certificates required by law, ordinances, rules, regulations, codes and orders of the authorities having jurisdiction for the execution of the Work, but this shall not include the obtaining of permanent easements or rights of servitude. The Contractor shall give the required notices, pay for all required inspections and comply with the laws, ordinances, rules, regulations, codes and orders of the authorities having jurisdiction that are or become in force during the performance of the Work and that relate to the Work. If there is a discrepancy between any laws, ordinances, rules, regulations, codes and orders the most stringent shall apply.

GC12.17 If the Contract requires or the Contractor desires the use of any design, device, material or process covered by letters of patent or copyright, trademark or trade name, the Contractor shall provide for, at their own expense, such use by suitable legal agreement with the patentee or owner and a copy of said agreement shall be filed with the City upon request. If the City or the Contractor is prevented by injunction from using any patent, design, device, material or process, or any trade mark, trade name or copyright, the Contractor, shall, at their own cost, substitute an equally suitable product, part or method of carrying out the Work, all subject to the prior written approval of the Engineer.

GC13. THE ENGINEER

Authority of the Engineer

GC13.1 The Engineer will be the City's representative throughout the duration of the Work and shall have authority to act on behalf of the City to the extent expressly provided for in the Contract Documents. The Engineer will be solely responsible for the interpretation or clarification of the Contract Documents or any part thereof that appears indefinite, not clear or contradictory to the Contractor. The Contractor shall obey, perform and comply with the Engineer's orders or instructions with respect to the Work, or concerning the conduct thereof, promptly, efficiently and to the satisfaction of the Engineer, and they will assist Other Contractors, their employees and agents, and those of the City, to do the same.

GC13.2 If the Engineer does not give any direction, instruction or order with respect to the Work, or any part thereof, the Contractor shall not thereby be relieved on any responsibility under the Contract. It is understood and agreed that the Engineer owes no duty either of superintendence or of supervision of the Work to the Contractor; and that each of the provisions of the Contract Documents shall be construed accordingly.

GC13.3 The Contractor shall permit the Engineer to have access to the Work and the Site at all times and the Contractor shall give the Engineer, free of cost to the City, any and all possible assistance and any such information respecting the performance of the Work, whether at the Site of the Work, or at the premises of the Contractor or any Subcontractor, to enable the Engineer to carry out

their duty to see that the Work is performed in accordance with the Contract Documents.

- GC13.4 The Engineer shall have the authority to object to any person employed or retained by the Contractor in the execution of the Work who is in the opinion of the Engineer incompetent, negligent, disrespectful, disorderly or conducting himself improperly. The Contractor shall forthwith remove the person so objected to. The Engineer may refuse to issue any progress estimate and/or certificate to the Contractor while such person remains engaged upon the Work.

GC14. INSPECTION

- GC14.1 The Engineer shall have full authority to examine, inspect, test, approve or reject all Plant, materials, equipment, methods or procedure and workmanship without in any way relieving the Contractor from their responsibilities under the Contract. The Engineer shall be the sole judge of determining whether the kind, quantity and quality of the Plant, materials, equipment, methods or procedure and workmanship meet or exceed the requirements of the Contract Documents.
- GC14.2 The Contractor shall before beginning or resuming operations upon any portion of the Work, give the Engineer at least three (3) calendar days notice of their intention to commence work at a certain time and date. It will be the responsibility of the Engineer to ensure that they or their representative is available to inspect the Work, providing that the Contractor has given the required notice.
- GC14.3 If the Contractor covers or permits to be covered any of the Work that is subject to inspection or testing without the prior approval of the Engineer, the Contractor shall, at their sole expense, forthwith take down, expose and rebuild any portion of the Work in order that the Engineer can inspect the Work.
- GC14.4 If, at any time after the commencement of the Work but prior to the expiry of the warranty period, the Engineer has reason to believe that the Work or any part thereof has not been performed in accordance with the Contract Documents, the Engineer may have that Work examined by a qualified person of their choice. If, as a result of an examination of the Work referred to

above, it is established that the Work was not performed in accordance with the Contract Documents, then, in addition to and without limiting or otherwise affecting any of the City's rights and remedies under the Contract or at law, the Contractor shall pay the City, on demand, all reasonable costs and expenses that were incurred by the City in having that examination performed.

GC15. CORRECTION OF DEFICIENCIES

GC15.1 The City shall have the right to any one of and all of the following options in addition to those provided elsewhere in the Contract Documents and to its ordinary remedies at law if, in the opinion of the Engineer, the Work or any part thereof attributable to the Contractor is determined to be defective or deficient:

- .1 If the Engineer shall direct the Contractor to repair, reconstruct, or replace the Work determined to be defective or deficient, the Contractor shall, at their sole expense, and in the manner and within the time period specified, carry out the orders of the Engineer in that respect.
- .2 If the Contractor fails or neglects to act as set out above the City may correct or replace the Work determined to be defective or deficient either by the City's own forces or by an Other Contractor. The cost of correcting or replacing same shall be paid to the City immediately by the Contractor upon receipt of written notice from the City setting out the amount to be so paid. If the Contractor fails to make payment to the City as required hereby, the City may deduct the amount of such payment from any payment required to be made to the Contractor under this Contract. If, in the opinion of the City, the Contractor has received all payments due to them under the Contract, the Surety shall make such payment immediately upon receipt of written notice from the City stating the amount to be so paid.
- .3 If, in the opinion of the Engineer, it is not expedient to correct the Work determined to be defective or deficient, the City may deduct from the Contract Price the difference in value between the Work as done and that called for by the Contract Documents, the amount of which will be determined by the Engineer.
- .4 Pending action under the above, the City shall have the right to use the Work or any portion thereof, without in any way affecting its right of

rejection of any Work determined to be defective or deficient or relieving the Contractor of responsibility to complete the Work.

- GC15.2 If the Contractor disagrees with any decision or direction of the Engineer on any of the foregoing matters, the Contractor shall comply with the decision or direction of the Engineer but may appeal the decision in accordance with GC23 Dispute Resolution.

GC16. CHANGE IN WORK

City's Right to Change Work

- GC16.1 The City shall have the right, at any time before or after the execution of the Contract or at any time during the prosecution of the Work prior to the issuing of the Certificate of Final Completion of the Work to order a Change in Work without in any way affecting or vitiating the Contract, and the Contractor shall carry out such Change in Work upon receipt of a Change Order issued by the Engineer.

Change of Costs

- GC16.2 The Contract Price will not be increased or decreased by reason of any increase or decrease in the cost of the Work to the Contractor that arises as a result of an increase or decrease in the cost of labour, Plant, material or otherwise unless the increase or decrease is a result of a change in a tax imposed under:

- .1 the Excise Act, R.S.C., 1985, c. E-14;
- .2 the Excise Tax Act, R.S.C., 1985, c. E-15;
- .3 the Customs Act, R.S.C., 1985, c. 1;
- .4 the Customs Tariff S.C. 1997, c. 36; or
- .5 The Retail Sales Tax Act, C.C.S.M. c. R130;

that occurs after the Submission Deadline and directly affects the cost to the Contractor of that commodity or service.

- GC16.2.1 If a change in tax takes effect after the Submission Deadline but public notice of the change has been given by either the Federal or Provincial Minister of Finance before that date, the change shall be deemed to have occurred before the Submission Deadline.

- GC16.3 If a change in tax occurs, the Contract Price will be increased or decreased by an amount equal to the amount that is established, by an examination of the relevant records of the Contractor, to be the increase or decrease in the cost incurred that is directly attributable to that change.

Change of Quantity

- GC16.4 If the amount of the Work originally intended to be done under the Contract is increased by more than 20% of the Estimated Quantity, any negotiated revision to the Contract Price will only apply to the quantities that are in excess of 120% of the Estimated Quantity in the Unit Price Schedule.
- GC16.5 If the amount of the Work originally intended to be done under the Contract is diminished by more than 20% of the Estimated Quantity, any negotiated revision to the Contract Price will only apply to the quantities of the actual Work performed but under no circumstances will the amount payable exceed that amount that would have been payable to the Contractor had the estimated total quantity actually been performed, used or supplied. No claim shall be made for damages on the grounds of loss of anticipated profit on Work so diminished or on any other grounds provided however that the value of the diminution shall not exceed 20% percent of the Contract Price.
- GC16.6 If a change results in a diminution of Work after commencement of the Work or any part thereof resulting in extra cost to the Contractor, for which they would not be entitled to payment on a unit price basis, or in loss of Work already completed but not paid for, or loss to the Contractor in respect of material or equipment purchased by them for the Work but not used thereon as required by the City, compensation shall be made to the Contractor by the City in the sum or sums to be fixed by the Engineer.

Change of Contract Price

- GC16.7 The Engineer shall determine the value of any Change in Work by one or more of the following methods:
- .1 at the Contract Unit Price(s) for similar work; or
 - .2 at the rate or rates per unit or a lump sum amount subsequently agreed upon; or
 - .3 by the actual cost of the Work to the Contractor plus 15% on any portion of the Work undertaken by the Contractor's own forces or 10% on any

portion of the Work undertaken by a Subcontractor. Equipment costs will be paid for at the rental rates set forth in the written order, or otherwise in accordance with The City of Brandon Construction Vehicles & Equipment Rentals Firm Price Listing.

GC16.8 If the value of the Change in Work is to be determined by either method .1 Unit Price or .2 Lump Sum above, the Contractor shall present their proposed change in the Contract Time and/or Contract Price to the Engineer, supported by appropriate documentation in a form acceptable to the Engineer prior to the commencement of the proposed Work. The Engineer will evaluate and verify the acceptability of such proposal and, if approved by the Engineer, a Change Order will be issued to the Contractor amending the Contract Time and/or Contract Price. The Change Order will stipulate the form of presentation of costs and methods of measurement.

GC16.9 If the value of the Change in Work is to be determined by method .3 Cost Plus above, the cost of performing the work attributable to the Change in Work shall be limited to the actual net change in the cost of the following:

- .1 salaries, wages and benefits paid to the Contractor's employees under a salary or wage schedule agreed upon by the City and the Contractor, or in the absence of such a schedule, actual salaries, wages and benefits paid by the Contractor, for employees engaged in:
 - .1 performing the work on the Site attributable to the Change in Work;
 - .2 in the production or transportation of Products, at shops or on the road;
 - .3 engaged in the preparation or review of Contractor's Specifications and Contractor's Drawings.
- .2 contributions, assessments or taxes incurred for such items as employment insurance, provincial or territorial health insurance, workers' compensation, and Canada or Quebec Pension Plan, that are based on wages, salaries or other remuneration paid to employees of the Contractor and included in the cost of the Work as provided in GC16.9.1;
- .3 travel and subsistence expenses of the Contractor's personnel described in GC16.9.1;
- .4 all Products including cost of transportation thereof;
- .5 Plant, including transportation and maintenance thereof, and , materials, supplies which are consumed in the performance of the Work; and cost

less salvage value on such items used but not consumed, which remain the property of the Contractor;

- .6 equipment and services required for the Contractor's field office;
- .7 removal and disposal of waste products and debris;
- .8 safety measures and requirements;
- .9 the amounts of all subcontracts;
- .10 quality assurance such as independent inspection and testing services;
- .11 charges levied by authorities having jurisdiction;
- .12 royalties and patent licence fees;
- .13 premiums for bonds and insurance which the Contractor is required, by the Contract Documents, to purchase and maintain;
- .14 forfeited deposits; and
- .15 taxes and duties for which the Contractor is liable.

GC16.9.1 The Contractor shall maintain and keep detailed daily records of each piece of work covered by the Change Order, showing the names of the workers engaged thereon, the number of hours each worker was employed, the number of hours Plant and equipment was employed thereon and the quantities of material necessary for and consumed in the performance of the Change in Work. These daily records shall be made in duplicate each day and submitted to the Engineer for verification. If requested by the Engineer, the Contractor shall submit receipted invoices for all materials and services utilized in the performance of the Change in Work. The Contractor shall provide the Engineer with every facility for the compilation of cost records, and when requested shall supply all data necessary for such purpose from payrolls, time books, invoices, and all other sources from which the City may find it necessary to obtain information.

GC16.10 If the method of valuation, measurement or change in Contract Time and/or Contract Price cannot be promptly agreed upon prior to the commencement of the proposed Work and the Engineer requires the same to proceed, then the Engineer in the first instance will determine the method of valuation, measurement and the change in Contract Time and/or Contract Price. The Engineer will issue a Change Order setting out the method of valuation, measurement and any change in the Contract Time and/or Contract Price.

The Contractor shall proceed with the Work and the matter shall be subject to final determination in the manner set out in GC23 Dispute Resolution. The Engineer shall certify the value of the Work performed in accordance with their own valuation and measurement of the Work and shall also certify any change in Contract Time and/or Contract Price.

GC17. PAYMENT

Engineer's Progress Estimate

- GC17.1 The Contract Price to be paid by the City to the Contractor will be the sums certified by the Engineer in the interim and final progress estimates; such sums to be ascertained and determined by the Engineer as follows:
- .1 For Unit Price Contracts, upon the basis of the Contract Unit Prices for the various classes of the Work included in the Unit Price Schedule or Change Order(s). These Contract Unit Prices are gross prices including duty, freight, cartage, Provincial (RST) and Federal taxes (GST excluded) and all charges governmental or otherwise paid and including profit and all compensation that shall be due to the Contractor for supplying labour, materials, Plant, supervision and all details necessarily connected with the completion of the Work and all risks and contingencies connected therewith. The total amount to be paid to the Contractor for the Work described in the Contract will be the amount arrived at by measuring the net amount of each class of the Work listed in the Unit Price Schedule, and pricing the same, in accordance with the Contract Unit Prices therein.
 - .2 For Lump Sum Contracts, upon the basis of the lump sum price included in the Agreement or Change Order(s). The lump sum price shall be a gross price including duty, freight, cartage, Provincial (RST) and Federal taxes (GST excluded) and all charges governmental or otherwise paid and including profit and all compensation that shall be due to the Contractor for supplying labour, materials, Plant, supervision, and all details necessarily connected with the completion of the Work and all risks and contingencies connected therewith. Payments will be made in proportion to the progress of the Work, as determined by the Engineer, during the term of the Contract.

- GC17.2 By the fifth (5th) calendar day after the end of any month during which any Work has been completed, the Contractor shall deliver to the Engineer an application for payment signed by the Contractor which accurately sets forth all such Work completed during the month and the amount claimed therefore in accordance with the valuation method set out in the Contract Documents.
- GC17.3 Subject to the timely receipt of the Contractor's application for payment pursuant to GC17.2, by the fifteenth (15th) calendar day after the end of any month, or as soon thereafter as possible, the Engineer will prepare a monthly progress estimate setting out the quantity and value of the Work performed during the preceding month that in the opinion of the Engineer is in accordance with the Contract Documents and was not included in any previous progress estimate relating to the Contract.
- GC17.4 The City will make payment to the Contractor on account of the progress estimate by the later of:
- .1 the twenty-fifth (25th) calendar day after the end of the month for which the Contractor's application for payment was made; or
 - .2 twenty (20) calendar days after receipt by the Engineer of the Contractor's application for payment pursuant to GC17.2.
- GC17.5 Payments shall be subject to holdbacks pursuant to the provisions of the Contract Documents, The Builders' Liens Act or any other applicable statute, regulation or by-law.

Payment Withheld

- GC17.6 The City may withhold or on account of subsequently discovered evidence, nullify the whole or part of any progress estimate to the extent necessary to protect the City from loss on account of any one or more of the following if the Contractor:
- .1 abandons the Work; or
 - .2 is adjudged bankrupt or insolvent; or
 - .3 makes a general assignment for the benefit of their creditors; or
 - .4 has a receiver or liquidator appointed in respect of their assets; or
 - .5 is in the judgment of the Engineer not executing or has not been executing the Work, or any part thereof, in a sound and skillful manner

and to their satisfaction and in all respects in strict conformity with the Contract; or

- .6 in the judgment of the Engineer, is not progressing continuously with the Work or any part thereof, and in such a manner as to ensure the proper completion of the Work or any part thereof, within the time stipulated; or
- .7 refuses or neglects forthwith, when so ordered, to conduct the Work so as to ensure its completion, in the opinion of the City, within the time stipulated; or
- .8 fails to submit a schedule or revised schedule of work activities for the Work to the Engineer for approval when such schedule has been requested by the Engineer; or
- .9 has not completed the work within the time required; or
- .10 refuses or neglects to take down, rebuild, repair, alter or amend any defective or unsatisfactory Work, or to remove any condemned material or workmanship, or to comply with any reasonable order in connection therewith that they may receive from the Engineer; or
- .11 fails to make prompt payment to their Subcontractors, their employees or on account of the purchase or rental of material or Plant; or
- .12 fails to promptly secure a discharge of a claim for lien or trust claim served upon the City pursuant to The Builders' Liens Act or The Workers Compensation Act, C.C.S.M. c. W200; or
- .13 persistently disregards any laws, bylaws and statutory regulations; or
- .14 fails to sign a Certificate of Final Completion of the Work as required; or
- .15 fails to employ or keep a competent Superintendent on the Work or to replace the Superintendent as required by the Engineer; or
- .16 fails to comply with the provisions of the Schedule of Work; or
- .17 commits any other material breach of this Contract that in the opinion of the City indicates an unwillingness or inability upon the part of the Contractor to carry out the terms thereof; or
- .18 fails to make good any loss or damage for which they are liable under GC11 Insurance within a reasonable time after being required to do so by the Engineer, or
- .19 fails to make direct deposit arrangements with the City.

GC17.7 The failure of the City to deduct or withhold an amount referred to above shall not constitute a waiver of the right of the City to do so, or an admission of lack of entitlement to do so in any subsequent payment to the Contractor.

GC17.8 The City may make payment to such persons (including the City) as shall be entitled thereto for any or all amounts for which the Contractor or any Subcontractor is shown to be indebted or liable to pay in respect of wages, labour, services, the purchase of material, or rental of Plant furnished for the Work. Payment of such amounts shall discharge the City's liability to the Contractor to the same extent as payment directly to him.

GC18. TIME

Contract Time

GC18.1 The Contractor shall complete the Work in accordance with the Contract Documents and to the satisfaction of the Engineer within the specified Contract Time.

GC18.2 Except as provided for in the definition and application of Working Days, the Contractor shall assume all risk for reasonably foreseeable conditions such as weather within seasonal norms and shall not be entitled to extension of Contract Time or costs due to delay therefore.

Working Days

GC18.3 If the Contract Time is specified as a number of Working Days, counting of Working Days shall commence on the earlier of fourteen (14) calendar days after the award of Contract or the day the Contractor commences Work, and will continue to be assessed until the Certificate of Final Completion of the Work is issued. The Engineer will at the end of each day certify on an inspection report as to whether or not the day is to be considered as a Working Day.

Schedule of Work

GC18.4 The Contractor shall, prior to commencement of the Work, prepare and submit for the Engineer's approval, a Schedule of Work listing the order in which the Contractor proposes to carry on the Work, including the dates at which major or critical portions of the Work will commence and be completed, and confirming the construction start date and the completion date, the latter

date being no later than the date specified in the Agreement for Final Completion of the Work. Once accepted by the Engineer, the Schedule of Work shall not be changed by the Contractor without the Engineer's approval. The Contractor shall be responsible for ensuring that all Work is carried out in accordance with and within the time limits set out in the Schedule of Work.

- GC18.5 If the progress of the Work falls behind the most recent approved Schedule of Work or is delayed for any reason other than one for which an extension of Contract Time is provided for under GC18 Time, the Contractor shall, at their sole cost work such additional time, including weekends and holidays, employ additional workers, or both as may be required to bring the work back on schedule.

Delays

- GC18.6 If the Contractor is delayed in the performance of the Work by:
- .1 a stop work order issued by a court or other public authority having jurisdiction and providing that such order was not issued as the result of an act or fault of the Contractor or anyone employed or engaged by them directly or indirectly;
 - .2 labour disputes, legitimate or legal strikes, lock-outs (including lock-outs decreed by a recognized contractors' association for its members of which the Contractor is a member);
 - .3 acts of God;
 - .4 unavoidable casualties;
 - .5 any other cause that is totally beyond their control, fault or negligence; or
 - .6 any other cause within the Contractor's control that the Engineer has determined is justified;
 - .7 any unduly prolonged delay upon the part of the City;
- then the Contract Time will be extended for a period of time equal to the time lost due to such delay.
- GC18.7 No extension of Contract Time or claim for costs due to delay will be granted by the Engineer unless a written notice, clearly stating the cause of delay and the length of extension requested, is received by the Engineer from the Contractor within seven (7) calendar days of the date on which the cause of the delay arose. In the case of a continuing cause of delay, only one notice

shall be necessary. Failure to provide such notice shall constitute a waiver by the Contractor of any claim. The Engineer may require that any request for an extension of Contract Time be accompanied by a written consent of the Surety whose bonds form part of the Contract Documents.

Liquidated Damages

GC18.8 Subject to the extensions of Contract Time as provided for herein, if the Contractor fails to achieve Final Completion of the Work in accordance with the Contract Documents and to the satisfaction of the City by the day fixed in the Agreement for Final Completion of the Work, the Contractor shall pay the City the sum stipulated in the Agreement as liquidated damages (and not as penalty) for each and every calendar day following that day fixed for Final Completion of the Work and ending on the day immediately preceding the date of the Certificate of Final Completion of the Work.

GC19. CERTIFICATE OF FINAL COMPLETION OF THE WORK

GC19.1 On the day that Final Completion of the Work is achieved, and the Contractor has complied with the Contract Documents and all orders and directions made pursuant thereto, to the satisfaction of the Engineer, the Engineer will issue a Certificate of Final Completion of the Work to the Contractor.

GC19.2 No payment made to the Contractor and no partial or entire use or occupancy of the Work by the City shall be taken as an accurate setting forth of the state of the Work or as an acceptance of any Work or material not in accordance with the Contract Documents. Neither the issue of a Certificate of Final Completion of the Work nor payment of the final progress estimate shall relieve the Contractor from their responsibility either under GC20 Warranty hereof or as a result of any breach of this Contract by the Contractor including but not limited to faulty or defective Work appearing after Final Completion of the Work, failure of the Work to comply with the Contract Documents or the requirement to comply with the terms of any special guarantees set out in the Supplemental Conditions, nor shall it conclude or prejudice any of the powers of the Engineer or the City.

GC19.3 Subject to their right to appeal pursuant to GC23, acceptance by the Contractor of payment of the final progress estimate and the Certificate of Final Completion of the Work shall constitute a waiver and release by them of

all claims against the City whether for payment for Work done, damages or otherwise arising out of the Contract, except those previously made and still unsettled, if any.

GC20. WARRANTY

GC20.1 The Contractor shall, unless specifically stated otherwise in the Contract Documents, at their sole cost and expense, maintain the Work against any and all defects or deficiencies that may arise for a period of twelve (12) months from the date of the Certificate of Final Completion of the Work.

GC20.1.1 If because of conditions reasonably beyond the control of the Contractor, a portion of the Work cannot be completed but that portion does not prevent the balance of the Work from being put to its intended use, the City may at its sole discretion permit the warranty period for all or part of the completed portion of the Work to commence prior to the issuance of the Certificate of Final Completion of the Work.

GC20.2 Upon receipt of written notice from the City, the Contractor or their Surety shall, at their sole cost and expense, remedy any defect or deficiency, and remedy any and all damage that may arise or result from the defect, deficiency or the correction of same, or otherwise identified by the Engineer within the twelve (12) month period as aforementioned, in the manner and within the time periods specified in the said notice.

GC20.3 If the Contractor fails or neglects to act for any reason whatsoever to remedy the defects or deficiencies or otherwise in the manner and within the time periods specified in the said notice, the City may take all steps necessary to have the defects, deficiencies or otherwise remedied either by the City's own forces or by another contractor acceptable to the City and the Surety. The cost of such remedial work shall be paid to the City by the Contractor within seven (7) calendar days of receipt of written notice from the City to the Contractor setting out the amount to be paid. If the Contractor fails to make payment to the City as required hereby, the City shall deduct the amount of such payment from any payment required to be made to the Contractor under this Contract.

- GC20.4 If the Contractor fails to make payment to the City as required hereunder, the Surety shall make such payment to the City within seven (7) calendar days of receipt of written notice from the City setting out the amount to be so paid.
- GC20.5 Notwithstanding the generality of the foregoing:
- .1 If repairs must be made immediately, by reason of an emergency existing or otherwise, the City shall have the right to undertake such repairs and charge the cost of making such repairs to the Contractor or their Surety, except that the City shall immediately notify the Contractor or their Surety and shall withdraw its forces as soon as the Contractor's or the Surety's forces assume performance of the repair.
 - .2 All costs resulting from the need to undertake remedial work during the warranty period as aforesaid, whether by the Contractor, their Subcontractor or by the City, as provided herein, shall be borne by the Contractor or their Surety. In addition, the Contractor shall be liable to the City for all expenses, losses or damages incurred by the City as a result of such defects, deficiencies or otherwise referred to herein or as a result of the Contractor's failure to meet the warranty requirements specified herein, including, but without limiting the generality hereof, all costs of engineering, inspection and testing.
- GC20.6 If the Contractor can prove, following completion and payment for the remedial work, that the defect, deficiency or otherwise was attributable to a design defect, deficiency or otherwise or resulted from third party damage not attributable to the Contractor or their Subcontractor, the City shall promptly reimburse the Contractor for the cost of undertaking such remedial work. If the Contractor fails for any reason whatsoever to remedy the defect, deficiency or otherwise in the manner and within the time limit specified in herein, the Contractor shall not be entitled to repayment of any monies that they are required to pay the City as outlined in the above.
- GC20.7 If a defect or deficiency prevents the full and normal use or operation of the Work or any portion thereof, for purposes of calculating the warranty period, time shall be deemed to cease to elapse for the defective or deficient portion, and for any portion of the Work whose use or operation is prevented by such defect or deficiency, as of the date on which the defect or deficiency is observed or the use or operation is prevented and shall begin to run again

when the defect or deficiency has been corrected or the Work may be used or operated to the satisfaction of the Engineer.

- GC20.8 Notwithstanding the provisions of this Article, if any statute in force in the Province of Manitoba or in the jurisdiction where the material was manufactured or if a manufacturer's warranty extends beyond the warranty period specified in the Contract Documents, then the provisions of such statute or manufacturer's warranty shall apply.

GC21. SUSPENSION OF WORK

City's Right to Stop Work

- GC21.1 The City has the right and may, by an order in writing, at any time stop or suspend all or any part of the Work, or direct any portion to be commenced or completed in priority to any other part or portion, or may cancel the order to proceed with the Work, or with any part thereof, and the Contractor shall not thereby be entitled to any claim of or loss of profit, or anticipated profit, or for damages or for any additional payment by reason of such order. The Contractor shall comply with such orders immediately and suspend all operations in respect of the Work except those that, in the opinion of the Engineer are necessary to secure the Site and any existing facilities thereon in a proper and satisfactory condition for the safe accommodation of the public, and for the effectual protection of the Work, Site, Plant and material from the weather, vandalism or other causes, and shall so maintain it.
- GC21.2 The Contractor shall not, during a period of suspension, remove any part of the Work, Plant or material from the Site without the consent of the Engineer. No such suspension shall vitiate this Contract or any part thereof, and at any time after such Work has been suspended, such Work may again be resumed in whole or in part at the option of the Engineer. Upon the Contractor receiving written notice from the City that such Work or any part thereof is to be resumed they shall at once resume Work and diligently carry on the same.
- GC21.3 The Contractor shall not proceed to prosecute any portion of the Work, against the orders of the Engineer. In the case of any portion of the Work prosecuted contrary to the orders of the Engineer the cost of such taking known or exposure, and re-building if any shall fall upon the Contractor.

Contractor's Right to Suspend Work or Terminate Contract

GC21.4 If the Work is stopped or otherwise delayed for a period of sixty (60) calendar days or more under an order of any court, or other public authority, and providing that such order was not issued as the result of an act or fault of the Contractor, or anyone directly or indirectly employed by them, or if the City fails to pay the Contractor within sixty (60) calendar days of its maturing and presentation, any sum certified by the Engineer or awarded by arbitrators, then the Contractor may, upon seven (7) calendar days written notice to the City, stop work or terminate this Contract and recover from the City payment for all Work done and any loss sustained upon any Plant or material with reasonable profit and damages.

GC22. FORFEITURE OF CONTRACT

GC22.1 The City shall have the full right and power to take the whole of the Work, or any part or parts thereof, out of the hands of the Contractor, and may employ such means as the City sees fit to have the Work completed, without process or action at law, upon giving the Contractor written notice, a copy of which notice shall be given to the Surety, or the local agent of the latter, if the Contractor:

- .1 abandons the Work; or
- .2 is adjudged bankrupt or insolvent; or
- .3 makes a general assignment for the benefit of their creditor without the City's consent; or
- .4 has a receiver or liquidator appointed in respect of their assets; or
- .5 is in the judgment of the Engineer not executing or has not executed the Work, or any part thereof, in a sound and skillful manner and to their satisfaction and in all respects in strict conformity with the Contract Documents; or
- .6 in the judgment of the Engineer, is not progressing with the Work or any part thereof continuously and in such a manner as to ensure the proper completion of the Work or any part thereof, within the time stipulated in the Contract Documents; or

- .7 refuses, neglects or fails forthwith, when so ordered, to conduct the Work so as to ensure its completion, in the opinion of the Engineer, within the time stipulated; or
 - .8 has not completed the Work within the time required; or
 - .9 refuses, neglects or fails to take down, rebuild, repair, alter or amend any defective or unsatisfactory Work, or to remove any condemned material or workmanship, or to comply with any reasonable order in connection therewith that they may receive from the City; or
 - .10 fails to make prompt payment of wages to themselves, their employees, Subcontractor or accounts for the purchase or rental of material or Plant; or
 - .11 fails to promptly secure a discharge of a lien or trust claim, served upon the City, pursuant to The Builders' Liens Act, within thirty (30) calendar days after receipt of written notice of the claim from the City; or
 - .12 persistently disregards any laws, by-laws or regulations; or
 - .13 commits any other material breach of this Contract that in the opinion of the City indicates an unwillingness or inability upon the part of the Contractor to carry out the terms thereof.
- GC22.2 Upon such notice being given to the Contractor, they shall be subject to any conditions stipulated in the notice, immediately discontinue the Work or any part or parts thereof specified in the notice.
- GC22.3 The Surety may, at its option, assume this Contract in respect of the whole of the Work, or the portion thereof specified in the notice on which the City has ordered the Contractor to discontinue the Work, as the case may be, and proceed to perform same, and may with the written consent of the City sublet the Work or portion of the Work so taken over; provided however that the Surety shall exercise its option, if at all, within fourteen (14) calendar days after written notice to discontinue the Work has been served upon the Contractor and a copy of same upon the Surety or the local agent of the latter.
- GC22.4 The Surety in such event shall take the Contractor's place in all respects, shall be bound by all terms and conditions of Contract Documents and shall be paid by the City in accordance with the terms of the Contract for all Work performed by it.

- GC22.5 If the Surety does not within fourteen (14) calendar days exercise its right and option to assume the Contract as aforesaid or if there is no Surety, then the City shall have the power to complete by contract or otherwise as it may determine, the Work hereinbefore referred to or such portion of it as the City may deem necessary, and the Contractor agrees that the City shall have the right to take possession of and use any of the materials, Plant, supplies and property of every kind provided by the Contractor for the purpose of the Work and to procure other Plant and materials for the completion of the same. The City shall not be required to obtain the lowest price for the Work taken over from the Contractor.
- GC22.6 If the Work or any part hereof is taken out of the Contractor's control, all Plant and material and the interest of the Contractor in all licences, powers and privileges acquired, used or provided by the Contractor under the Contract shall be assigned by the Contractor to the City without compensation to the Contractor. When the Engineer certifies that any Plant, material, or any interest of the Contractor referred to above is no longer required for the purpose of the Work, or that it is not in the best interest of the City to retain that Plant, material, or interest, it shall revert to the Contractor.
- GC22.7 If the cost to the City, as certified by the Engineer, of completing the Work or portion thereof as aforesaid, be less than the amount to which the Contractor would have been entitled under the Contract for so doing, the Contractor shall have no claims in respect thereof against the City. If such certified cost of the Work performed by the City is more than the amount to which the Contractor would have been entitled under the Contract for the same Work, then the City shall have a claim against the Contractor for all additional costs of the Work that have been incurred by the City in addition to the amount of any liquidated damages that the City is entitled to hereunder from the date fixed for Final Completion of the Work in the Contract Documents and the Contractor shall pay the amount of such cost of the Work together with liquidated damages as provided for herein to the City upon notice from the City setting out the amount so due. When any particular part of the Work is being carried on by the City, by contract or otherwise, under the provisions of this Clause, the Contractor shall continue the remainder of the Work in conformity with the terms and conditions of the Contract, and in such manner as in no way to hinder or interfere with the Other Contractor, or workers employed by the City.

- GC22.8 If the whole or any part of the Work is taken out of the Contractor's hands, the Contractor's right to any further payment that is due or accruing due under the Contract is extinguished, and the Contractor is liable to pay the City, upon demand, an amount that is equal to the amount of all loss and damage incurred or sustained by the City in respect of the Contractor's failure to complete the Work.
- GC22.9 The taking of the Work or any part thereof out of the Contractor's control pursuant to the above does not relieve or discharge the Contractor from any obligation under the Contract or imposed upon them by law except the obligation to complete the performance of that part of the Work that was taken out of the Contractor's control.
- GC22.10 If the Contractor disagrees with any decision or direction of the Engineer on any of the foregoing matters, the Contractor shall comply with the decision or direction of the Engineer but may appeal the decision in accordance with GC23 Dispute Resolution.

GC23. DISPUTE RESOLUTION

Compliance with Engineer's Decision

- GC23.1 If the Contractor disagrees with any decision or direction of the Engineer, the Contractor shall nonetheless comply with the decision or direction of the Engineer.
- GC23.2 Such compliance by the Contractor shall not be construed as an admission by the Contractor of the correctness of that decision or direction, or prevent the Contractor from appealing the decision or direction that is the subject of the protest.

Appeals

- GC23.3 If the Contractor disagrees with any decision or direction of the Engineer, the Contractor must, within seven (7) calendar days after receiving the notice of the Engineer's decision or direction, notify the City in writing of their contention with respect thereto and request a determination thereon from the City Manager.

- GC23.3.1 Such notice shall set forth particulars of the matters in dispute, and if applicable, state the probable extent and value of the damages and the relevant provisions of the Contract Documents.
- GC23.3.2 If the Contractor fails to so notify the City for a determination within seven (7) calendar days after receiving the notice of the Engineer's decision or direction, the Contractor shall be deemed to have waived any said claim. Oral appeals or oral protests shall not amount to substantial compliance with any of the provisions of this Clause.
- GC23.4 If the Contractor disagrees with the determination of the City Manager, the Contractor must within seven (7) calendar days after receiving notice of the City Manager's determination, notify the City in writing of their contention with respect thereto.
- GC23.4.1 If the Contractor fails to so notify the City within seven (7) calendar days after receiving the notice of the City Manager's determination, the Contractor shall be deemed to have waived any said claim. Oral appeals or oral protests shall not amount to substantial compliance with any of the provisions of this Clause.
- GC23.5 If the Contractor neglects or fails to observe fully and faithfully the above conditions, they shall forfeit all right to any claim for additional payment therefore over and above that approved by the Engineer, or any other remedy that the Contractor otherwise might have had, and shall not make any claim in respect thereof, and if made, the City may reject the same as invalid and they shall not have any right of recovery in respect thereof, at law or otherwise.

Arbitration

- GC23.6 If at any time during the period that this Contract is in force or after the dissolution or determination thereof, any dispute, difference or question shall arise between the City and the Contractor regarding this Contract or the accounts or transaction thereof, or the construction, meaning or effect of these presents or otherwise in relation to the premises, then every such dispute, difference or question shall be referred to arbitration.
- GC23.7 The Arbitration Act, C.C.S.M. c. A120 shall apply to the arbitration in all respects except as expressly otherwise provided in these General Conditions.

- GC23.8 No arbitration shall proceed before the date of Substantial Performance of the Work unless both the City and the Contractor agree that the matter in dispute requires immediate consideration while evidence is available, or in the case of legal proceedings, or where the action may become proscribed by reason of delay.
- GC23.9 Except as hereinafter provided otherwise, the arbitral tribunal shall be composed of three arbitrators, one to be appointed by each party to the reference and the third to be appointed by the first named two arbitrators in writing before they enter upon the business of the reference.
- GC23.10 Either party may notify the other party in writing of their desire to submit the difference, dispute or question to arbitration. Said notice shall name the arbitrator appointed by the party giving notice.
- GC23.11 The party receiving the notice shall, within ten (10) calendar days, reply to the party giving the notice, and name the arbitrator appointed by the party receiving the notice.
- GC23.12 The two arbitrators appointed shall within ten (10) calendar days of the date on which the last of them was appointed, appoint a third arbitrator who shall be the chairperson of the arbitral tribunal.
- GC23.13 If the party receiving the notice refuses or neglects to appoint an arbitrator within ten (10) calendar days, then the arbitrator first appointed shall proceed to hear and determine the matters in difference as if they were an arbitrator appointed by both parties for that purpose, and the award or determination shall be made by the said arbitrator.
- GC23.14 The chairperson of the arbitral tribunal, or the single arbitrator pursuant to GC23.13, shall determine the procedure to be followed in the arbitration.
- GC23.15 Except as hereinafter provide otherwise, the City and the Contractor shall each bear all costs and expenses associated with the appointment of its arbitrator. The City and the Contractor shall bear all other costs and expenses associated with the arbitration equally.
- GC23.15.1 If, pursuant to GC23.13, the arbitral tribunal is composed of one arbitrator, the City and the Contractor shall bear all costs and expenses associated with the appointment of the arbitrator equally.

SUPPLEMENTAL CONDITIONS

SC1. SUPPLEMENTAL CONDITIONS

- SC1.1 In addition to the General Conditions, these Supplemental Conditions are applicable to the Work of the Contract.

SC2. WORKPLACE SAFETY AND HEALTH

COR / SECOR Certification

- SC2.1 The Contractor shall have a valid COR or SECOR Certification under the Certificate of Recognition (COR) Program or Small Employer Certificate of Recognition (SECOR) Program administrated by the Construction Safety Association of Manitoba (CSAM) or under the WORKSAFELY Program administrated by the Manitoba Heavy Construction Association (MHCA).
- SC2.1.1 The Contractor shall, within five (5) Business Days of a request by the Engineer, provide proof satisfactory to the Engineer that the Contractor has a valid COR or SECOR.
- SC2.1.2 The Contractor shall, at least five (5) Business Days prior to the commencement of any Work on the Site, provide the Engineer with a Safe Work Plan that identifies the hazards associated with the specific tasks of the contract work and details the steps the Contractor will take to control each hazard.

SC3. CONTRACTOR DECLARATION

- SC3.1 Further to GC5, the Contractor declares that in bidding for the Work and in entering into the Contract, they are aware of the Orders issued under the section 67 of the Public Health Act and have taken all necessary steps to ensure compliance with said Orders. The Contractor shall regularly check the Province of Manitoba webpage for updates and ensure compliance with any future Orders. As Prime Contractor, the Contractor shall ensure Subcontractors are also in compliance.

SC4. INSURANCE

- SC4.1 Further to GC11, the Contractor shall provide and maintain the following insurance:

.1 Workers Compensation Board Coverage:

Workers Compensation Board of Manitoba registration must be current and in good standing. Coverage shall be maintained throughout the term of the Contract, and shall provide evidence thereof to the City of Brandon upon request.

.2 General Liability Insurance:

General Liability Insurance shall be in the name of the Contractor, with the City as an additional insured, but only with respect to liability arising out of the operations of the Contractor with regard to the Work (excluding any legal liability arising out of the sole negligence of the City), with limits of not less than five million dollars (\$5,000,000) per occurrence, an aggregate limit of not less than five million dollars (\$5,000,000) within any policy year with respect to completed operations. The insurance coverage and the form of this insurance shall be at least equal to the latest edition of IBC Form 2100, including an extension for a standard provincial and territorial form of non-owned automobile liability policy and the latest edition of the relevant Canadian Construction Documents Committee (CCDC) endorsement form, and shall be maintained continuously from commencement of the Work until the date of the expiry of the Warranty Period, and with respect to Completed Operations Coverage for a period of not less than six (6) years from the date on which the Warranty Period expires.

.3 Automobile Liability Insurance:

Automobile Liability Insurance in respect of vehicles that are required by law to be insured under a contract by a Motor Vehicle Liability Policy, shall have limits of not less than five million dollars (\$5,000,000) inclusive per occurrence for bodily injury, death, and damage to property, covering all vehicles owned or leased by the Contractor, in the following forms:

- .1 Standard Non-Owned Automobile Policy including Standard Contractual Liability Endorsement. This may be attached to the General Liability Insurance policy.
- .2 Standard Owner's Form Automobile Policy providing Third Party Liability and Accident Benefits Insurance and covering licensed vehicles owned or leased by the Contractor.

The Automobile Liability Insurance shall be maintained continuously from commencement of the Work until the date of the expiry of the Warranty Period.

.4 Contractors Pollution Liability Insurance:

The Contract shall obtain and maintain Contractors Pollution Liability insurance in respect to the Work with minimum coverage of one million dollars (\$1,000,000) per occurrence.

SC5. INSPECTION

SC5.1 Further to GC14, unless otherwise authorized by the Engineer, the following construction operations shall not be performed without the Engineer present on the Site:

- .1 Pipe laying; or
- .2 Backfilling; or
- .3 Placing Concrete; or
- .4 Placing Asphalt Pavement; or
- .5 Construction involving existing works or utilities.

SC6. WORK SCHEDULE

SC6.1 Further to GC18.4, the Contractor shall schedule and perform the Work to complete the Work at the Site in a timely manner.

SC6.1.1 Unless otherwise authorized by the Engineer, the Work at each Site shall be performed in a continuous manner from commencement to completion.

SC7. PAYMENT

SC7.1 Further to GC17.1.2, the Contractor shall provide the Engineer with a detailed breakdown of the Contract Lump Sum Price at least two (2) Business Days before the commencement of Work but in no event later than ten (10) Business Days after award of Contract.

SC7.1.1 The detailed breakdown is provided merely to assist the Engineer in preparing monthly progress estimates and shall not be construed as Contract Unit Prices.

SC7.2 Further to GC17.3, the Contractor shall make arrangements with the City to receive payment by direct deposit to the Contractor's account at a financial institution, payment will be made by electronic funds transfer on the stipulated date.

SCOPE OF WORK

PART 1: GENERAL

1.1 OTHER CONTRACT DOCUMENTS

- .1 The General Conditions, Supplemental Conditions, Specifications, Drawings, and other Contract Documents apply to and form part of this Section. Conflicts shall be resolved in accordance with the order of precedence established in the Contract Documents.
- .2 Where the City of Brandon Standard Construction Specifications refer to the Supplemental Conditions or the Special Provisions, it shall now mean Section 01002, Scope of Work.

1.2 THE WORK

- .1 The Work consists of supplying all labour, materials, equipment, tools, supervision, transportation, and incidentals necessary to complete the Sawatzky Sculpture Park Spur Paths project at the Riverbank Discovery Centre, 545 Conservation Drive, Brandon, Manitoba.
- .2 The Work generally includes, but is not necessarily limited to:
 - .1 Mobilization, demobilization, tree protection, public protection, temporary access, site cleanup, and restoration.
 - .2 Removals, site preparation, excavation, grading, shaping, trimming, subgrade preparation, disposal of surplus or unsuitable material, and placement of imported fill where authorized by the Engineer.
 - .3 Construction of granular trails and node surfaces, including granular base, crushed limestone surfacing, compaction, finishing, and tie-ins to existing paths, grades, and surfaces.
 - .4 Supply and installation of the 200 mm diameter corrugated steel pipe culvert, including excavation, bedding, pipe, couplers, backfill, compaction, drainage tie-ins, grading, and restoration.
 - .5 Construction of boulder retaining walls, including excavation, subgrade preparation, non-woven geotextile, sand bedding, boulders, perforated drainage pipe, granular backfill, compaction, grading, and restoration.
 - .6 Construction of three cast-in-place concrete foundations for the owner-supplied wolf sculptures and one cast-in-place concrete foundation for the canoe sculpture, including layout, excavation, subgrade preparation, granular base, reinforcing steel, formwork, concrete placement, finishing, curing, protection, and restoration.
 - .7 Receiving, protecting, handling, transporting on the Site, positioning, and installing three owner-supplied wolf sculptures on the completed concrete foundations.
 - .8 Topsoil placement, fine grading, seeding, sodding, watering, maintenance, protection of existing Site features, and all other Work shown on the Drawings or required to complete the Work in accordance with the Contract Documents.

1.3 SCHEDULE OF WORK

- .1 Before commencing Work, the Contractor shall submit a proposed Schedule of Work identifying the anticipated dates and sequence for tree and public protection, removals and grading, culvert

SCOPE OF WORK

and retaining wall construction, granular trail construction, concrete foundations, wolf sculpture installation, landscaping, restoration, cleanup, and Final Completion.

- .2 The Contractor shall provide the notice required by the Contract Documents before commencing Work or performing an operation requiring inspection. Once commenced, the Work shall proceed continuously and diligently to minimize disruption to the Riverbank Discovery Centre, existing pathways, and surrounding public areas.
- .3 The Contractor shall sequence and coordinate the Work to protect completed construction and minimize repeated disturbance of existing pathways, turf, landscaping, and other Site features.
- .4 The wolf sculptures shall not be delivered or installed until the concrete foundations have achieved the required strength, the foundations have been accepted for installation by the Engineer, and the delivery and installation have been coordinated with the Engineer and sculpture artist.

1.4 SITE CONDITIONS & COORDINATION

- .1 The Site is an active public park and trail environment. The Contractor shall not assume exclusive use of the Site and shall coordinate the Work to maintain public safety and access to areas outside the limits of construction.
- .2 The Contractor shall provide and maintain temporary fencing, barricades, signage, and other measures required to isolate the Work and protect the public, existing trees, pathways, landscaping, utilities, irrigation systems, structures, and other Site features.
- .3 Construction access, equipment movement, deliveries, stockpiling, and staging shall be coordinated with the Engineer and limited to approved routes, areas, and limits of construction. The Site shall be maintained in a clean, safe, and orderly condition.
- .4 Damage caused by the Contractor to existing Site features shall be repaired at the Contractor's expense and to the satisfaction of the Engineer.
- .5 Instructions, clarifications, approvals, and directions affecting the Work shall be issued through the Engineer. Communications with the Riverbank Discovery Centre, design consultant, sculpture artist, utility companies, or other parties shall not authorize a change in the Work unless confirmed in writing by the Engineer.

1.5 EXISTING UTILITIES

- .1 Existing utilities and services shown on the Drawings are approximate. Before excavation, grading, drilling, or other ground disturbance, the Contractor shall arrange for utility locates, verify the location of existing utilities, services, and irrigation systems, and expose them where required to confirm their alignment and depth.
- .2 The Contractor shall verify dimensions, elevations, grades, utility locations, and existing Site conditions before beginning the affected Work and shall immediately report discrepancies, conflicts, unmarked services, or damage to the Engineer.
- .3 The Contractor shall protect and temporarily support utilities and services affected by the Work. Utility locating, coordination, exposure, protection, temporary support, and repair of damage caused by the Contractor shall be incidental to the Work unless identified as a separate pay item.

1.6 LAYOUT

- .1 The Contractor shall lay out the Work using the dimensions, elevations, and information shown on the Drawings and shall obtain the Engineer's acceptance of the following before construction.

SCOPE OF WORK

- .1 Granular trail limits and alignments;
 - .2 Culvert location and invert elevations;
 - .3 Boulder retaining wall alignments and elevations; and
 - .4 Wolf and canoe sculpture foundation locations and elevations.
- .2 Acceptance of the layout by the Engineer shall not relieve the Contractor of responsibility for the accuracy of the Work.

1.7 WORK BY OTHERS AND SCULPTURE COORDINATION

- .1 The three wolf sculptures will be supplied and delivered to the Site by Others. Stainless steel mounting rods and lifting straps will also be supplied by Others where identified in the Contract Documents.
- .2 The Contractor shall coordinate delivery and installation with the Engineer and sculpture artist and shall provide the labour, equipment, tools, materials, and incidentals required to receive, inspect, protect, temporarily store if required, transport on the Site, lift, position, align, and install the sculptures.
- .3 The sculpture artist may attend the installation to assist with orientation, positioning, and mounting requirements. This involvement does not relieve the Contractor of responsibility for construction means, methods, equipment, handling, safety, or installation.
- .4 The Contractor shall provide at least five Working Days' notice before the proposed sculpture installation date and shall protect the sculptures until installation has been accepted by the Engineer.

1.8 ALTERNATE BOULDER MATERIAL

- .1 The Base Bid shall be based on supplying and installing the granite blast-rock boulders specified in the Contract Documents.
- .2 An Alternate Price may be submitted for substituting the specified granite blast-rock boulders with another natural stone meeting the requirements of the Tender Form and Contract Documents.
- .3 Submission of an Alternate Price does not constitute acceptance of the proposed material. Alternate stone shall not be supplied or installed unless the material and Alternate Price have been accepted in writing by the City.
- .4 Unless otherwise accepted in writing, all retaining wall dimensions, elevations, drainage, bedding, backfill, installation, and performance requirements shall remain unchanged.

PART 2: PRODUCTS

2.1 GENERAL

- .1 Materials and products shall conform to the Drawings, applicable City of Brandon Standard Construction Specifications, and other Contract Documents. Proposed substitutes and alternate materials shall be submitted and accepted in accordance with the Tender Documents before being incorporated into the Work.

SCOPE OF WORK

2.2 IMPORTED FILL

- .1 Imported Fill shall be Granular Backfill conforming to City of Brandon Standard Construction Specification 02210, Excavation, Bedding and Backfill.

PART 3: EXECUTION

3.1 GENERAL

- .1 Complete the Work in accordance with the Drawings, applicable City of Brandon Standard Construction Specifications, and other Contract Documents. Provide positive drainage, smooth transitions to existing surfaces, and restoration of disturbed areas to equal or better condition than existed before construction.

3.2 MOBILIZATION AND DEMOBILIZATION

- .1 Mobilize the labour, equipment, materials, temporary works, access controls, and facilities required to complete the Work. Upon completion, remove temporary works, equipment, surplus materials, and debris from the Site.

3.3 REMOVALS, SITE PREPARATION AND GRADING

- .1 Complete removals, excavation, grading, shaping, trimming, subgrade preparation, disposal of surplus or unsuitable material, and other site preparation required to achieve the lines, grades, elevations, and limits shown on the Drawings.

3.4 IMPORTED FILL

- .1 Place imported fill only where required by the Drawings or authorized by the Engineer. Obtain the Engineer's acceptance of the underlying surface before placing fill.
- .2 Place, moisture-condition, grade, and compact imported fill in accordance with the applicable City of Brandon Standard Construction Specifications. Do not place fill over frozen, saturated, unsuitable, or unapproved material.
- .3 Notify the Engineer before placing imported fill and provide access for measurement, inspection, and testing. Fill placed without prior authorization or before the quantity can be verified will not be measured for payment.

3.5 GRANULAR TRAIL CONSTRUCTION

- .1 Construct granular trails and node surfaces to the dimensions, grades, elevations, materials, thicknesses, and compaction requirements shown on the Drawings. Work shall include preparation and compaction of the subgrade, placement and compaction of granular base and crushed limestone surfacing, finished grading, and smooth tie-ins to existing paths and adjacent surfaces.

3.6 CULVERT INSTALLATION

- .1 Install the 200 mm diameter corrugated steel pipe culvert at the location, length, grade, and invert elevations shown on the Drawings. Complete excavation, bedding, pipe placement, jointing, backfilling, compaction, inlet and outlet grading, drainage tie-ins, and restoration without damaging or displacing the culvert.

SCOPE OF WORK

- .2 Obtain the Engineer's acceptance of the culvert alignment, bedding, pipe installation, and invert elevations before backfilling or covering the Work.

3.7 BOULDER RETAINING WALL

- .1 Construct boulder retaining walls to the alignments, elevations, dimensions, and details shown on the Drawings. Work shall include excavation, subgrade preparation, non-woven geotextile, sand bedding, boulder placement, granular backfill, perforated drainage pipe, compaction, grading, and restoration.
- .2 Select, orient, fit, and securely place the boulders to provide a stable, continuous, and visually consistent wall. Daylight the drainage pipe at the wall ends and provide positive drainage away from the wall.
- .3 Where the City accepts the Alternate Price for alternate boulder material, use the accepted stone in place of the specified granite blast-rock boulders. All other retaining-wall requirements shall remain unchanged unless otherwise accepted in writing by the Engineer.

3.8 CONCRETE FOUNDATIONS

- .1 Construct the three wolf sculpture foundations and canoe sculpture foundation at the locations, dimensions, elevations, reinforcement, finishes, and details shown on the Drawings and in accordance with City of Brandon Standard Construction Specification 02514, Concrete Construction.
- .2 Obtain the Engineer's acceptance of the foundation layout, subgrade, granular base, formwork, and reinforcing steel before placing concrete. Protect and cure completed concrete and repair or replace damaged or deficient Work as directed by the Engineer.
- .3 Provide the exposed aggregate finish and surrounding restoration for the canoe sculpture foundation as shown on the Drawings.

3.9 WOLF SCULPTURE INSTALLATION

- .1 Coordinate the delivery and installation of the three owner-supplied wolf sculptures with the Engineer and sculpture artist. Jointly inspect the sculptures upon delivery and promptly document visible damage or deficiencies.
- .2 Receive, protect, handle, transport on the Site, lift, position, align, and install the sculptures in accordance with the Drawings and accepted installation requirements. Use the mounting rods and lifting straps supplied by Others where identified in the Contract Documents.
- .3 Do not drill into the foundations or install the sculptures until the concrete has achieved the required strength and the Engineer has accepted the foundations for installation. Protect the sculptures, foundations, and adjacent Work throughout installation.

3.10 TOPSOIL, SEED AND SOD

- .1 Complete topsoil placement, fine grading, seeding, sodding, watering, establishment, and maintenance in accordance with the Drawings and applicable City of Brandon Standard Construction Specifications.
- .2 Repair settlement, washouts, erosion, unsuccessful growth, damaged sod, and other deficiencies until the landscaped areas have been accepted by the Engineer.

SCOPE OF WORK

- .3 Where seasonal or Site conditions prevent topsoil, seed, or sod Work from being completed in accordance with the Contract Documents, the Engineer may defer the affected Work to the next suitable growing season. Before the seasonal shutdown, the Contractor shall leave the affected areas graded, stable, erosion-resistant, and safe for public use.
- .4 Deferred Work shall be completed as soon as conditions are suitable in the following spring, on a date accepted by the Engineer. The Contractor shall protect and maintain the affected areas until the deferred Work is completed and accepted.

3.11 TREE AND SITE PROTECTION

- .1 Install tree and public protection before beginning adjacent construction and maintain the protection until the affected Work is complete and removal is authorized by the Engineer.
- .2 Do not store materials, operate or park equipment, excavate, alter grades, or cut branches or roots within protected tree areas unless authorized by the Engineer. Repair damage caused by construction operations at the Contractor's expense.

3.12 CLEANUP AND RESTORATION

- .1 Remove surplus material, waste, debris, temporary works, and equipment from the Site. Restore disturbed pathways, turf, landscaping, drainage, utilities, irrigation systems, structures, and other Site features to equal or better condition than existed before construction.

END OF SECTION

MEASUREMENT & PAYMENT

PART 1: GENERAL

1.1 OTHER CONTRACT DOCUMENTS

- .1 The General Conditions of the Contract, the Supplemental Conditions, Specifications, and Drawings attached hereto shall apply to and be part of this Section. If there is any conflict between this Section and either of the above, this Section shall govern.

1.2 MEASUREMENT

- .1 Measurement for payment shall be based on quantities of Work acceptably completed and measured or verified by the Engineer.
- .2 Items measured in linear metres shall be measured to the nearest whole metre, and items measured in square or cubic metres shall be measured to the nearest whole square or cubic metre.
- .3 Lump Sum items shall be measured based on the percentage of Work acceptably completed, as determined by the Engineer.
- .4 Work shown on the Drawings or required by the Contract Documents but not identified as a separate item in the Unit Price Schedule shall be incidental to the applicable Unit Price or Lump Sum item.

PART 2: PRODUCTS

2.1 NONE

PART 3: EXECUTION

3.1 MOBILIZATION / DEMOBILIZATION

- .1 Measurement for Mobilization / Demobilization shall be Lump Sum.
- .2 Payment shall include project startup; permits, notifications, coordination, and submittals; mobilization and demobilization of labour, equipment, materials, temporary facilities, and temporary works; establishment and maintenance of construction access, staging, fencing, barricades, signage, public-protection measures excluding tree-specific protection paid under Tree Protection; maintenance of the Site; final cleanup; and removal of temporary works.
- .3 Payment shall be made as follows:
 - .1 50 percent upon initial mobilization to the Site;
 - .2 25 percent when the Engineer determines that 50 percent of the Contract Work has been completed; and
 - .3 25 percent upon Final Completion.

MEASUREMENT & PAYMENT

3.2 TREE PROTECTION

- .1 Measurement for Tree Protection shall be Lump Sum.
- .2 Payment shall include layout, supply, installation, maintenance, approved relocation, and removal of tree protection; protection of trunks, branches, and roots; coordination of Work near protected trees; and repair or replacement of damaged or displaced protection
- .3 No separate payment will be made for maintaining tree protection throughout construction.

3.3 REMOVALS, SITE PREPARATION AND GRADING

- .1 Measurement for Removals, Site Preparation and Grading shall be Lump Sum.
- .2 Payment shall include removals; stripping and stockpiling of topsoil where required; excavation; grading, shaping, and trimming; preparation and compaction of subgrade or common fill; disposal of surplus, unsuitable, or removed material; dewatering; dust and erosion control; and other site preparation required to achieve the lines, grades, elevations, and limits shown on the Drawings.
- .3 Imported fill measured under Item 3.4 and work specifically included in another Unit Price or Lump Sum item will not be included in this item.

3.4 IMPORTED FILL

- .1 Measurement for Imported Fill shall be based on the actual number of cubic metres acceptably supplied, placed, and compacted, measured in its final compacted position.
- .2 Payment shall include sourcing, testing where required, loading, transportation, unloading, placement, moisture conditioning, grading, compaction, and all other operations required to incorporate the material into the Work.
- .3 Imported fill shall be measured for payment only where required by the Drawings or authorized by the Engineer before placement. No payment will be made for material placed for the Contractor's convenience, material used to replace over-excavation, or material included in another pay item.

3.5 GRANULAR TRAIL CONSTRUCTION

- .1 Measurement for Granular Trail Construction shall be based on the actual number of square metres of completed granular trail and node surfaces acceptably supplied and installed, measured horizontally along the finished surface.
- .2 Payment shall include final preparation and compaction of the subgrade; supply, placement, grading, and compaction of granular base and crushed limestone surfacing; finished grading; adjustment of materials to achieve the required lines and grades; tie-ins to existing paths and adjacent surfaces; dust control; and cleanup.
- .3 Excavation, bulk grading, and other general site preparation are included under Removals, Site Preparation and Grading. No separate payment will be made under this item for minor trimming, correction, or preparation required immediately before placing the granular trail assembly.

MEASUREMENT & PAYMENT

3.6 SUPPLY AND INSTALL 200 MM DIAMETER CSP CULVERT

- .1 Measurement for Supply and Install 200 mm Diameter CSP Culvert shall be Each for the complete culvert installation shown on the Drawings.
- .2 Payment shall include layout; excavation and dewatering; bedding; supply and installation of pipe, couplers, and fittings; jointing; backfill and compaction; inlet and outlet grading; drainage tie-ins; erosion protection where shown; restoration of adjacent surfaces; testing and inspection coordination; and cleanup.
- .3 No separate payment will be made for adjustments to the culvert length required to complete the installation at the location and between the limits shown on the Drawings.

3.7 BOULDER RETAINING WALL

- .1 Measurement for Boulder Retaining Wall shall be based on the actual number of linear metres of completed wall acceptably supplied and installed, measured horizontally along the face of the wall.
- .2 Payment shall include layout; excavation; subgrade preparation; non-woven geotextile; sand bedding; supply, selection, handling, fitting, and placement of boulders; granular backfill; perforated drainage pipe and daylight outlets; compaction; grading; restoration; and cleanup.
- .3 No separate payment will be made for the geotextile, sand bedding, granular backfill, drainage pipe, excavation, compaction, grading, or restoration forming part of the wall assembly.
- .4 The Base Bid Unit Price shall apply to the granite blast-rock boulders specified in the Contract Documents.
- .5 If the City accepts the Alternate Price for alternate boulder material, the accepted alternate Boulder Retaining Wall Unit Price shall replace the Base Bid Unit Price for the quantity of wall acceptably completed using the alternate material. All other measurement and payment requirements for the wall shall remain unchanged.

3.8 TOPSOIL AND SEED

- .1 Measurement for Topsoil and Seed shall be based on the actual number of square metres acceptably completed, measured horizontally along the finished surface.
- .2 Payment shall include rough and fine grading; preparation of the seedbed; supply, placement, and finishing of topsoil; supply and application of seed, fertilizer, mulch, tackifier, and other specified establishment materials; watering; maintenance; repair of settlement, erosion, washouts, poor establishment, and failed areas; and cleanup.

3.9 TOPSOIL AND SOD

- .1 Measurement for Topsoil and Sod shall be based on the actual number of square metres acceptably completed, measured horizontally along the finished surface.
- .2 Payment shall include rough and fine grading; supply, placement, and finishing of topsoil; supply and installation of sod; rolling, joint filling, fastening where required, watering, fertilizing, weed and pest control, mowing, maintenance, repair of settlement or failed areas, and cleanup.

MEASUREMENT & PAYMENT

3.10 WOLF SCULPTURE CONCRETE FOUNDATIONS

- .1 Measurement for Wolf Sculpture Concrete Foundations shall be Lump Sum for all three completed foundations.
- .2 Payment shall include layout and coordination; excavation and disposal of surplus material; subgrade preparation and compaction; granular base; formwork; reinforcing steel; concrete supply, placement, finishing, curing, and protection; testing and inspection coordination; restoration around the foundations; and cleanup.
- .3 Payment shall also include maintaining the completed foundations in a condition suitable for installation of the wolf sculptures.

3.11 INSTALL OWNER-SUPPLIED WOLF SCULPTURES

- .1 Measurement for Install Owner-Supplied Wolf Sculptures shall be Lump Sum for the complete installation of all three sculptures.
- .2 Payment shall include coordination with the Engineer and sculpture artist; receiving and jointly inspecting the sculptures; temporary storage and protection where required; handling and transportation on the Site; lifting, positioning, and alignment; drilling and cleaning mounting holes; supply and placement of anchoring epoxy and incidental installation materials; installation of mounting rods supplied by Others; final adjustment and stabilization; protection until acceptance; and cleanup.
- .3 Payment shall include all labour, equipment, lifting equipment, tools, and incidentals required to complete the installation. No separate payment will be made for delay or additional handling caused by the Contractor's failure to coordinate delivery and installation.
- .4 Damage occurring while the sculptures are in the Contractor's care, custody, or control shall be repaired or replaced at the Contractor's expense, except where the Contractor has documented that the damage existed at the time of delivery.

3.12 CANOE SCULPTURE CONCRETE FOUNDATION

- .1 Measurement for Canoe Sculpture Concrete Foundation shall be Lump Sum.
- .2 Payment shall include layout and coordination; removal of topsoil and vegetation; excavation and disposal of surplus material; subgrade preparation and compaction; granular base; formwork; reinforcing steel; concrete supply, placement, exposed aggregate finishing, curing, and protection; testing and inspection coordination; grading and restoration around the foundation; and cleanup.

3.13 INCIDENTAL WORK

- .1 Unless identified as a separate item in the Unit Price Schedule, the following shall be incidental to the applicable Unit Price or Lump Sum items:
- .2 Layout, survey, and field verification;
- .3 Minor excavation, grading, shaping, trimming, and tie-ins;

MEASUREMENT & PAYMENT

- .4 Utility locating, coordination, exposure, and protection;
- .5 Protection of existing trees, pathways, landscaping, utilities, irrigation systems, structures, and other Site features, except tree protection measured under Item 3.2;
- .6 Dewatering, dust control, and erosion and sediment control;
- .7 Temporary access and protection measures not included under Mobilization and Demobilization;
- .8 Disposal of surplus material arising directly from the applicable pay item;
- .9 Cleanup and restoration; and
- .10 Other Work required to provide a complete and functional installation in accordance with the Contract Documents.
- .11 Work expressly included in one pay item shall not be measured or paid under another pay item.

END OF SECTION

COMMON REQUIREMENTS

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is in addition to the other Sections of the Standard Construction Specifications (Specifications).

1.2 DEFINITIONS

- .1 The definitions included herein are in addition to those contained within the General Conditions and Supplemental Conditions of the City of Brandon Contract Documents.
- .2 Where used in the Standard Construction Specifications and other documents forming part of the Contract Documents:
 - .1 “Agreement” means the portion of the Contract Documents by that name.
 - .2 “Business Day” means any day, other than a Saturday, Sunday, Statutory Holiday or Civic Holiday as observed by the City.
 - .3 “Change in Work” means an addition, deletion, or modification to the Contract Documents as awarded and included modifications to the quantity or nature of Work, the manner of performance or any part of the Work, price, time or schedule.
 - .4 “Change Order” or “CO” means a written order issued by the City that sets out a Change in Work after the Contractor has provided cost and schedule implications through a Proposed Change Notice.
 - .5 “City” or “City of Brandon” means the City of Brandon of the Province of Manitoba as continued under the Brandon Charter, SM 1989-90, c. 71, and any subsequent amendments thereto.
 - .6 “City-contracted Work” means any Work being completed under a Contract between the City of Brandon and a Contractor.
 - .7 “Consulting Engineer” means the firm or person employed by the Developer for the designs, drawings, specifications and supervision of the works necessary to be carried out by the Developer and the City of Brandon.
 - .8 “Contractor” means the person who has undertaken the performance of the Work under the terms of the Contract, or who has been given the City’s permission to do Work on City owned property or right-of-way. Includes all individuals provided to perform services under the contract including employees, representatives and consultants of the Contractor or subcontractor and any other individual the Contractor is responsible for by law. Also referred to as the “Prime Contractor” or “Contractor Personnel”.
 - .9 “Developer” means the person who has taken financial responsibility of completing Private-contracted work.
 - .10 “Engineer” means the City Engineer or the City of Brandon Engineering Department and includes any person duly authorized by him to perform on his behalf any functions of the Contract.
 - .11 “Field Instruction” or “FI” means a written instruction or sketch to clarify the Contract Documents.

COMMON REQUIREMENTS

- .12 “Field Order” or “FO” means a written order issued by the City that sets out a Change in Work before the Contractor has provided cost and schedule implications through a Proposed Change Notice. The method of determining the cost shall be included.
- .13 “Final Completion of the Work” means that the entire Work, except for Warranty Items, have been performed in accordance with the Contract.
- .14 “Prime Contractor” means the Prime Contractor as defined in the Workplace Safety and Health Act, C.C.S.M. c. W210.
- .15 “Private-contracted Work” means any Work being completed in current or future City of Brandon right-of-way, easements, City-owned private property, or property owned by others.
- .16 “Products” means any tangible or intangible personal property to be supplied by the Contractor as a deliverable under the Contract whether by purchase, hire, hire-purchase, license or otherwise.
- .17 “Proposed Change Notice” or “PCN” means a written request by the Engineer, detailing a potential Change in Work being contemplated for which the Contractor shall provide cost and schedule implications to the Engineer for evaluation prior to deciding if the Change in Work shall proceed as proposed.
- .18 “Safe Work Plan” means a procedure for executing tasks that considers the risks and hazards that may arise and defines the control measures to mitigate hazards.
- .19 “Site” means lands, buildings or other places owned, occupied or used by the City and designated by the City for the delivery and/or installation of Products, or the provision of services.
- .20 “Street” means any public highway as defined in the Municipal Act, C.C.S.M. c. M225.
- .21 “Subcontractor” means a person having a contract with the Contractor or another Subcontractor of the Contractor for the execution of a part of parts of the Work or who furnishes material called for in the Contract Documents.
- .22 “Submittal” or “Shop Drawing” means drawings, diagrams, illustrations, schedules, performance charts, brochures, lists, procedures, plans and other data which are to be provided by the Contractor to illustrate details of a portion of the Work.
- .23 “Substantial Performance of the Work” shall have the meaning attributed to it in The Builders’ Liens Act, C.C.S.M. c. B91, or if the Act is not applicable, shall mean when the Work is substantially complete and ready for use, or is being used for the purpose intended.
- .24 “Traffic Management Plan” means drawings, diagrams, schedules and procedures to be provided by the Contractor to ensure proper traffic control is implemented for the protection of road users and Contractor Personnel during temporary periods of street maintenance and construction.
- .25 “Work” means the carrying out and the doing of all things, whether of a temporary or permanent nature, that are to be done by the Contractor pursuant to the Contract Documents and includes the furnishing of all labour, superintendence, services, transportation, materials, Plant, equipment and articles necessary or incidental to the proper performance of the Contract Documents.

COMMON REQUIREMENTS

1.3 APPLICATION

- .1 The Standard Construction Specifications shall apply to both City-contracted Work and Private-contracted Work as defined herein.

1.4 CONTRACT DOCUMENTS

- .1 The Contractor shall keep at the Site and in good order, one (1) complete set of current Contract Documents, approved permits, submittals, change orders, reviewed shop drawings, field testing reports, work schedule, health and safety plan and any other project correspondence.
- .2 For City-contracted Work the following documents shall be collectively known as the “Contract Documents” (in order of precedence):
 - .1 The Agreement between the City and the Contractor;
 - .2 Supplemental Conditions of the Contract;
 - .3 General Conditions of the Contract;
 - .4 Special Provisions;
 - .5 Technical Specifications;
 - .6 The City of Brandon Standard Construction Specifications;
 - .7 Drawings prepared by the City of Brandon or a consultant working on behalf of the City of Brandon.
- .3 For Private-contracted Work; the following documents shall be collectively known as the “Contract Documents” (in order of precedence):
 - .1 The City of Brandon Standard Construction Specifications;
 - .2 The Development Agreement;
 - .3 Drawings stamped by Development Services or Engineering Department “Reviewed for Construction” as delegated by the Engineer.

1.5 LATEST VERSION SHALL APPLY

- .1 Where building codes, product or material specifications, Provincial or Federal laws, local ordinances and utility company regulations are quoted or implied, the latest issue as amended and revised to the date of the signing of the Agreement or commencing the Work shall apply, except where a specific date of issue is noted.

1.6 ACRONYMS

- .1 Within the text of the Specifications or standards reference may be made to the following organizations or documents.

AASHTO	American Association of State Highway Transportation Officials
ACI	American Concrete Institute
AISC	American Institute of Steel Construction
AISI	American Iron and Steel Institute
ANSI	American National Standards Institute
ASA	American Standards Association

COMMON REQUIREMENTS

ASME	American Society of Mechanical Engineers
ASTM	American Society for Testing and Materials
AWWA	American Water Works Association
AWS	American Welding Society
CEC	Canadian Electrical Code (published by CSA)
CEMA	Canadian Electrical Manufacturers Association
CGSB	Canadian Government Specifications Board
CISC	Canadian Institute of Steel Construction
CSPI	Corrugated Steel Pipe Institute
CSA	Canadian Standards Association
CWB	Canadian Welding Bureau
FCC	Fire Commissioner for Canada
GHS	Global Harmonized System of Classification and Labelling of Chemicals
IEEE	Institute of Electrical and Electronic Engineers
MBMA	Metal Building Manufacturers Association
ULC	Underwriters Laboratories of Canada
WHMIS	Workplace Hazardous Materials Information System
SDS	Safety Data Sheets
NBC	National Building Code of Canada
NFC	National Fire Code of Canada
PPE	Personal Protective Equipment
MUTCD	Manual of Uniform Traffic Control Devices
TTCM	City of Brandon Temporary Traffic Control Manual
TMP	Traffic Management Plan

1.7 ABBREVIATIONS

- .1 Words and abbreviations which have well known technical or trade meanings are used in the Contract Documents in accordance with such recognized meanings.
- .2 The following abbreviations shall apply to and be part of the Specifications:

ga	gauge (thickness)
°C	degree centigrade
%	percent
o.d.	outside diameter
i.d.	inside diameter
m	metre
sq	square
lm lin.m.	lineal metre
sq.m. m ²	square metre
cu.m. m ³	cubic metre
mm	millimetre
um	micrometer
cm	centimetre
km	kilometre
l	litre
l/s	litres per second
l/m	litres per minute
l/hr	litres per hour
mg	milligram
mg/l	milligram per litre
kg	kilogram
hr	hour
no or #	number
Pa	pascal
kPa	kilopascal

COMMON REQUIREMENTS

MPa	megapascal
ppm	parts per million
psi	pounds per square inch
j	joule
Kj	Kilojoule
rpm	revolutions per minute
hz	hertz
w	watt
kw	kilowatt
hp	horsepower
HDPE	high-density polyethylene
DI	ductile iron
PVC	polyvinyl chloride
CI	cast iron
SS	stainless steel
NPT	national pipe thread
RFI	request for information

PART 2: PRODUCTS

NONE

PART 3: EXECUTION

3.1 NOTICES, REVIEW TIME, ACTION ITEMS

- .1 Unless otherwise stated in the Contract Documents or agreed upon between the Engineer and Contractor, turnaround time for typical items shall be as follows:

Section	Item	Action by	Timing
01-020 Meetings	Schedule pre-construction meeting	Contractor or Engineer	1 week before commencement of Work
01-020 Meetings	Issue meeting minutes	Engineer	1 week after meeting
01-020 Meetings	Submit meeting minute review comments	Contractor	1 week after receipt of minutes
01-030 Submittals	Issue submittals to Engineer for review	Contractor	2 weeks before commencing that portion of Work
01-030 Submittals	Review submittals	Engineer	Review completed within 1 week of receipt, to allow time for resubmissions if necessary within 2 week timeframe
01-040 RFIs & Changes to Work	Submit RFI	Contractor	Immediate upon discovery of issue/concern
01-040 RFI's & Changes to Work	Review RFI and provide response	Engineer	1 week
01-040 RFI's & Changes to Work	Issue PCN, Price PCN or Issue CO	Engineer or Contractor	1 week

COMMON REQUIREMENTS

01-050 Site Conditions & Restrictions	Notice of requirements for disruption of services	Contractor	1 week
01-090 Traffic Management	Give notice to public of any closure to private driveway or loading area or changes to any closures	Contractor	2 days
01-100 Material & Equipment	Notice of requirement for materials supplied by City	Contractor	2 weeks before commencing that portion of the Work
01-100 Material & Equipment	Notice of required materials testing	Contractor	2 days
01-110 Quality Control & Field Engineering	Notice of testing	Contractor	24 hours
01-110 Quality Control & Field Engineering	Notice of required initial survey layout	Contractor	1 week
01-110 Quality Control & Field Engineering	Request design files & survey control for use with machine control grading system	Contractor	2 weeks
01-110 Quality Control & Field Engineering	Request warranty or final completion inspection of Private-contracted Work	Contractor	1 week
01-120 Cleaning & Closeout	Request Substantial Performance, Final Completion or warranty inspection	Contractor	Immediate upon Contractor deeming requirements have been met
01-12 Cleaning & Closeout	Perform Substantial Performance, Final Completion or warranty inspection	Engineer	1 week after request for inspection
01-120 Cleaning & Closeout	Issuance of list of deficiencies (or notice of none)	Engineer	1 week after inspection
01-120 Cleaning & Closeout	Draft submission of O&M Manuals	Contractor	Upon request of Substantial Performance
01-120 Cleaning & Closeout	Final submission of O&M Manuals	Contractor	Upon request of Final Completion
01-120 Cleaning & Closeout	Review O&M Manuals and provide response	Contractor	2 weeks

3.2 PRIVATE-CONTRACTED WORK

- .1 In many instances the Standard Construction Specifications refer to the Engineer as the acting authority for the Work. For Private-contracted Work the Engineer may authorize a Consulting Engineer to perform the duties of the Engineer.

COMMON REQUIREMENTS

- .2 A comprehensive list of the duties to be performed by the Consulting Engineer on behalf of the Engineer shall be determined prior to the start of construction.

3.3 REVISION REFERENCES

- .1 Through the revision process, numerous sections have been renamed. Until such a time as the Standard Construction Specifications have been fully updated, the following references to sections shall be used interchangeably:

Current Revision Reference	Revised Version Reference
01010 Common Requirements	01-010 Common Requirements
01090 Reference Standards	01-010 Common Requirements
01200 Meetings	01-020 Meetings
01300 Submittals	01-030 Submittals
01500 Temporary Facilities	01-060 Temporary Facilities
01545 Safety	01-070 Safety
01570 Traffic Control	01-090 Traffic Management
01600 Material and Equipment	01-100 Material & Equipment
01700 Contract Closeout	Submission of O&M Manuals
0710 Cleanup	01-120 Cleaning & Closeout
02510 Asphalt Concrete Pavement	07-010 Hot-Mix Asphalt
02212 Roadway Excavation and Grading	03-020 Sub-Base, Sub-Grade & Base Course Construction
02303 Granular Base Course	03-020 Sub-Base, Sub-Grade & Base Course Construction
02512 Ready Mixed Concrete	06-010 Concrete Construction
02592 HDPE Liner	02-020 Geomembrane
02920 Topsoil	08-010 Topsoil, Seed & Sod
02935 Seeding	08-010 Topsoil, Seed & Sod
02938 Turf Grass Sod	08-010 Topsoil, Seed & Sod
02210 Excavation, Bedding & Backfill	03-010 Excavation, Bedding & Backfill
02514 Concrete Construction	06-010 Concrete Construction
02660 Watermains	04-010 Watermains
02665 Building Services	04-020 Water Connections & 05-020 Sewer Connections

COMMON REQUIREMENTS

02700 Sewers	05-010 Gravity Sewers
--------------	-----------------------

PART 4: METHOD OF MEASUREMENT

4.1 MEASUREMENT

- .1 Sections of the Standard Construction Specifications that do not contain 'Part 4: Method of Measurement' shall not be considered for measurement unless otherwise stated in the Contract Documents.

PART 5: BASIS OF PAYMENT

5.1 PAYMENT

- .1 Sections of the Standard Construction Specifications that do not contain 'Part 5: Basis of Payment' shall not be considered for payment unless otherwise indicated in the Contract Documents.

END OF SECTION

MEETINGS

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for meetings in connection with the Work.

PART 2: PRODUCTS

NONE

PART 3: EXECUTION

3.1 PRE-CONSTRUCTION MEETING

- .1 For Private-contracted Work, following receipt of approved drawings, applicable permits, utility locates, traffic detour plans and any other necessary approvals required to commence the Work, the Consulting Engineer or Contractor will schedule a pre-construction meeting.
- .2 For City-contracted Work, the Engineer will schedule a pre-construction meeting with the Contractor and any Subcontractors and/or Consulting Engineer that the Contractor requests to be in attendance. The time and location of the meeting will be established by the Engineer.
- .3 The following topics shall be discussed at the pre-construction meeting, at minimum:
 - .1 Administrative procedures and responsibilities, communication protocol;
 - .2 Identification of Prime Contractor, Subcontractors, material suppliers, proposed equipment and Products;
 - .3 Bonding, insurance and permitting requirements;
 - .4 Site safety, signage, barricades, traffic management;
 - .5 Disruption of services, tie-ins or connection to existing systems, temporary water requirements, temporary pumping requirements;
 - .6 Road, curb, sidewalk, boulevard restoration requirements, quality control and quality assurance;
 - .7 Commissioning of the Work, training (if applicable), and handover to the City;
 - .8 Schedule, inspection requirements and progress meetings frequency;
 - .9 Close-out submittals, O&M Manuals and Record Drawings;
 - .10 Completion of Work and warranties;
 - .11 Any other topics deemed necessary based on the nature of Work

MEETINGS

3.2 PROGRESS MEETINGS – CITY-CONTRACTED WORK

- .1 At the Preconstruction Meeting, frequency of progress meetings will be determined based on the nature of the Work and proposed schedule. Meetings to be held at a location agreed upon by the Engineer and the Contractor.
- .2 The meetings shall include representatives of both the City and the Contractor who are capable of expressing the parties' position on any matter to be discussed, and able to act on behalf of their party.
- .3 Topics to be discussed will include an update on all items discussed at the pre-construction meeting as well as issues which have arisen during the course of the Work.

3.3 PROGRESS MEETINGS – PRIVATE-CONTRACTED WORK

- .1 At the Preconstruction Meeting, frequency of progress meetings will be determined based on the nature of the Work and proposed schedule. Meetings to be held at a location agreed upon by the City, the Consulting Engineer and the Contractor.
- .2 The meetings shall include representatives of both the City,, Developer, Consulting Engineer and the Contractor who are capable of expressing the parties' position on any matter to be discussed, and able to act on behalf of their party.
- .3 Topics to be discussed will include an update on all items discussed at the Preconstruction Meetings as well as issues which have come up during the course of the Work.

3.4 MEETING RECORDS & DISTRIBUTION

- .1 Unless otherwise stated in the Contract Documents, the Engineer shall record the minutes, including significant proceedings and decisions as well as identify outstanding action items to be addressed and the party responsible for each item.
- .2 The designated person shall distribute copies of the minutes to all parties in attendance following the meeting. All parties shall have the opportunity to dispute or comment on the minutes, in which case the designated person shall revise the minutes. The minutes or revised minutes shall be considered final if no comments are sent to the designated person after distribution within the time specified in Section 01-010 Common Requirements.

END OF SECTION

SUBMITTALS

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for the supply, preparation, delivery and review of Submittals required by the Contract Documents or reasonably requested by the Engineer.

1.2 REQUIRED SUBMITTALS

- .1 Provide all necessary Submittals in accordance with Contract Documents or as the Engineer may reasonably request, including but not limited to:
 - .1 Bonds;
 - .2 Certificates of Insurance;
 - .3 Workers Compensation Board clearance;
 - .4 Safe Work Plan;
 - .5 Schedule
 - .6 Environmental Protection Plan;
 - .7 List of Subcontractors;
 - .8 List of Materials;
 - .9 Clearances
 - .10 Permits
 - .11 Business License
 - .12 Security Clearance
 - .13 Concrete/Asphalt Mix Designs;
 - .14 Aggregate Sources;
 - .15 Test Results;
 - .16 Shop Drawings;
 - .17 Product Data;
 - .18 Certifications;
 - .19 Samples or Mockups;
 - .20 Procedures;
 - .21 Site Plan;
 - .22 Engineered Design Drawings

SUBMITTALS

- .23 Mill test certificates;
- .24 As-Constructed Drawings;
- .25 Operation & Maintenance (O&M) Manuals;
- .26 Traffic Management Plan.

PART 2: PRODUCTS

2.1 SHOP DRAWINGS

- .1 Clearly indicate materials, methods of construction, diagrams, connections, notes, and other information necessary for completion of the Work. The Shop Drawings shall clearly indicate that any attachments and connections have been properly coordinated, regardless of the trade under which the equipment will be supplied and installed.
- .2 All reviewed Shop Drawings are subject to final acceptance of the equipment and materials installed once they are in commission, all guarantees have been fulfilled and the operations of the equipment and materials have been accepted by the Engineer in accordance with the specifications.
- .3 Shop Drawings shall be sealed by an Engineer as indicated in the Contract Documents.

2.2 PRODUCT DATA

- .1 Manufacturer's standard shop drawings, catalogue sheets, diagrams, schedules, performance charts, illustrations and other standard descriptive data will be accepted instead of Shop Drawings if:
 - .1 Information not applicable to project is deleted;
 - .2 Additional required information is provided;
 - .3 All required dimensions and clearances are shown;
 - .4 Performance characteristics and capacities are provided; and,
 - .5 Wiring and control diagrams and installation instructions are included.

2.3 METHOD STATEMENTS

- .1 If required by the Contract Documents, submit detailed method statements and drawings to describe the method, Plant and equipment to be used for execution of any portion of the Work.

2.4 AGGREGATE SOURCES

- .1 Inform Engineer of the source of all processed materials such as aggregates for granular, concrete and asphalt construction and provide access to the material sources for testing.
- .2 The source of Products and material supply shall not change without the prior approval of the Engineer. Any material of a quality or nature not suitable for its intended use will be rejected.
- .3 The Engineer reserves the right to prohibit the use of material from any source which, in his opinion, the character of the material or method of manufacture is such as to make improbable

SUBMITTALS

the furnishing of material conforming to the requirements of the Standard Construction Specifications.

2.5 SAMPLES & MOCK UPS

- .1 Provide samples of Products, assemblies or components in sizes and quantities specified or as requested by the Engineer. The Contractor shall be responsible for delivery to the location determined by the Engineer.
- .2 Construct mock ups as specified in the Contract Documents at a location acceptable to the Engineer, including all trades required to complete the Work.
- .3 Clearly indicate sample origin and intended use in the Work.
- .4 Where colour, pattern or texture are criteria, provide a full range of samples.
- .5 Notify the Engineer in writing of any deviations in samples from requirements of the Contract Documents.
- .6 Reviewed samples and mock ups will become the standard of material and workmanship against which the Work will be approved.
- .7 Failure to produce samples or prepare mock ups in sufficient time shall not be considered sufficient reason for an extension of Contract Time and no such claim will be considered.

2.6 MATERIAL LISTS

- .1 Subcontractor and material supplier lists shall indicate all subcontractors and material suppliers proposed by the Contractor to execute any portion of the Work. Provide contact information for an authorized person from each Subcontractor and/or material supplier.
- .2 If requested by the Engineer, supply a copy of all delivery receipts for materials. Receipts shall show the quantity, type, and supplier of the material.
- .3 If requested by the Engineer, supply an "Affidavit of Compliance" from the manufacturer of materials furnished certifying that the materials supplied comply with the Contract Documents.

2.7 SAFE WORK PLAN

- .1 As specified in Section 01-070 Safety.

2.8 ENVIRONMENTAL PROTECTION PLAN

- .1 As specified in Section 01-080 Environmental Protection.

2.9 TRAFFIC MANAGEMENT PLAN

- .1 As specified in Section 01-090 Traffic Management.

2.10 SCHEDULE OF WORK

- .1 As specified in Section 01-050 Site Conditions & Restrictions.

SUBMITTALS

2.11 SITE PLAN

- .1 As specified in Section 01-050 Site Conditions & Restrictions.

2.12 AS-CONSTRUCTED RECORD DRAWINGS

- .1 As specified in Section 01-100 Quality Control & Field Engineering.

2.13 TEST RESULTS

- .1 As specified in Section 01-100 Quality Control & Field Engineering.

PART 3: EXECUTION

3.1 SUBMITTAL PROCEDURE

- .1 For all required submittals, submit promptly and in an organized sequence to not cause delay to the Work. Prior to submission, review submittals to ensure the following:
 - .1 They are in SI Metric units;
 - .2 Quantities, field measurements, construction criteria and dimensions, fabrication processes, installation techniques have been determined and verified;
 - .3 Deviations from the Contract Document requirements are clearly indicated;
 - .4 Any design requirement not included in the Contract Documents has been sealed by a qualified Professional Engineer, registered in Manitoba.
 - .5 Identify as part of the submittal:
 - a. Project/Contract title/number;
 - b. Name of Contractor and Subcontractors, supplier or manufacturer complete with contact information;
 - c. Reference to Drawing number or Specification section;
 - d. Description, installation instructions, performance or test data;
 - e. Model, catalogue number, trade name;
 - f. Reference to applicable standards;
- .2 Submittals not including all of the above information will be returned without reviewing and noted "NOT REVIEWED".
- .3 The Engineer will review for general conformance with the design concept and compliance with the Contract Documents. The review shall not relieve the Contractor of any responsibility for errors or omissions in the submittal or of the duty to comply with the requirements of the Contract Documents unless explicitly approved in writing by the Engineer.
- .4 The Engineer's review will have one of the following notations:
 - .1 "REVIEWED – NO COMMENT", distribute additional copies as required for execution of the Work.

SUBMITTALS

- .2 "REVIEWED – AS NOTED", ensure copies are modified prior to distribution for execution of the Work.
- .3 "REVIEWED – REVISE AND RE-SUBMIT", make necessary revisions indicated and re-submit for review.
- .4 "NOT REVIEWED", submit other drawings, product data, samples, mock ups, lists or schedules for review which are consistent with the Contract Documents.
- .5 Do not proceed with any Work called for by a submittal until the Engineer's review is complete and communicated to the Contractor. Only submissions marked "REVIEWED – NO COMMENT" or "REVIEWED – AS NOTED" shall be incorporated into the Work.
- .6 Adjustments made to a submittal by the Engineer are not expected to change the Contract Price or Schedule. If, in the opinion of the Contractor such adjustment does affect the Contract Price or schedule, clearly state in writing the impacts prior to proceeding with the Work. Commencement of the Work indicates the Contractor's acceptance for any adjustment without an adjustment to the Contract Price or Schedule.
- .7 The Engineer will complete two reviews of any one submission at no cost. Submissions lacking information for review and marked "NOT REVIEWED" will not be considered an official submission.

END OF SECTION

REQUESTS FOR INFORMATION & CHANGES TO WORK

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for requirements related to Requests for Information (RFIs) and Changes to Work.

1.2 REQUIRED SUBMITTALS

- .1 Requests for Information (RFIs) as necessary, submission format as specified in Section 01-030 Submittals.

PART 2: PRODUCTS

NONE

PART 3: EXECUTION

3.1 DISCREPANCIES/OMISSIONS

- .1 Notify the Engineer with a Request for Information (RFI) immediately upon discovery of discrepancies or omissions in the Contract Documents or of any doubt as to the meaning or intent of any part thereof.
- .2 Proceeding with the Work when an error is suspected or when there is doubt as to the interpretation of the Contract Documents constitutes full acceptance of any cost associated with remedial Work which may be required.

3.2 REQUESTS FOR INFORMATION (RFI)

- .1 RFIs generated by a Subcontractor or supplier shall be initially reviewed by the Contractor to ensure the RFI is necessary prior to submission to the Engineer. The format of the RFI shall follow the Submittal procedure indicated in Section 01-030 Submittals.
- .2 The Engineer will review the RFI received and either respond directly, clarify with a Field Instruction (FI), or indicate that a proposed change is being contemplated and a Proposed Change Notice (PCN) is forthcoming.
- .3 Requests for alternate or substitute materials or Products shall be as per Section 01-100 Material & Equipment.

3.3 CHANGES IN WORK (PRIVATE-CONTRACTED WORK)

- .1 For Private-contracted Work, any proposed change will require revisions to the "Reviewed for Construction" Drawings, revisions completed by the Consulting Engineer and re-submittal by the original applicant for review by the Engineer. The Contractor shall not proceed with any portion of the Work affected by such changes unless instructed otherwise by the Engineer and approved by the Consulting Engineer.
- .2 For Private-contracted Work, the City reserves the right to make changes after the Drawings have been stamped "Reviewed for Construction", but only if conditions are substantially different than those known to the Engineer at the time of reviewing the Drawings and the changes have been approved by the Consulting Engineer.

REQUESTS FOR INFORMATION & CHANGES TO WORK

3.4 CHANGES IN WORK (CITY-CONTRACTED WORK)

- .1 For City-contracted Work, refer to the General Conditions of the Contract, including any amendments thereto indicated in the Supplemental Conditions.
- .2 Unless otherwise indicated in the Contract Documents, the Change in Work process for City-contracted Work shall be as follows:
 - .1 A potential change or discrepancy in the Contract Documents is initiated by either the Contractor through a RFI, or the Engineer through an observation on site.
 - .2 If a Change in Work is contemplated by the Engineer, a PCN is issued to the Contractor detailing the Change in Work being considered. A Drawing may or may not be required to further detail the Change in Work.
 - .3 The Contractor reviews the PCN and provides cost and schedule implications to complete the contemplated work. The Contractor shall provide as much detail as necessary for the Engineer to ascertain whether the pricing and schedule implications are reasonable for the Change in Work under consideration.
 - .4 The Engineer reviews the cost and schedule implications received from the Contractor, and determines if the Change in Work shall proceed or not.
 - .5 If the Change in Work is to proceed, the Engineer will issue a Change Order (CO) instructing the Contractor to proceed. Payment and schedule implications will be indicated on the CO.
 - .6 The Engineer will advise the Contractor if the Change in Work is not to proceed.

END OF SECTION

SITE CONDITIONS & RESTRICTIONS

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for requirements related to the existing Site and restrictions.

1.2 REQUIRED SUBMITTALS

- .1 Contractor shall provide a schedule of the Work as per the Contract Documents addressing, at minimum, the following:
 - .1 Schedule shall indicate in chronological order the complete sequence of construction activities in the form of a Gantt chart, outlining start, progress and completion dates for each major element, section, item, trade, operation or division of the Work, including the critical path for the overall project completion.
 - .2 Inspect the Work to monitor and report progress on each activity, indicating changes in activity durations and start/finish/imposed dates.
 - .3 Provide explanations for any activities which are over estimated times, and if activities are on the critical path, indicate what corrective activities will be taken to return to the original schedule.
 - .4 Provide revisions to identify changes in schedule due to Changes in Work and revised projections of progress.
- .2 Contractor shall provide a Site plan as per the Contract Documents addressing, at minimum, the following:
 - .1 Site plan shall show material laydown areas, site office (if required), parking, fencing, sanitary facilities, access and egress areas.
 - .2 If changes to the Site layout are required as the Work progresses, a new Site plan shall be provided.

PART 2: PRODUCTS

NONE

PART 3: EXECUTION

3.1 SCHEDULE

- .1 The Work shall be scheduled at the discretion of the Contractor, subject to the provisions as specified in the Contract Documents or herein.
- .2 Provide notice to the Engineer of intention to commence or terminate Work. Once the Work has begun, it shall be advanced diligently with a view of completing the Work or restoring the infrastructure to full use in the shortest possible time.
- .3 Prior to commencement of each stage of construction on any project, obtain clearance from the Engineer that the previous stage is ready to receive new Work, and that there are no reasons of weather or matters outside the City's control which would preclude commencement of the new Work.

SITE CONDITIONS & RESTRICTIONS

3.2 HOURS OF WORK

- .1 Work inside the limits of the City of Brandon shall be between 7:00 a.m. and 7:00 p.m. on weekdays and Saturdays unless otherwise approved by the Engineer.
- .2 Any Work performed inside a City of Brandon facility shall be during the normal open hours of that facility unless otherwise approved by the Engineer.
- .3 Work outside of the hours indicated above will only be allowed if in accordance with City by-laws and if approved by the Engineer in writing. When Work is carried out at night, the Contractor shall supply sufficient amount of lighting to enable the Work be done in a safe, efficient and satisfactory manner.

3.3 SEASONAL RESTRICTIONS

- .1 Work shall progress into the fall/winter as late as the Work can be completed per the requirements of the Contract Documents, including but not limited to minimum temperature requirements for concrete and asphalt materials.
- .2 When seasonal conditions are no longer conducive to the performance of the Work, the Contractor shall request a halting of Contract Time due to seasonal restrictions. Upon receipt of the request, the Engineer will review the conditions and make a determination.
- .3 Upon halting of Contract Time being determined by the Engineer, the Site shall be cleaned as per Section 01-130 Cleaning & Closeout. If requested by the Engineer, temporarily fill excavations, patch roadways and do other Work as necessary to re-open the street to traffic during the seasonal shutdown.
- .4 During seasonal shutdown, perform routine maintenance on temporary road patches as necessary to maintain the road in an acceptable condition, as determined by the Engineer.
- .5 When the Contractor and/or Subcontractors are no longer seasonally restricted, as determined by the Engineer, they shall immediately return to Site, remove any temporary road patches and resume the Work.
- .6 Unless otherwise indicated in the Contract Documents, the cost of all cleaning, temporary Work and/or maintenance during the seasonal shutdown shall be the sole responsibility of the Contractor.

3.4 SITE LIMITS

- .1 The location on the Site in which the Contractor commences the Work and the sequence of construction shall be as approved by the Engineer.
- .2 Confine all equipment, Plant, storage of materials, and operations to the Site and avoid unnecessarily encumbering the Site with Products and/or materials.
- .3 Coordinate activities between Contractor and other Works and/or Contractors in adjacent areas. Contractor will not have exclusive rights to the general area.

3.5 EXISTING REFERENCE POINTS

- .1 Not all existing horizontal and vertical control points, survey posts, monuments, property pins or bars are indicated on the Drawings. If the Contractor is in doubt about the location of any of the aforementioned survey control points on the Site, the Contractor shall verify their location with the Engineer, or for private-contracted work the Consulting Engineer, before commencing the Work. Property pins may only be referenced or moved by a Manitoba Land Surveyor, and the

SITE CONDITIONS & RESTRICTIONS

Contractor shall give timely notice to the Engineer, or where applicable the Developer, to have this done at the City's expense, or for private-contracted work at the Developer's expense.

- .2 The Contractor shall exercise proper care in the protection and preservation of all horizontal and vertical control points, survey posts, monuments, property pins, bars, bench marks, reference points, and stakes. In the case of willful or careless destruction or disturbance of the aforementioned, the Contractor shall be fully responsible for any mistakes caused by their unnecessary loss or disturbance in addition to the expense of their restoration or replacement. The Contractor shall immediately notify the Engineer when a reference point is lost or destroyed. The Contractor shall have no claim for extra compensation on account of delay caused thereby.

3.6 EASEMENTS & PRIVATE PROPERTY

- .1 Obtain consent of adjoining property owners if needed for temporary access or use. Provide written consent from said property owners to the Engineer, if requested. Upon completion of the Work, make good damage to the satisfaction of the property owner.
- .2 If easements are obtained by the City to perform Work on private property, ensure all excavated materials, material to be incorporated into the Work, and property access are within the prescribed limits.
- .3 Fences, planters and other private belongings installed within the right-of-way shall be removed and stockpiled as determined by the Engineer in order to complete the Work.
- .4 Damages as a result of the Work to fences, planters, signs, mailboxes and other private belongings installed on private property shall be repaired at the Contractors expense.

3.7 EXISTING UTILITIES

- .1 The Drawings are intended to show the existence and location of utilities in the right-of-ways at the date of the Drawing; however, not all utilities may be shown or additional utilities may have been added or modified since the Drawings were made. The Contractor shall make all necessary enquiries and give all requisite notice to utilities prior to commencing the Work. Any Work or cost required to locate or expose a utility shall be borne entirely by the Contractor.
- .2 Prior to the commencement of Work, inspect the Site, obtain and confirm dimensions, examine all available records and contact all utilities to establish location and conditions of all existing above and below-ground features that may be impacted by the Work.
- .3 Take extra precaution near any natural gas mains that are located within the limits of the Work. Limits of excavation around gas mains may differ on each Site and shall be as directed by Manitoba Hydro once construction begins.
- .4 Take extra precaution near overhead wires that are located within the limits of the Work. Limits of Work near overhead wires may differ on each Site and shall be as directed by Manitoba Hydro once construction begins.
- .5 Proceed under direction of respective utility owner and/or the Engineer to provide temporary support, protection and maintenance of existing features which may be impacted by the Work.
- .6 Arrange with utility owners and municipal departments for the removal, relocation, replacement or protection of above or below ground features which may be in conflict with the Work unless specified in the Contract Documents.
- .7 Any utility or feature which, in the opinion of the Engineer, requires temporary relocation shall be removed, relocated, replaced or otherwise protected at the Contractor's expense unless specified in the Contract Documents.

SITE CONDITIONS & RESTRICTIONS

- .8 Any utility or feature damaged as a result of the Work will be repaired at the Contractor's expense.

3.8 COORDINATION

- .1 Coordinate activities of sub-trades and Work by others as required to expedite the Work.
- .2 Coordinate activities between Contractor and other Works and/or Contractors in adjacent areas. Contractor will not have exclusive rights to the general area.
- .3 If emergency repairs to infrastructure are required at the Site the City will have exclusive rights to the area required to make such repairs.
- .4 Upon commencement, the Work shall be advanced diligently with the view of completing the Work or restoring the infrastructure to full use in the shortest possible time.

3.9 SUBSURFACE CONDITIONS

- .1 The City makes no warrants or guarantees of subsurface conditions at the Site. The Contractor is responsible to make their own interpretation of the subsurface conditions at the Site.
- .2 If conditions at the Site are different than expected, advise the Engineer at the earliest opportunity in order to review the Work and determine if changes are required.
- .3 De-watering of the Site may be required, and unless otherwise indicated in the Contract Documents, the City will not be responsible for any payment for de-watering of any excavation. The method and means of de-watering shall be the Contractor's sole responsibility.
- .4 If the Engineer provides test holes or other geotechnical information, the Contractor shall make their own interpretation of the data provided and shall carry out such additional investigations as they deem necessary.

3.10 DISRUPTION OF SERVICES

- .1 One week prior to performing any tie-in or connection to an existing system, submit a detailed written description of how the connection will be made and indicate maximum length of required shutdown of any plant. Do not proceed until written approval by the Engineer.
- .2 No valve, switch or other control of an existing plant shall be operated without the written approval of the Engineer and/or respective utility owner.
- .3 Provide notice to impacted properties of any service interruption, such notice shall be in a manner as directed by the Engineer and/or utility company.

3.11 EXISTING HARDWARE ACCOMMODATION

- .1 All manholes, valves, valve casings, catch basins, utility vault covers, and similar street hardware, whether owned by the City or others, shall be raised, lowered, tilted, or otherwise adjusted prior to and during placement of any materials. Street hardware shall be set flush with the finished graded surface unless otherwise directed by the Engineer.

3.12 LOCATION OF EXISTING FIXTURES

- .1 Location of equipment, fixtures and distribution systems shown on the Drawings or as specified in the Contract Documents shall be considered as approximate.

SITE CONDITIONS & RESTRICTIONS

- .2 Locate equipment, fixtures, and distribution systems to provide minimum interference, maximum use of space in accordance with manufacturer's recommendations for safety, access, operations and maintenance.
- .3 If required by the Engineer, submit Shop Drawings to indicate relative position of various fixtures and equipment. Inform the Engineer of any impending installation and obtain Engineer's approval for final location.

END OF SECTION

TEMPORARY WORKS

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for the supply and install of temporary facilities, utilities, construction aids and controls, as required to execute the Work or as directed by the Engineer in order to expeditiously execute the Work, and removal from Site all such temporary facilities when no longer required or as directed by the Engineer.

1.2 REQUIRED SUBMITTALS

- .1 Shop Drawings if required as per Section 01-030 Submittals.

1.3 REFERENCE STANDARDS

- .1 CSA S269.1 "Falsework and Formwork"
- .2 CSA S269.2 "Access Scaffolding for Construction Purposes"

PART 2: PRODUCTS

NONE

PART 3: EXECUTION

3.1 EXCAVATIONS & DEWATERING

- .1 As per Section 03-010 Excavation, Bedding & Backfill.

3.2 CUTTING, FITTING & PATCHING

- .1 Do all cutting, fitting, or patching of Work that may be required to make its several parts come together properly and fit to receive or be received by Work of others shown on, or reasonably implied by the Contract Documents.
- .2 Do not damage or endanger any existing Work by cutting, digging, or otherwise. Do not cut or alter the Work of others without approval from the Engineer.
- .3 Do not cut, drill or otherwise sleeve any load bearing structural member, unless shown specifically on the Drawings or as stated in the Specifications without written approval from the Engineer.
- .4 Submit a written request in advance of cutting or alteration which effects the structural integrity of any element of the Work, the integrity of weather exposed or moisture resistant elements of the Work, the efficiency, maintenance or safety of any operational element, the visual qualities of sight exposed elements, or Work by others. Commencement of cutting or patching means acceptance by the Contractor of existing conditions.
- .5 Perform cutting and remedial Work using qualified specialists familiar with the materials effected and tools or equipment required to complete the Work. Rigid materials shall be cut with clean, true, smooth edges using a power saw or core drill. Openings shall not be cut larger than required for installation of the Work.

TEMPORARY WORKS

- .6 Restore the Work with new products in accordance with the Contract Documents, fit work airtight to pipes, sleeve ducts, conduits and other penetrations through surfaces and at penetration of fire rated wall, ceiling or floor construction. Completely seal voids with fire rated material through the full thickness of the construction element.
- .7 Properly prepare surfaces to receive patching and finishing and make matches inconspicuous in the final assembly. Refinish surfaces to match adjacent finishes. For continuous surfaces refinish to nearest intersection of an assembly or refinish the entire unit.

3.3 TEMPORARY ELECTRICITY

- .1 If required during the Work, supply, install and maintain all temporary electrical power and lighting, including pole lines, required for the Work in accordance with governing regulations, ordinances or the Contract Documents.
- .2 Wiring for temporary lighting shall be entirely separate from the temporary electricity installation, except for a common supply connection at an electrical service or distribution centre.
- .3 The existing power and lighting system of a building, or portions thereof, may be used when available and only if approved by the Engineer.
- .4 The Contractor shall pay all costs of maintaining and providing temporary electricity from the existing system and shall be responsible for all damages and repairs to the existing system which are a result of the Work.
- .5 Upon completion of the Work, replace all lamps and restore existing system to the satisfaction of the Engineer.

3.4 TEMPORARY HEAT & VENTILATION

- .1 If required during the Work, supply portable heaters or other types of radiation for temporary heat, including attendants, maintenance and fuel.
- .2 Unless stated elsewhere in the Contract Documents, minimum temperature shall be 10 degrees Celsius in all areas in which construction is in progress, and 21 degrees Celsius in any occupied interior building area.
- .3 Use Engineer-approved heating devices only which shall protect the Work and Products against dampness and cold, prevent moisture condensation on surfaces, provide ambient temperatures and humidity levels for storage, installation and curing of materials.
- .4 The existing heating system of a building shall not be used for temporary heating and the temporary heating equipment shall operate independently of any mechanical equipment or heating system being installed as part of the Work.
- .5 Provide ventilation to prevent hazardous accumulations of dust, fumes, mist, exhaust, vapours or gases in all areas occupied during execution of the Work.
- .6 Contractor shall be responsible for any damages to the Work due to failure in providing adequate heat and/or ventilation during construction.

3.5 TEMPORARY WATER

- .1 If required by local authorities or the Contract Documents, provide and maintain in good condition a supply of potable water for construction use.

TEMPORARY WORKS

- .2 Install and maintain all temporary lines and connection, and supply and install the service and meter as required by the City.
- .3 The Contractor shall pay for all water consumed during Private-contracted Work as measured by a hydrant meter box.
- .4 There shall be no charges for water consumed as part of City-contracted Work as metered by a hydrant meter box.

3.6 HYDRANT OPERATION

- .1 Do not operate hydrants or valves that are currently in service and/or connected to a potable water source supplied by the City.
- .2 Where the City approves the use of water from hydrants in the Work, the hydrants and valves will be operated by the City only. Should the Contractor require prolonged use of a hydrant, the Contractor shall request a key to the hydrant meter box from the City.
- .3 Do not obstruct access to hydrants, valve boxes, curb stop boxes or other existing utility controls at the Site.
- .4 Where such access must be blocked, the duration of such obstruction shall be as brief as practicable and only if approved by the Engineer.
- .5 Hydrants not in service as a result of the work shall be red tagged as directed by the Engineer.

3.7 SANITARY FACILITIES

- .1 Provide and maintain in clean and tidy condition sufficient sanitary facilities for the work force in accordance with local health authorities, governing regulations and by-laws.

3.8 TEMPORARY STRUCTURES

- .1 Supply, install and maintain all temporary sheeting, retaining walls, piling or shoring required to protect adjacent building foundations, roadways, excavations, and trenches from damage or movement caused by rain water, ground water or other environmental conditions.
- .2 Supply, install, and maintain scaffolding, ramps, ladders, swing staging, platforms, or temporary stairs as may be required by the Work.
- .3 Falsework and Scaffolding shall be designed and constructed in accordance with CSA S269.1 and CAN/CSA S269.2.
- .4 Scaffolding and falsework shall be rigid, secure and constructed to ensure proper safety for Contractor Personnel and erected and maintained in full compliance with Provincial Codes and regulations governing scaffolding.
- .5 Scaffolding shall be erected in a manner which will not encumber the performance of the Work, independent of walls, without damage to any building or finishes and shall be removed promptly when no longer required.
- .6 The Contractor shall be solely responsible for the design, erection, operation, maintenance and removal of temporary structures and other temporary facilities and the design and execution of construction methods required in their use. The Contractor shall engage and pay for a registered professional engineer skilled in the appropriate discipline to perform these functions where required by law or by the Contract Documents, and in all cases where such temporary facilities

TEMPORARY WORKS

and their methods of construction are of such a nature that professional engineering skill is required to produce safe and satisfactory results.

- .7 Notwithstanding any provisions to the contrary elsewhere in the Contract Documents, where such Contract Documents include designs for temporary structural and other temporary facilities or specify a method of construction in whole or in part, such facilities and methods shall be deemed to comprise part of the overall design or the specified method of construction. The Contractor shall be responsible for the execution of such design or specified method of construction in the same manner they are responsible for the execution of the Work.

3.9 SITE ENCLOSURES

- .1 Supply, erect and maintain in good repair guard railing and barricades, temporary Site enclosures and pedestrian walkways complete with roof, side covers, signs and electrical lighting as required by the Engineer, local authorities, or by-laws to protect Contractor Personnel, the public, and public/private property from injury or damage during the performance of the Work. Barricades shall be erected around all deep excavations, open shafts, open stair wells, or other areas of construction. Barricade the sidewalk at a location in line with the property line upon commencement of construction and maintain the barricades until the Work is complete and the sidewalks have been repaired.
- .2 Temporary fencing shall be constructed using a minimum 1.2 metre high, new snow fence securely wired to rolled steel 'T' bar fence posts spaced at 2.4 metre centers, all of which shall conform to the requirements of the authorities having jurisdiction.
- .3 Remove temporary Site enclosures from Site upon their use being no longer required, or the Work being completed.

3.10 TEMPORARY STORAGE

- .1 Supply and maintain, in a clean and orderly condition, suitable locked, weatherproof enclosures for the storage and protection of tools, equipment, Products and materials.
- .2 Allocate storage areas on Site for materials which are not required to be placed in weatherproof sheds. Limit storage of materials and items to designated storage areas only and store in a manner which causes the least interference with construction activities.

3.11 SITE SECURITY

- .1 Provide all temporary controls in order to execute Work safely, expeditiously, and minimize damage to the Work and other structures on or adjacent to the Site.
- .2 Provide barricades, fencing and any other barriers necessary to deter the public from the Site.
- .3 Provide weather tight enclosures for any unfinished portions of the Work which may be sensitive to the elements. Design enclosures to withstand wind and snow loadings.

3.12 TEMPORARY PUMPING

- .1 Provide temporary drainage and pumping required to keep the Site and excavations free from standing water.
- .2 Ensure pumped water into waterways, sewer or drainage systems is free of suspended materials or debris.

TEMPORARY WORKS

- .3 Prior to pumping, written approval by the Engineer of the discharge point is required. Provide expected discharge volumes, pump capacities, water quality and other information requested by the Engineer to aid in the approval process.
- .4 For requirements related to bypass pumping of sewer mains for the purposes of gravity sewer work, see Section 05-010 Gravity Sewers.

PART 4: METHOD OF MEASUREMENT

4.1 TEMPORARY WORKS

- .1 There will be no separate measurement made for supply and install of temporary facilities, utilities, construction aids and controls unless otherwise indicated in a separate Division or the Contract Documents.

PART 5: BASIS OF PAYMENT

5.1 TEMPORARY WORKS

- .1 No payment will be made for the works associated with 'Temporary Works', as it is considered incidental to the Work, unless otherwise indicated in a separate Division or the Contract Documents.

END OF SECTION

SAFETY

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for requirements to ensure safety of people and property effected by the Work.

1.2 REQUIRED SUBMITTALS

- .1 Notwithstanding the requirements of the Manitoba Workplace Safety and Health Act and Regulation or other legislation, the Contractor shall have a Safe Work Plan including but not limited to, the following:
 - .1 Contact information for company management, safety personnel, and other key staff;
 - .2 Emergency contact information for fire, police, medical, dangerous goods, workplace safety & health and other agencies or authorities;
 - .3 Location of, and directions to the nearest hospital or first aid station;
 - .4 Contractor Personnel certifications for first aid/ CPR;
 - .5 Template for regular safety meetings, tailgate safety meetings;
 - .6 Company certifications such as COR or seCOR;
 - .7 Emergency Preparedness Plans for potential emergencies;
 - .8 Hazard analysis for all tasks or situations, including safe work procedures and personal protective equipment required to limit exposure to hazard;
- .2 The Safe Work Plan shall be reviewed specifically for each Site and if necessary, site-specific or activity-specific hazard analysis, PPE, or preparedness plans shall be developed.

1.3 REFERENCE STANDARDS

- .1 CSA Z166.1-M85 Powder Actuated Tools – Performance Requirements
- .2 CSA Z166.2-M85 Powder Actuated Tools – Use and Handling
- .3 National Building Code of Canada (NBC)
- .4 National Fire Code of Canada (NFC)
- .5 Manitoba Workplace Safety and Health Act and Regulation
- .6 Explosives Act R.S.C., 1985, c. E-17

SAFETY

PART 2: PRODUCTS

NONE

PART 3: EXECUTION

3.1 PRIME CONTRACTOR

- .1 Unless specified otherwise in the Contract Documents, the Contractor shall be the Prime Contractor and shall serve as, and have the duties of the Prime Contractor in accordance with Manitoba Workplace Safety and Health Act and Regulation

3.2 SAFETY REGULATIONS

- .1 Observe, comply with, and ensure Contractor Personnel comply with the requirements of The Workplace Safety and Health Act, the Workers Compensation Board of Manitoba, all regulations thereunder and current legislation as required under the jurisdiction of Provincial and local by-laws and applicable statutes. In the event of a discrepancy between any safety provision of the above regulations, the most stringent shall apply. Provide and maintain adequate first aid facilities on Site at all times.
- .2 Meet the requirements of GHS and WHMIS. Labels shall be on all hazardous materials and their containers to alert Contractor Personnel to the dangers of the products and basic safety precautions.
- .3 Safety Data Sheets (SDS) shall be available at the Site to provide detailed hazard and precautionary information on products and materials.

3.3 FIRE SAFETY

- .1 Provide and maintain temporary fire protection equipment as required by the City, insurance requirements and governing codes, regulations and by-laws. Provide a minimum of one fire extinguisher in each piece of equipment or structure.
- .2 Instruct Contractor Personnel in the proper method of operating portable fire extinguisher and be familiar with the various classifications of fire and the appropriate extinguishing method.
- .3 When working within a structure comply with the fire requirements NBC and/or NFC of Canada. Contractor Personnel shall know the location of fire alarm pull stations, fire extinguishers, fire exits and evacuation routes.
- .4 Store flammable or combustible gases used on the Site in ULC containers and provide adequate ventilation during the use of volatile or noxious substances. The Contractor shall handle gasoline and like combustible materials with good safe practice and remove all combustible debris from the Site daily. Open fires and burning of rubbish are not permitted on site.

3.4 USE OF EXPLOSIVES

- .1 Explosives will only be permitted by the Engineer if there is no other practical or economical method of completing the Work. The blasting procedure is subject to review by the Engineer and the Contractor shall observe the utmost care not to endanger life and property. Carry adequate liability insurance endorsed for blasting operations to the value requested by the Engineer.
- .2 Contact other utilities as required to ensure that blasting operations will not negatively impact them.

SAFETY

- .3 Transportation, storage and handling of explosives and related materials shall be in strict accordance with the provisions of the Canada Explosives Act, Provincial regulations, and all other legislation pertaining thereto. Blasting shall be executed by persons licensed for such work by the Province of Manitoba. Use approved protective mats and coverings to prevent the projection of debris.

3.5 POWDER-ACTUATED FASTENING TOOLS

- .1 Use of power guns using explosives must be approved by the Engineer and shall only be used by a licensed operator indicating they are qualified to use such tools. Comply with CSA Z166.1, Z166.2, and local regulations.

END OF SECTION

ENVIRONMENTAL PROTECTION

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for requirements to ensure the protection of the environment and habitat effected by the Work.

1.2 REQUIRED SUBMITTALS

- .1 Notwithstanding the requirements of any Provincial or Federal legislation, the Contractor shall have an Environmental Protection Plan including but not limited to, the following:
 - .1 Contact information for company management, persons responsible for ensuring adherence to the Environmental Protection Plan, and other key staff;
 - .2 Emergency contact information for environmental emergencies, Workplace Safety & Health and other agencies or authorities;
 - .3 Spill control plan including procedures, instructions, kits and reports to be used in the event of an unforeseen spill of a hazardous substance;
 - .4 Non-hazardous solid waste disposal plan identifying methods and locations for solid waste disposal;
 - .5 Air pollution control plan detailing provisions to ensure dust, debris, and airborne hazardous materials are not released into the environment above any prescribed limits;
 - .6 GHS & WHMIS training and procedures;
 - .7 SDS for all chemicals that Contractor Personnel may use or may be found on Site;
 - .8 Waste water management plan identifying methods and procedures for management of waterborne or suspended hazardous materials, in addition to sediment control;
 - .9 Asbestos control plan identifying control measures for handling and disposing of asbestos containing material in accordance with the Workplace Safety and Health Act.
- .2 The Environmental Protection Plan shall be reviewed specifically for each Site and, if necessary, site-specific or activity-specific plans shall be developed.

1.3 REFERENCE STANDARDS

- .1 "Manitoba Stream Crossing Guidelines" - Manitoba Stream Crossing Guidelines for the Protection of Fish and Fish Habitat, Department of Natural Resources (DNR) and the Department of Fisheries and Oceans (DFO).
- .2 Manitoba Workplace Safety & Health Act and Regulation

PART 2: PRODUCTS

NONE

ENVIRONMENTAL PROTECTION

PART 3: EXECUTION

3.1 FUEL SPILLAGE

- .1 Obtain Engineer approval of refuelling areas for equipment. Prepare procedures for interception and rapid clean-up/ disposal of fuel spillage and ensure materials required for such tasks are readily accessible on Site.

3.2 VOLATILE WASTES

- .1 Prevent accumulation of wastes which create hazardous conditions and store volatile wastes in covered metal containers which are removed from Site at the end of each day. Ensure no volatile materials are deposited or spilled on land adjacent to the Site or into wastewater sewers or the land drainage system. In the event of a spill, materials shall be removed immediately and the effected land or infrastructure restored to its previous state at the cost of the Contractor. The Contractor shall notify the Engineer immediately in the event of a spill.

3.3 DRAINAGE/PUMPING FACILITIES

- .1 Provide and maintain temporary drainage and pumping facilities, including well points if necessary, to keep all excavations and the Site free of water at all times. Do not permit ponding of water on the Site and do not discharge water containing suspended materials or other harmful substances into wastewater sewers, the land drainage system or across adjacent properties without the written approval of the Engineer.

3.4 USE OF EQUIPMENT NEAR WATERWAYS

- .1 Do not operate equipment in waterways or use waterway beds for borrow material or dump waste material or debris into waterways. Follow erosion control methods outlined in the Manitoba Stream Crossing Guidelines.

3.5 FIRES

- .1 Fires and burning of rubbish on Site is not permitted.

3.6 TREE PROTECTION

- .1 No trees whatsoever shall be cut down or removed from the Site without the written permission of the Engineer or from a City arborist as per the Tree Protection By-law No. 7335.
- .2 The Engineer and City Arborist shall coordinate prior to construction of City-contracted Work to ensure pruning of trees has occurred to minimize damage to trees from excavators and trucks.
- .3 The Engineer, City Arborist and Contractor shall coordinate prior to construction of Private-contracted work to ensure pruning of trees has occurred to minimize damages to trees from excavators and trucks.
- .4 Tree roots shall be protected during excavation and grading so they receive minimum possible disturbance and damage. Do not stockpile material near the tree trunk and avoid compaction of the critical root zone area of a tree.
- .5 Excavation shall only be permitted on one side of the tree or as approved by the Engineer. All exposed roots should be cut using a sharp pruning tool to provide a clean severance of the root.
- .6 Backfill around exposed roots as soon as possible to prevent roots from drying out.

ENVIRONMENTAL PROTECTION

- .7 Unapproved removal or damage to a tree shall result in the following penalty as stated in Compliance By-law No. 7198.

3.7 POLLUTION CONTROL

- .1 Maintain temporary erosion and pollution control features installed under this contract.
- .2 Control emissions from equipment and plant to local authorities' emission requirements.
- .3 Prevent sandblasting and other extraneous materials from contaminating air beyond application area, by providing temporary enclosures.
- .4 Cover or wet down dry materials and rubbish to prevent blowing dust and debris.

3.8 SEDIMENTATION CONTROL

- .1 Provide and maintain temporary sedimentation control measures in accordance with the Section 08-030 Erosion & Sedimentation Control.

END OF SECTION

TRAFFIC MANAGEMENT

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for the coordination, install, management, and removal of temporary traffic controls to facilitate movement of vehicles and pedestrians during the Work.

1.2 REQUIRED SUBMITTALS

- .1 Prior to Work on any Street requiring full or partial closure to traffic or pedestrians, prepare a Traffic Management Plan (TMP) clearly showing the following:
 - .1 Limits of construction, road closure, and sidewalk closure.
 - .2 Provisions for local traffic including lane, driveway, and parking lot access and egress.
 - .3 Approximate location of all traffic control devices;
 - .4 Proposed detour route (if applicable);
 - .5 Approximate start date and duration of closure;
 - .6 Type of Work to be completed;
 - .7 Contact information for Contractor responsible for the Work;
- .2 A revised TMP shall be provided for any portions of the Work requiring different traffic accommodations than the approved TMP.

1.3 REFERENCE STANDARDS

- .1 Manual of Uniform Traffic Control Devices for Canada (MUTCD) – Transportation Association of Canada.
- .2 Temporary Traffic Control Manual (TTCM) – City of Brandon Engineering Department.
- .3 Work Zone Traffic Control Manual (WTCM) – Manitoba Infrastructure.
- .4 The Workplace Safety & Health Act C.C.S.M. c. W210

PART 2: PRODUCTS

2.1 TRAFFIC CONTROL DEVICES

- .1 The design and dimensions of traffic control devices shall conform to the requirements of the most recent edition of the MUTCD, TTCM or WTCM. Where two or more documents are conflicting, the more stringent requirements shall apply.
- .2 All traffic control devices including signs, barricades, channelling, and other devices shall conform to the requirements of this Section, the TTCM for City roads and the WTCM for Provincial roads. Where two or more documents are conflicting, the more stringent requirements shall apply.

TRAFFIC MANAGEMENT

- .3 All traffic control devices shall be clearly marked with the Contractors name, address and telephone number and shall be reflectorized to show the same colour and appearance at night as by day. Reflective must meet or exceed ASTM Type IV.
- .4 During winter conditions, flashing beacons other than those powered by batteries, shall be supplied if requested by the Engineer.

PART 3: EXECUTION

3.1 COORDINATION

- .1 Coordination of road closures is the sole responsibility of the Contractor, with approval required from the Engineer before proceeding.
- .2 Prior to the closure of any street or driveway the public so affected by the closure shall be given a minimum forty-eight (48) hours notice to all vehicles to be removed if necessary.
- .3 Coordinate the Work such that all affected commercial properties will have access during regular business hours. Regular business hours may vary.
- .4 Comply with the requirements of all acts, regulations and by-laws in force for the regulation of traffic or use of roadways upon or over which it is necessary to carry out the Work, transport materials or equipment.
- .5 Coordinate the Work to minimize disruption to residential driveway and parking access. Provide temporary access to driveways within the Work area not immediately adjacent to an open excavation during evenings, weekends, holidays and other times in which the Contractor is not working.
- .6 All haul routes and hauling on City streets shall be subject to approval by the Engineer. The haul routes shall be maintained in a clean and dust-free condition at all times at the Contractor's expense.

3.2 ARTERIAL & COLLECTOR STREETS

- .1 Roadways classified as arterial shall not be closed except for the actual carrying out of Work and such closure or blockage shall be as brief as possible. The minimum expected level of service is to keep one lane in each direction open to traffic.
- .2 Closure of roadways classified as collectors shall be limited to seven days. Extended closures shall be considered by the Engineer with justification provided by the Contractor.
- .3 Street classification is available in Traffic By-law No. 5463.

3.3 INSTALLATION & REMOVAL

- .1 Upon review and acceptance of the TMP by the Engineer, confirm start and estimated completion dates for the closure to ensure adequate public notification. Advise of any changes to start or estimated completion dates to allow for updating of the notification a minimum of forty-eight (48) hours in advance of implementation.
- .2 Prior to commencing operations supply, erect, move and maintain all traffic control devices as required by the reviewed TMP, until the detour is no longer required.
- .3 All signs on City of Brandon property, by whosoever owned, which must be moved to facilitate the Work, shall be taken down, stored, and promptly restored with particular attention being given

TRAFFIC MANAGEMENT

to traffic regulatory signs. If conditions do not permit prompt restoration of signs, carefully remove the signs and posts from the Site and store them in a secure location until they can be installed. The Contractor shall be fully responsible for and shall pay the cost of restoration, repair and replacement of any sign damaged while in his care and custody.

- .4 All traffic control devices shall be positioned so they are clearly visible to oncoming traffic. They shall be positioned not less than 1.2m or more than 2.5m from the edge of the travelled portion of the roadway.
- .5 All such signs erected in accordance with this Section shall be removed and/or covered during periods when the advice or warning contained thereon is not applicable.
- .6 Any installed device that, in the opinion of the Engineer, does not comply with the aforementioned standards shall be removed promptly and replaced. Ensure that there are sufficient devices on hand to adequately protect all Sites during the performance of the Work. The Contractor shall designate a representative to regularly maintain such devices.
- .7 When the detour is no longer required, ensure that all permanent signs have been restored as required. Remove all traffic control devices and advise the Engineer to ensure the public notification is discontinued.

3.4 TRAFFIC NOT DETOURED (PARTIAL CLOSURE)

- .1 When working on a travelled way, place all equipment in a position to present a minimum of interference and hazard to the travelling public, keep equipment as close together as working conditions will permit, and preferably on the same side of the travelled way. Do not leave equipment on the travelled way overnight unless approved by the Engineer.
- .2 Traffic not detoured shall be permitted the use of the roadway at all times and the Contractor shall maintain the roadway and perform the Work so as to create a minimum of interference with pedestrian and vehicle traffic.
- .3 When the Work is performed within public areas, supply and install adequate warning and traffic signs as may be necessary to provide the public with adequate warning. Place the warning and traffic signs sufficiently in advance of the Work, to enable the public to respond to directions.
- .4 If in the opinion of the Engineer, damage is being done to public roads by the Contractor's equipment, remove the cause of the damage and repair any damage at the Contractor's expense.

3.5 TRAFFIC DETOURED (FULL CLOSURE)

- .1 In all cases where the Work interferes with the normal use of a roadway provisions shall be made either to detour the traffic or to afford it the use of the roadway.
- .2 If directed by the Engineer, a roadway may be closed to all traffic. Provide and maintain a passable detour route around the Site and an adequate means of egress and ingress for emergency vehicles and local traffic to access adjacent properties along or in the vicinity of the Work. The detour shall be well graded gravel or a paved surface free of pot holes and of sufficient width to accommodate the anticipated traffic volumes. Comply with all the provisions contained in the MUTCD regarding traffic control devices and flag person.
- .3 Any closure or blockage of traffic shall be as brief as possible and at no time shall any one city block be isolated from emergency services except during the actual carrying out of the Work.
- .4 Variable message signs may be required when closure of an arterial or collector street is necessary. Variable message signs shall be installed as directed by the Engineer.

TRAFFIC MANAGEMENT

3.6 FLAGPERSON

- .1 If, in the opinion of the Engineer, flag persons are required, to protect the Work and vehicular traffic, they shall be provided and equipped by the Contractor. Each flag person shall be certified, dressed and properly equipped as required by Manitoba Workplace Safety and Health and shall at minimum:
 - .1 Be certified as a Manitoba Flagperson and carry their Flagperson Training Certificate on them at all times while performing the duties of a Flagperson.
 - .2 Be equipped with a full safety PPE (jacket and trousers) that meets the Class 3 Level 2 requirements of CAN/CSA Z96-09, High Visibility Safety Apparel, and that is fluorescent yellow-green in colour and protective head gear in fluorescent yellow-green in colour.
 - .3 Be equipped with a means of communications with other flaggers and the chief flagperson as necessary.
 - .4 Be familiar with the standard procedures of traffic control flagging.
- .2 The Contractor shall provide not less than two (2) flag persons at each location where loading or depositing of material requires the turning of trucks or other equipment on the roadway; or where the operation of construction equipment, deposited stockpiles or materials on or adjacent to the roadway; or the leaving of equipment on or adjacent to the roadway endangers the safety of the travelling public; or where it is necessary to institute one-way traffic system through the construction area; or other blockage where traffic volumes are heavy, approach speeds are high and traffic signal system is not in use; or where public traffic is required to pass working vehicles or equipment which may block all or part of the travelled roadway.

3.7 PEDESTRIANS, CYCLISTS & ACCESSIBILITY

- .1 In all cases where the Work interferes with the normal use of a sidewalk, multi-use trail, bike lane or other pedestrian facility, provisions shall be made to detour the pedestrian or cyclist traffic or afford it use of the pedestrian facility.
- .2 The detour for a pedestrian facility shall be at an approved crossing to avoid dead ends. A temporary accessible ramp shall be provided at the detour location if one does not already exist.
- .3 Pedestrian facility barricades shall be installed to the full width of the pedestrian facility being detoured ensure detection from support animals. A minimum height of 150mm along the bottom of the detour signage shall be solid to ensure detection from an identification cane.
- .4 Where provisions are provided to use a pedestrian facility during construction, the surface shall be well-graded gravel, reclaimed asphalt pavement or paved surface, free of potholes and of sufficient width to accommodate the anticipated pedestrian traffic, including wheelchairs, scooters, or other wheeled devices.

3.8 ACCESS & PARKING

- .1 Provide and maintain access roads, sidewalk crossings, ramps, and construction runways in a condition suitable for a passenger car to enter the Site. Access to the Site shall be restricted to designated access roads as shown on the Drawings, or as directed by the Engineer.
- .2 Access to driveways, lanes and unloading areas shall be provided and maintained by the Contractor except when actual construction operations prohibit such access during normal working hours. Prior to the closure of any private driveway or loading area, the public so affected by the closure shall be given notice in order that vehicles may be removed if necessary. Advise all emergency services as to the location, nature and duration of any road closure.

TRAFFIC MANAGEMENT

- .3 Parking space on City streets for the purposes of the Work shall be as specified in the City of Brandon Traffic By-Law No. 5463.

3.9 TEMPORARY ROADS

- .1 Construct all haul roads, access roads and other roads necessary to complete the Work.
- .2 Access roads shall be easily traversable by a passenger vehicle to allow for access to the Site by the Engineer for purposes of inspections, measurements, or any other reason.
- .3 Prior to constructing roads, approval by the Engineer of the design, materials, grading, and location is required. Provide any design information requested by the Engineer to aid the approval process. The design for Private-contracted roads shall be submitted as part of the complete drawings submission prepared by the Consulting Engineer and accepted by the Engineer.
- .4 Temporary roads shall be considered part of the Site, therefore the provisions of Section 01-130 Cleaning & Closeout, specifically Dust Control, shall apply.

PART 4: METHOD OF MEASUREMENT

4.1 TRAFFIC MANAGEMENT

- .1 There will be no measurement made for 'Traffic Management'.

PART 5: BASIS OF PAYMENT

5.1 TRAFFIC MANAGEMENT

- .1 Payment for 'Traffic Management' will be at the lump sum price set forth in the Unit Price Schedule for each 'Traffic Management' measured as specified herein, which shall be payment in full for those operations described herein, and as shown on the Drawings.

MATERIAL & EQUIPMENT

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein pertains to the supply, storage, and incorporation of materials and Products into the Work, as well as guidelines for equipment and workmanship.

1.2 REQUIRED SUBMITTALS

- .1 Materials List in accordance with Section 01-030 Submittals.

PART 2: PRODUCTS

2.1 APPROVED PRODUCT LIST

- .1 See list of approved Products (D-01100-1) attached to this Section.

PART 3: EXECUTION

3.1 MATERIALS & WORKMANSHIP

- .1 Materials and workmanship shall conform to or exceed, in whole or part, applicable standards and other governmental or trade specifications or standards referred to within the Contract Documents. The Work shall conform to such standard, in whole or part, as specified.
- .2 Materials manufactured in excess of the timelines specified herein or by the manufacturer shall not be incorporated in the Work.

3.2 STANDARDS

- .1 All material, Products or equipment shall meet or exceed the reference standard stated in the Contract Documents. All material, Products or equipment required to be CSA approved shall carry the CSA label or CSA testing laboratory listing. All material, Products or equipment required to be fire rated shall carry the ULC label or ULC testing laboratory listing.
- .2 Material, Product and equipment shall be of the specified design and quality, performing to published ratings and for which replacement parts are readily available and unless otherwise indicated in the Contract Documents shall be of uniformity of manufacturer for any particular or like material, Product or item of equipment.
- .3 Defective, damaged, irregular, expired, factory seconds or inferior material, Product, or equipment whenever identified, will be rejected, regardless of previous inspections. The Contractor shall promptly remove and replace defective material, Product, or equipment at his own expense and be responsible for all delays and costs caused by a rejection.
- .4 If requested by the Engineer, the Contractor shall obtain an independent testing laboratory report, stating the material, Product or equipment meets or exceeds the requirements of the specification.

3.3 MANUFACTURER'S DIRECTIONS

- .1 Unless otherwise specified, the Contractor shall install, erect and maintain all material, Product and equipment in strict accordance with the manufacturer's latest printed instructions and shall

MATERIAL & EQUIPMENT

not rely on labels or enclosures provided with Products, but shall obtain written instruction directly from the manufacturer. The Contractor shall promptly notify the Engineer in writing, of any conflict between the Contract Documents and manufacturer instructions.

- .2 Labels, trademarks and nameplates on material, Product and equipment are not acceptable in permanent locations except where required for operating instructions, safety purposes or when located in mechanical or electrical rooms.

3.4 AVAILABILITY OF PRODUCTS

- .1 Immediately upon signing the Contract Documents, review product delivery requirements and anticipate foreseeable supply delays for items. If delays in supply of products are foreseeable, notify the Engineer of such, in order that substitutions or other remedial action may be authorized in ample time to prevent delay in performance of Work.
- .2 If a material, Product or item of equipment specified is not available or delivery would unduly delay completion of the Work, the Contractor shall propose a substitution or other remedial action in sufficient time to prevent a delay in the performance of the Work. If a proposal is not given to the Engineer, the Engineer reserves the right to substitute a more readily available material, Product or item of equipment, at no additional cost to the City, in order to prevent a delay in the completion of the Work.
- .3 The Contractor shall review Product requirements and shall coordinate the delivery of all material, Product and equipment, regardless of supplier, to ensure availability for incorporation into the Work, but shall not deliver materials unduly long before they are needed or in excessive amounts.
- .4 When requested by the Engineer, the Contractor shall provide evidence of orders placed for material, Product or equipment, with copies of acknowledgement of orders and confirmation of delivery of all material shall be scheduled so that the Work progresses continuously.

3.5 SUBSTITUTES

- .1 Material, Product, equipment, procedures and methods which are specified by their proprietary names, or by make, model, trade name or catalogue reference, shall form the basis for the Specifications and the Contract Documents. No substitute for these Products will be permitted without the Engineer's written approval and no other action on the part of the City will constitute an approval.
- .2 For City-contracted Work, Requests for Substitutes shall be submitted during the tender period as detailed in the General Conditions of the Contract, Instruction to Bidder IB4 Substitutes.
- .3 For Private-contracted Work, Requests for Substitutes shall be submitted prior to the Drawings being stamped "Reviewed for Construction" by the Engineer.
- .4 If a material, Product or item of equipment specified is not available or delivery would unduly delay completion of the Work, the Contractor shall propose a substitution or other remedial action in sufficient time to prevent a delay in the performance of the Work. If a proposal is not given to the Engineer, the Engineer reserves the right to substitute a more readily available material, Product or item of equipment, at no additional cost to the City, in order to prevent a delay in the completion of the Work.
- .5 A request for a substitute or alternative material, Product, item of equipment, procedure or method shall be submitted to the Engineer as described in Section 01-030 Submittals and shall include sufficient information and details to enable the Engineer to determine the acceptability of the material, Product, equipment, procedure of substitute. The request shall identify any other work which would become necessary to accommodate the requested substitute, and any anticipated cost or time savings. Further, the request shall certify that the substitute will adequately perform the functions called for by the general design, is equal in standard and meets

MATERIAL & EQUIPMENT

the Specifications in all respects, is suited the same use and capable of performing the same function as the specified and can be incorporated into the Work strictly in accordance with the Schedule of Work.

- .6 Should the proposed substitution be accepted either in part or in whole, the Contractor shall assume full responsibility and costs for design or Drawing changes, coordinating, modifying and integrating the work affected by the substitution into the permanent Work and the work by others.

3.6 STORAGE AND HANDLING

- .1 Store and handle all material, Product, and equipment in accordance with the manufacturer's written instructions protected from the action of the elements and in a secure manner satisfactory to the Engineer.
- .2 Store material, Product, and equipment unopened in the original and undamaged condition with the manufacturer's seals and labels intact. Packaging or bundling shall not be removed until the Product is required in the Work.
- .3 Storage of material, Product, and equipment shall be on the Site only, unless otherwise agreed to by the Engineer. If material, Product, or equipment is stored off the Site, it shall be insured and stored in a bonded warehouse, satisfactory to the Engineer.
- .4 The Contractor shall be responsible for the additional handling and transportation of the material, Product and equipment required to deliver the stored items to the Site. Material, product or equipment damaged in shipment or in storage shall be removed from the Site, and not incorporated into the Work.

3.7 MATERIAL, PLANT AND REAL PROPERTY SUPPLIED BY THE CITY

- .1 Materials to be supplied by the City shall be delivered to the nearest storage site or the Site at anytime. Where materials has been delivered prior to the awarding of the Contract, the Contractor and the Engineer shall visit the location where the material is stored and take such inventory as is required for the Contractor to assume responsibility for the material.
- .2 The Contractor shall be responsible for the acceptance, at the point of delivery, of any damaged material, unless prior to acceptance, the Engineer gives the Contractor a written release from all responsibility in accepting such material.
- .3 The Contractor shall, in advance of receipt of shipment of materials, provide adequate and proper storage facilities and, on receipt of such shipment, he/she shall promptly place the materials in storage, except when they are to be incorporated forthwith in the Work.
- .4 The Contractor shall be liable for any offloading, demurrage or storage charges on shipments of materials for the Work after the awarding of the Contract.
- .5 The Contractor shall be liable for all rentals, or other charges for handling, hauling or storing materials ordered for the Work, unless stated otherwise in the Contract Documents.
- .6 The Contractor shall keep such records of all material, Plant and real property referred to above as the Engineer from time to time requires and shall satisfy the Engineer, when requested that such material, Plant and real property are at the place and in the condition in which they ought to be.
- .7 The Contractor is liable to the City for any loss of or damage to material, Plant or real property that is supplied or placed in the care, custody and control of the Contractor by the City for use in the Work, whether or not that loss or damage is attributable to causes beyond the Contractor's control.

MATERIAL & EQUIPMENT

- .8 The Contractor is not liable to the City for any loss or damage to material, Plant or real property referred to above, if that loss or damage results from and is directly attributable to reasonable wear and tear.
- .9 If the Contractor fails to make good any loss or damage for which he is liable within a reasonable time after being required to do so by the Engineer, the Engineer may cause the loss or damage to be made good at the Contractor's expense, and the Contractor shall thereupon be liable to the City for the cost thereof and shall, on demand, pay to the City an amount equal to that cost or it shall be deducted from payments to be made by the City as part of the Contract Documents.

3.8 MATERIAL, PLANT AND REAL PROPERTY TO BECOME PROPERTY OF THE CITY

- .1 All material and Plant and the interest of the Contractor in all real property, licences, powers and privileges purchased, used or consumed by the Contractor for the Work shall, after the time of their purchase, use or consumption be the property of the City for the purposes of the Work and they shall continue to be the property of the City and in the case of material, until the Engineer is satisfied that it will not be required for the Work, and in the case of Plant, real property, licenses, powers and privileges, until the Engineer is satisfied the interest vested in the City therein is no longer required for the purposes of the Work.

3.9 PARTIAL PAYMENT FOR SUPPLY PRIOR TO INSTALLATION

- .1 For City-contracted Work, unless otherwise specified in Specification Divisions 2 through 10, Method of Measurement or Basis of Payment Sections, payment for supply and installation is processed upon installation to the satisfaction of the Engineer. The Engineer may consider partial payment for supply and delivery of Product or material to Site prior to installation. In these instances, the material or Product shall be deemed supplied as per the Manitoba Builders' Liens Act, Clause 2(3) Supplying Materials and the payment amount shall be as agreed upon by the Engineer and the Contractor.

3.10 TESTING

- .1 Supply and deliver to the Engineer representative of materials incorporated into the Work, for the purpose of testing and quality control, with reasonable promptness and in an orderly sequence so as not to cause any delay in the Work, as outlined in the Contract Documents or when requested by the Engineer
- .2 Provide all samples at no additional cost to the Work, and provide all labour and facilities to obtain, handle, and securely store and cure test samples and materials on the Site.

3.11 CONSTRUCTION EQUIPMENT AND PLANT

- .1 Maintain all construction equipment and Plant in good operating order. If requested by the Engineer, provide evidence that the construction equipment and Plant are adequate to manufacture, transport, place and finish the Work to a quality and production rates required by the Schedule of the Work.

QUALITY CONTROL & FIELD ENGINEERING

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for quality control and field engineering services provided by the Engineer or designate.

1.2 REQUIRED SUBMITTALS

- .1 Aggregate samples in accordance with Section 01-030 Submittals.

PART 2: PRODUCTS

NONE

PART 3: EXECUTION

3.1 INSPECTION

- .1 The Engineer shall complete inspections to verify conformance of the Work with the Standard Construction Specifications and Contract Documents.
- .2 Give timely notice to the Engineer to allow for inspection of the Work as specified herein. Provide access and cooperate with the Engineer for quality control purposes to allow for inspection of:
 - .1 Fitting, valve, hydrant, coupler, repair clamp, and tapping sleeve installation as part of watermain installation.
 - .2 Manhole, fitting, catch basins and coupler installation as part of sewer installation.
 - .3 Fitting, Saddle, main stop, curb stop, and coupler as part of water and sewer connection installations.
 - .4 Proof-rolling of all subgrade prior to geosynthetics or granular base course installation.
 - .5 Granular base course installation, compaction and moisture conditioning.
 - .6 Formwork, reinforcement, protection and placement and finishing of concrete.
 - .7 Surface preparation, prime and tack coats, delivery, placement and compaction of asphalt.
 - .8 Site preparation and installation of topsoil, soil, seed, erosion protection, sediment control, and tree planting.
 - .9 And all other works where conformance to the Standard Construction Specifications and Contract Documents is required.

3.2 TESTING

- .1 The Engineer shall complete or witness testing to support conformance of the Work with the Standard Construction Specifications and Contract Documents.

QUALITY CONTROL & FIELD ENGINEERING

- .2 Give twenty four (24) hours notice, minimum, to the Engineer to allow for testing as specified in Section 01-010 Common Requirements. Provide access and cooperate with the Engineer to review or complete the following:
 - .1 Watermain pressure testing and disinfection.
 - .2 CCTV inspection and deflection, infiltration and exfiltration testing.
 - .3 Sieve analysis, standard proctor and field density results.
 - .4 Mix design report, marshall test results and field density results.
 - .5 Concrete air, slump and strength testing shall be completed by a CCIL or ACI certified technician.
- .3 Material testing frequency shall be as indicated in the following table:

Testing	Test Method	Locations & Frequency
Bedding & Backfill Sieve Analysis	ASTM C136	Three samples per production sequence
Granular Base Course Sieve Analysis	ASTM C136	One sample per day during production
Granular Base Course Proctor	ASTM D-698	One sample/test
Granular Base Course Density	ASTM D-2922	Test locations shall be every 30m on each travel lane
Concrete Slump, Air, & Strength	CSA A-23	Each delivery over 3 cubic meters. Additional tests after every 20 cubic meters delivered.
Bituminous Aggregate Sieve Analysis	ASTM C136	two samples per day during production
Bituminous Marshall	ASTM D-6927	One sample per day or after delivery of 500 tonne
Bituminous Density	ASTM D-2950	Test locations shall be every 30m on each asphalt mat/pull

3.3 SURVEY

- .1 Unless otherwise specified in the Contract Documents, the Engineer will provide the initial construction survey, for City-contracted Work, to set horizontal and vertical control for the Work. This will include:
 - .1 Project survey control.
 - .2 Benchmarks, grades and stakes for establishing and siting a pipe laser for watermain and/or sewer pipe installation.
 - .3 Initial grade stakes to identify locations and elevations of, centerline, edge of surface, curb and gutter, shoulder and toe.
 - .4 Centerline nails to allow for paving operations.

QUALITY CONTROL & FIELD ENGINEERING

- .2 Give at least one (1) week notice to the Engineer prior to requiring any survey work from the Engineer as specified in Section 01-010 Common Requirements.
- .3 The Contractor shall be responsible for additional surveys, during the course of the Work including:
 - .1 Establishing grade and alignment of Watermains or Sewers. The Contractor shall supply a pipe laser and target for use during installation of watermain and/or sewer pipe. The pipe laser shall be calibrated yearly, and a certificate of calibration shall be provided to the Engineer.
 - .2 Establishing grade and alignment of Road Construction. The Contractor shall supply the appropriate equipment to transfer grades from the initial grade stakes to any additional stakes the Engineer deems necessary.
- .4 Assume full responsibility for dimensions and elevations transferred from benchmarks and grade stakes. If, in the opinion of the Engineer, the Contractor's method of setting alignment and grade is inaccurate or insufficient, the Engineer may direct that a more suitable method be used to ensure accurate grade and/or alignment is maintained.
- .5 Not all survey posts, monuments, property pins or bars are indicated on the Drawings, the Contractor shall verify their location with the Engineer before commencing the Work. Property pins may only be referenced or moved by a Manitoba Land Surveyor and the Contractor shall give timely notice to the Engineer to have this done at the City's expense for City-contracted Work.
- .6 Exercise proper care in the protection and preservation of all horizontal and vertical control points, survey posts, monuments, property pins, bars, benchmarks, reference points, and stakes and in the case of willful or careless destruction or disturbance, the Contractor shall be fully responsible for any mistakes caused by their unnecessary loss or disturbance in addition to the expense of their restoration or replacement.
- .7 Notify the Engineer when a grade stake is lost or destroyed. The Contractor shall have no claim for extra compensation on account of delay caused thereby.
- .8 Provide such assistance as may be required by the Engineer in establishing or checking the Work to verify vertical and horizontal tolerances are met, including a fully qualified rod person. No compensation shall be paid to the Contractor for any required assistance in setting lines and grades or for any loss of time on account of such necessary suspension of the Work or otherwise on the account of the requirements of this Section.
- .9 The Engineer at anytime may conduct Quality Assurance checks on any survey performed by the contractor.

3.4 MACHINE CONTROL

- .1 The Contractor may use machine control grading equipment as they deem necessary and as agreed to by the Engineer.
- .2 Request from the Engineer two (2) weeks in advance of their anticipated start date, the necessary design information to establish a Digital Terrain Model (DTM), as specified in Section 01-010 Common Requirements.
- .3 Survey control shall be provided to the Contractors by the Engineer. Request survey control points from the Engineer two (2) weeks in advance.
- .4 The DTM shall be submitted to the Engineer one (1) week in advance of the anticipated start date.

QUALITY CONTROL & FIELD ENGINEERING

- .5 The Contractor and Engineer shall perform checks on Site to verify the Contractor has the capabilities, knowledge, equipment and experience to properly operate the system and meet acceptable tolerances.
- .6 The Engineer shall review the Contractor's machine control grading. If the Engineer determines the Work is not meeting the required horizontal and vertical tolerances, the Contractor shall redo the Work to the requirements of the Contract at the Contractor's expense.

3.5 QUALITY CONTROL & FIELD ENGINEERING OF PRIVATE-CONTRACTED WORK

- .1 The Engineer shall authorize a Consulting Engineer to perform Quality Control & Field Engineering services for Private-contracted Work.
- .2 Quality Control reports, survey as-built information and testing reports shall be submitted to the Engineer at intervals specified by the Engineer. Intervals shall be determined prior to signature of the Contract Documents.
- .3 Quality assurance shall be undertaken by the Engineer.

END OF SECTION

CLEANING & CLOSEOUT

PART 1: GENERAL

1.1 DESCRIPTION OF WORK

- .1 The Work described herein is for requirements for maintaining the Work and Site in a clean and tidy condition, and for the proper closeout and completion of the Work.

1.2 REFERENCE STANDARDS

- .1 The Builder' Liens Act, C.C.S.M. c. B91 – Province of Manitoba.
- .2 The Workplace Safety & Health Act C.C.S.M. c. W210

PART 2: PRODUCTS

NONE

PART 3: EXECUTION

3.1 SITE CLEANUP

- .1 Continuously maintain the Site, the Work and adjacent buildings in a standard of cleanliness that ensures safe and clean access to public areas and is free from the accumulation of waste products, debris, and rubbish other than that caused by the City or other contractors. Roadways shall be clean and passable at all times.
- .2 The disposal of surplus material, salvage material, waste and debris shall comply with City of Brandon regulations and by-laws, and Provincial and Federal Government anti-pollution laws. Provide on-site containers for collection of waste materials, and debris and remove all waste materials and debris from the Site at regular scheduled times or as directed by the Engineer. The disposal of waste materials and rubbish by burning or burial on the Site will not be permitted.
- .3 As the Work progresses, remove any Products, tools, materials, Plant and equipment not required for the performance of the remaining Work.
- .4 If in the opinion of the Engineer the Contractor is negligent in performing any of the requirements specified herein, the Engineer will direct the necessary Work be done by others, with all costs charged to the Contractor or deducted from monies due to the Contractor.

3.2 DUST CONTROL

- .1 Dust caused by the Contractor's operations shall be controlled by cleaning, sweeping and sprinkling with water, or other means as necessary. Provide dust tight screens or partitions to localize dust generating activities.
- .2 If required by the Engineer, wet down dry materials and rubbish to prevent the blowing of dust and debris.
- .3 Initiate dust control measures including the application of calcium chloride and/or water to ensure dust conditions remain below levels acceptable to the Engineer.
- .4 Wet materials shall be transported in approved watertight vehicles. Tank trucks equipped with spray bars, complete with suitable control apparatus, shall be used for the application of water.

CLEANING & CLOSEOUT

The use of water resulting in mud on public roadways will not be permitted as a substitute for sweeping or other methods.

3.3 CLEANING OF BUILDINGS

- .1 Prior to the Final Inspection, clean the interior and exterior surfaces of buildings as directed by the Engineer. Cleaning of buildings may include the cleaning and polishing of glass, mirrors, hardware, wall tile, stainless steel, chrome, porcelain enamel, baked enamel, plastic laminate, mechanical and electrical fixtures, the replacement of broken, scratched or disfigured glass, the removal of stains, spots, marks and dirt from painted, decorative and stained work, electrical and mechanical fixtures, furniture fitments, millwork, walls, and floors, washing of exterior walls, steps and platforms, waxing, sealing, shampooing or other preparation of new floor finishes.
- .2 Remove all foreign materials from roof including nails, screws, and sheet metal cuttings with a magnetic roller and clean and sweep roofs, gutters, areaways and sunken wells, sweep and wash clean all paved areas.

3.4 SALVAGED MATERIAL

- .1 The City retains ownership of all existing works, material, Products or equipment removed from the Site during the Work.
- .2 Carefully remove, sort and pile salvaged material near the Site as directed by the Engineer. Material, Product or equipment which the Engineer declares to be of no value or use to the City shall be promptly removed from the Site and disposed of as stated in this Section.
- .3 The loading, transporting, unloading, and disposal of salvaged material shall be at the Contractor's sole expense unless stated otherwise in the Contract Documents.
- .4 All salvaged material shall be removed from the Site and neatly piled as directed by the Engineer.
- .5 The City reserves the right to direct salvaged material to a disposal location of its choosing at no additional cost to the City, provided such location is not be greater than fifteen (15) kilometres one way by road from the Site.

3.5 SURPLUS MATERIAL

- .1 All surplus or unsuitable material arising out of the Work shall be removed from the Site and neatly piled, evenly spread, or deposited as directed by the Engineer.
- .2 The City reserves the right to direct surplus excavated material to a disposal location of its choosing at no additional cost to the City, provided such location is not be greater than fifteen (15) kilometres one way by road from the Site.
- .3 Exercise great care to prevent spillage on haul routes and any spillage shall be removed immediately and the affected area cleaned.
- .4 The value of surplus materials not delivered to City as directed or disposed of in any other manner than specified herein shall be deducted from monies owing to the Contractor, or invoiced to the Contractor based on quantity calculations and value as determined by the Engineer.

3.6 O&M MANUALS & SYSTEM DEMONSTRATION

- .1 Prior to the completion of Work, arrange and coordinate with the Engineer, a system demonstration to instruct the Engineer in the maintenance and operation of any mechanical and electrical systems and finishes.

CLEANING & CLOSEOUT

- .2 Demonstrate and instruct the Engineer on the start up, operation, control, adjustment, trouble shooting, care, servicing and maintenance of each item of mechanical and electrical equipment using the completed operation and maintenance manuals (if required in the Contract Documents) as the basis of instruction.
- .3 Prepare and issue additional data in the operation and maintenance manuals as the need for additional data becomes apparent during the demonstration or as directed by the Engineer.
- .4 If specified in the Contract Documents, each manufacturer shall provide an authorized representative to demonstrate the operation of each supplied item of the mechanical and electrical system, and instruct the City's personnel on its use. The amount of time required for instruction of each item shall be as required by the City to ensure familiarity with equipment and systems.

3.7 SPARE PARTS

- .1 Supply all spare parts, special tools, maintenance and extra materials in the quantity specified in the Contract Documents and/or as per manufacturers recommendation. Provide items in unbroken cartons and strongly packaged with tags identifying their function and equipment with which they are associated.
- .2 Spare parts and maintenance materials provided shall be new, not damaged or defective, and of the same quality, manufacture, production and dye lot as Products incorporated in the Work. If requested, shall furnish evidence as to the type, source and quality of the spare parts provided.

3.8 SUBSTANTIAL PERFORMANCE

- .1 Prior to a request for a Certificate of Substantial Performance, thoroughly inspect the Work and ensure it meets the requirements for Substantial Performance set out in Section 2(1) of the Builders' Liens Act. If the Contractor is satisfied all requirements have been met, provide a written request for a Certificate of Substantial Performance to the Engineer.
- .2 For City-contracted Work, upon receipt of the request for a Certificate of Substantial Performance, the Engineer will inspect the Work and either provide the Certificate of Substantial Performance, or provide a list of deficiencies that must be corrected prior to issuance of the Certificate.
- .3 Upon issuance of a list of deficiencies, the Contractor may request a meeting on-site to review the deficiencies with the Engineer and clarify any outstanding requirements. Upon completion of the meeting on-site, any changes or modifications to the list will be made by the Engineer and the list re-issued as the final deficiency list.
- .4 When the Engineer is satisfied that all defects and deficiencies have been corrected, and that all the requirements of the Contract Documents have been met, the Certificate of Substantial Performance of Work will be issued.
- .5 For Private-contracted Work, and all other requirements related to Substantial Performance for City-contracted Work, the relevant provisions of the Builders' Liens Act shall apply.

3.9 FINAL INSPECTION

- .1 Prior to a request for a Certificate of Final Completion, thoroughly inspect the Work and ensure it is complete, that all deficiencies have been corrected, the Site is clean and cleanup is complete, all Work is in full operating condition, the Site Inspection and testing reports have been reviewed to verify conformance with the Contract Documents and that changes, repairs or replacements have been completed. When satisfied that the Work, as set forth in the Contract Documents, is

CLEANING & CLOSEOUT

- totally performed, the contractor shall, in writing, request a Certificate of Final Completion from the Engineer.
- .2 Upon receipt of the request for a Certificate of Final Completion, the Engineer will inspect the Work and either provide the Certificate of Final Completion, or provide a list of deficiencies that must be corrected prior to issuance of the Certificate.
 - .3 Upon issuance of a list of deficiencies, the Contractor may request a meeting on-site to review the deficiencies with the Engineer and clarify any outstanding requirements. Upon completion of the meeting on-site, any changes or modifications to the list will be made by the Engineer and the list re-issued as the final deficiency list.
 - .4 When the Engineer is satisfied that all defects and deficiencies have been corrected, and that all the requirements of the Contract Documents have been met, the Certificate of Final Completion of Work will be issued, the date of which will become the start of the Warranty period.
 - .5 The Final Progress Estimate will not be issued until the Engineer has received, in good order all copies of the operating instructions and manuals, warrantee certificates and guarantees, spare parts, as built drawings, certification that training is complete, occupancy certificates, certificates or permits from Hydro, elevator, and fire inspectors, testing and balancing reports, final utility readings, all keys for buildings, gates, or operating systems and equipment, and any other required certificates of approved or acceptance from regulating bodies as required by the Contract Documents.
 - .6 Final Inspections for Private-contracted Work shall be scheduled and performed as per the Contract Documents.

3.10 WARRANTY INSPECTION

- .1 Prior to the end of the warranty period, the Engineer will inspect the Work and either provide notice that no additional warranty items remain or provide a list of deficiencies that must be corrected. The Contractor shall promptly remedy any outstanding defects due to faulty materials or workmanship in the Work.
- .2 Upon issuance of a list of deficiencies, the Contractor may request a meeting on-site to review the deficiencies with the Engineer and clarify any outstanding requirements. Upon completion of the meeting on-site, any changes or modifications to the list will be made by the Engineer and the list re-issued as the final deficiency list.
- .3 When the Engineer is satisfied that all defects and deficiencies will be corrected, and that all the requirements of the Contract Documents have been met, notice will be provided to the Contractor.
- .4 Warranty Inspections for Private-contracted Work shall be scheduled and performed as per the Contract Documents.

3.11 ENGINEER'S CHARGES

- .1 The Engineer will conduct no more than two (2) Substantial Performance, two (2) Final Completion Inspections, and two (2) warranty Inspections. In each case one inspection will be to review for deficiencies, and the second to confirm deficiencies have been corrected.
- .2 Should it become necessary for the Engineer to again inspect the Work for deficiencies which were not corrected satisfactorily prior to the previous two inspections, the Contractor shall pay for the additional time and expense incurred by the Engineer all further inspections. The Engineer's charges for additional time will be deducted from the Contractor's Final Progress Estimate or invoiced to the Contractor.

CLEANING & CLOSEOUT

PART 4: METHOD OF MEASUREMENT

4.1 DUST CONTROL

- .1 Measurement for each class or type of 'Dust Control' described herein will be based on the number of hours spent applying 'Dust Control' to the site.

PART 5: BASIS OF PAYMENT

5.1 DUST CONTROL

- .1 Payment for each class or type of 'Dust Control' will be at the price set forth in the Contract Documents for each class or type of 'Dust Control' measured as specified herein, which shall be payment in full for those operations described herein, including:
 - .1 Supply and operation of equipment to apply dust control.
 - .2 Supply and application of dust control materials.
- .2 And all other costs and performing all other operations considered incidental to the supply and application of 'Dust Control' for which no price or prices or provisions for payment are included in the Contract Documents.

END OF SECTION
